Who was the enigma the world knows as Christopher Columbus . . .

. . . and why has his true identity been covered up for centuries?

When an aged scholar is found mysteriously dead in his hotel

room, Thomas Noronha, expert cryptographer and professor of

history, is called upon to finish the man's unresolved investigation. In the course of unraveling the puzzles and cryptograms shrouding his late predecessor's work, Thomas discovers a code that will set him on a breathtaking race across the globe—from Lisbon to Rio to New York and Jerusalem—as he is drawn into one of the greatest mysteries of all time, a shocking revelation that will alter everything we've always believed about one of the world's most celebrated adventurers.

This study examines the post-medieval reception of Vienna's women's monastic institutions. Through analysis of the physical and historical place such women's institutions held in an important urban and political center, this book provides a new picture of the ways in which the medieval shapes later understandings of women's role and agency.

La vie de Tomás Noronha bascule lorsqu'on lui demande de déchiffrer les notes d'un professeur d'histoire portugais, retrouvé mort dans sa chambre d'hôtel alors qu'il travaillait sur la découverte des Amériques. La vie de Tomás Noronha bascule lorsqu'on lui demande de déchiffrer les notes d'un professeur d'histoire portugais, retrouvé mort dans sa chambre d'hôtel alors qu'il travaillait sur la découverte des Amériques. Au fil de ses investigations, Tomás va découvrir un code qui pourrait bien changer notre vision de l'Histoire. De Lisbonne à Rio, New York ou Jérusalem, le jeune cryptologue se trouve plongé dans l'histoire fascinante des Grandes Découvertes et se heurte à l'une des énigmes que les historiens n'ont toujours pas réussi à résoudre : l'identité de Christophe Colomb et, par delà son identité, la véritable histoire de la découverte des Amériques. Pourquoi le nom de " Colomb " n'a-t-il jamais été trouvé dans les témoignages de l'époque ? Pourquoi un jeune génois d'origine modeste ne parlait-il ni italien, ni génois, mais un espagnol approximatif truffé de mots portugais ? Pourquoi cet homme a-t-il embarqué sur la Santa- Maria quelques heures avant l'avis d'expulsion des Juifs du Portugal ? Tomás se rend vite compte qu'un mystère en appelle un autre. Comment un jeune tisserand génois a-t-il pu épouser une femme de la noblesse portugaise ? Que dire de la signature cabalistique de Christophe Colomb ? Et l'Amérique n'était-elle pas déjà bien connue avant 1492 ? Comme un leurre utilisé par les Portugais pour éconduire les Espagnols... Christophe Colomb n'était-il pas un agent double oeuvrant entre les deux plus grandes puissances de l'époque qui voulaient se partager le monde et enfouir la vérité ? Autant de questions posées par l'Histoire auxquelles les spécialistes n'ont jamais pu répondre... Jusqu'à aujourd'hui.

This is a PDF based on the contents of a web site I've been working on for decades. I do not believe I will ever entirely finish it. But I wanted to make it available. Textual criticism is the process of recovering an ancient document from late and corrupt manuscript copies; New Testament Textual Criticism consists of trying to figure out what the New Testament originally said before scribes messed it up. Dedicated to Dr. Sally Amundson and Dr. Carol Elizabeth Anway and Lily. This version, from July 20, 2013, will probably be the last; the file is almost too large to edit.

Recognition of evidence-based medicine is not only increasing rapidly, but it has become essential to pediatric nutrition. Starting with some methodological issues - discussing systemic reviews, meta-analyses and clinical trials - this publication then concisely summarizes current knowledge as well as ignorance and uncertainty regarding selected aspects of childhood nutrition. These aspects include functional gastrointestinal disorders, issues concerning various kinds of milk, complementary foods, enteral nutrition, celiac disease or obesity. Contents are based on evidence and summarize current guidelines; moreover, when there is no clear evidence, they provide some food for thought.

Crystal skulls, imaginative codices, dubious Olmec heads and cute Colima dogs. Fakes and forgeries run rampant in the Mesoamerican art collections of international museums and private individuals. Authors Nancy Kelker and Karen Bruhns examine the phenomenon in this eye-opening volume. They discuss the most commonly forged classes and styles of artifacts, many of which were being duplicated as early as the 19th century. More important, they describe the system whereby these objects get made, purchased, authenticated, and placed in major museums as well as the complicity of forgers, dealers, curators, and collectors in this system. Unique to this volume are biographies of several of the forgers, who describe their craft and how they are able to effectively fool connoisseurs and specialists.

An important, accessible introduction to pre-Columbian art fraud for archaeologists, art historians, and museum professionals alike. A parallel volume by the same authors discusses fakes in Andean archaeology.

The safety and quality of the U.S. food supply depend on a total program of careful microbiological control. Microbiological criteria, which establish acceptable levels of microorganisms in foods and food ingredients, are an essential part of such a program. Says ASM News, "This book provides not only an informed and objective evaluation of microbiological criteria for a wide variety of foods and specific pathogens and the committee's recommendations regarding those criteria, but it also provides an excellent reference book on the applied microbiological aspects of food quality assurance."

Governance by regulation - rules propounded and enforced by bureaucracies - is taking a growing share of the sum total of governance. Once thought to be an American phenomenon, it is now a central form of state action in every part of the world, including Europe, Latin America, and Asia, and it is at the core of

much international lawmaking. In Comparative Law and Regulation, original contributions by leading scholars in the field focus both on the legal dimension of regulation and on how this dimension operates in those places that have turned to regulation to meet their obligations.

The book provides general principles and new insights of some plant physiology