WESTON LANE

Tree Shaker Harper Collins

Bully victim and narrator, Flora Travers discovers she has a supernatural connection with the ghost of Judge Cotton that died in his homemade jail cell in 1972 after a failed attempt to punish teenagers that thwarted the law. Like Flora, the judge was bullied too and heard her cries to get rid of her "problems".

STEYERMARK'S FLORA OF MISSOURI

Springer Nature

The book presents - based on the most recent research and development results worldwide - the perspectives of new propulsion concepts such as electric cars with batteries and fuel cells, and furthermore plug in hybrids with conventional and alternative fuels. The propulsion concepts are evaluated based on specific power, torque characteristic, acceleration behaviour, specific fuel consumption and pollutant emissions. The alternative fuels are discussed in terms of availability, production, technical complexity of the storage on board, costs, safety and infrastructure. The book presents summarized data about vehicles with electric and hybrid propulsion. The propulsion of future cars will be marked by diversity - from compact electric city cars and range

extender vehicles for suburban and rural areas up to hybrid or plug in SUV's, Pick up's and luxury class automobiles.

The Peyote Cult Body and Spirit in the Middle Ages

An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column "Store-Bought Is Fine" Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to "good" taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in "You Wanna Be On Top," Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much

with clarity, heartfelt honesty, and Rex King's trademark humor. A VINTAGE ORIGINAL

HUMANISTICA LOVANIENSIA

Downsview : Ontario, Ministry of Transportation, Electrical Engineering Section

One of the few studies that deals with Roman domestic religion as practised by the lower classes. The author collects and analyzes the enormous epigraphic and archaeological evidence for Silvanus, The Roman god of agriculture and forests, challenging the widely-held view that private cult was subordinate or inferior to civic paganism.

Clay Sanskrit

Volume 50

Tacky Dell Publishing Company

Its frivolous subject may have been the reason why Malavika and Agni mitra is sometimes considered to be the least significant of the three dramas of Kali dasa, the poet laureate of Indian antiquity who probably lived in the fifth century CE. Yet the play's lively and playful plot more than makes up for its lack of deities, heroic prowess and pathos. The machinations of King Agni mitra's jester to help him add a dancing girl to his harem in spite of the subtle intrigues of the two jealous queens carry the gallant hero through hope and despair to the happy ending.

A look at the life and time of the stegosaurus.

Retorica Ecclesiastica Ohio University Press

Kidnapped and sold into slavery in the

American South, freeman Solomon Northup spent twelve years in bondage before being freed. *Twelve Years a Slave* is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's *Uncle Tom's Cabin*, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

Plain Talk about the Protestantism of Today. From the French CRC Press

This book is dedicated to addressing the major challenges in fighting COVID-19 using artificial intelligence (AI) and machine learning (ML) - from cost and complexity to availability and accuracy. The aim of this book is to focus on both the design and implementation of AI-based approaches in proposed COVID-19 solutions that are enabled and supported by sensor networks, cloud computing, and 5G and beyond. This book presents research that contributes to the application of ML techniques to the problem of computer communication-assisted diagnosis of COVID-19 and similar diseases. The authors present the latest theoretical developments, real-

world applications, and future perspectives on this topic. This book brings together a broad multidisciplinary community, aiming to integrate ideas, theories, models, and techniques from across different disciplines on intelligent solutions/systems, and to inform how cognitive systems in Next Generation Networks (NGN) should be designed, developed, and evaluated while exchanging and processing critical health information. Targeted readers are from varying disciplines who are interested in implementing the smart planet/environments vision via wireless/wired enabling technologies.

It is a widespread prejudice of modern, scientific society that "magic" is merely a ludicrous amalgam of recipes and methods derived from primitive and erroneous notions about nature. *Eros and Magic in the Renaissance* challenges this view, providing an in-depth scholarly explanation of the workings of magic and showing that magic continues to exist in an altered form even today. Renaissance magic, according to Ioan Couliano, was a scientifically plausible attempt to manipulate individuals and groups based on a knowledge of motivations, particularly erotic motivations. Its key principle was that everyone (and in a sense everything)

could be influenced by appeal to sexual desire. In addition, the magician relied on a profound knowledge of the art of memory to manipulate the imaginations of his subjects. In these respects, Couliano suggests, magic is the precursor of the modern psychological and sociological sciences, and the magician is the distant ancestor of the psychoanalyst and the advertising and publicity agent. In the course of his study, Couliano examines in detail the ideas of such writers as Giordano Bruno, Marsilio Ficino, and Pico della Mirandola and illuminates many aspects of Renaissance culture, including heresy, medicine, astrology, alchemy, courtly love, the influence of classical mythology, and even the role of fashion in clothing. Just as science gives the present age its ruling myth, so magic gave a ruling myth to the Renaissance. Because magic relied upon the use of images, and images were repressed and banned in the Reformation and subsequent history, magic was replaced by exact science and modern technology and eventually forgotten. Couliano's remarkable scholarship helps us to recover much of its original significance and will interest a wide audience in the humanities and social sciences.

Body and Spirit in the Middle Ages
Fundacion BBVA

These papers study Western cultural heritage by looking at the Greek origin of and relevance for understanding the European philosophical heritage. They focus on the Aristotelian and other traditions that have played an essential role in the intellectual evolution of the Old Continent. Contains papers in Spanish, Portuguese, Italian, and English.
Springer

The Peyote Cult by Weston La Barre (1915-1996) is the classic work on

peyotism, originating in Weston La Barre's studies of the use of peyote in the rituals of fifteen Native American tribes in the 1930s. It has been revised many times. This is the latest edition (the fifth, enlarged edition), now back in print.

Arizona Center for Medieval and Renaissance Studies (ACMRS)

"The Flora of Missouri project, directed by Garden Curator, Dr. George Yatskievych, is an ongoing effort to update and compile information on the state's flora. It began in 1987 as a joint effort of the Missouri Botanical Garden and the Missouri Department of Conservation. One of its main goals is a three-volume revision of former Missouri Botanical Garden curator Julian A. Steyermark's 'Flora of Missouri', first published in 1963. Missouri's ever changing plant diversity, the shifting distributions of its plant species, and the many new records of plants in the state have necessitated an expansion of Steyermark's original publication into three volumes."--

Electric Field Analysis is both a student-friendly textbook and a valuable tool for engineers and physicists engaged in the design work of high-voltage insulation systems. The text begins by introducing the physical and mathematical fundamentals of electric fields, presenting problems from power and

dielectric engineering to show how the theories are put into practice. The book then describes various techniques for electric field analysis and their significance in the validation of numerically computed results, as well as: Discusses finite difference, finite element, charge simulation, and surface charge simulation methods for the numerical computation of electric fields Provides case studies for electric field distribution in a cable termination, around a post insulator, in a condenser bushing, and around a gas-insulated substation (GIS) spacer Explores numerical field calculation for electric field optimization, demonstrating contour correction and examining the application of artificial neural networks Explains how high-voltage field optimization studies are carried out to meet the desired engineering needs Electric Field Analysis is accompanied by an easy-to-use yet comprehensive software for electric field computation. The software, along with a wealth of supporting content, is available for download with qualifying course adoption.

By Richard Evans Schultes, Harvard University, Cambridge, Massachusetts, and Albert Hofmann, Basel, Switzerland. With Forewords by I. Newton Kugelmass and Henrich Kluver. The Second Edition of this book encompasses all of the advances that have been made in this field since publication of the original text. Newly discovered hallucinogenic plants have been incorporated into the discussions along with new information on some well-known drugs. The authors continue to focus on the botany and chemistry of hallucinogens, although

they also consider ethnobotanical, historical, pharmacological and psychological aspects. Initial chapters delineate definition, botanical distribution, and structural types of hallucinogenic plants. Plants of known, possible and dubious hallucinogenic potential are then covered in separate sections. The bibliography for this new edition has been enlarged to accommodate all of the recent activity in botanical and chemical investigation of psychoactive plants. Readers will also appreciate the excellent illustrations that accompany the text.

Dentists Leuven University Press
The most comprehensive book on Roman burial practices—now available in paperback Never before available in paperback, J. M. C. Toynbee's study is

the most comprehensive book on Roman burial practices. Ranging throughout the Roman world from Rome to Pompeii, Britain to Jerusalem—Toynbee's book examines funeral practices from a wide variety of perspectives. First, Toynbee examines Roman beliefs about death and the afterlife, revealing that few Romans believed in the Elysian Fields of poetic invention. She then describes the rituals associated with burial and mourning: commemorative meals at the gravesite were common, with some tombs having built-in kitchens and rooms where family could stay overnight. Toynbee also includes descriptions of the layout and finances of cemeteries, the tomb types of both the rich and poor, and the types of grave markers and monuments as well as tomb furnishings.
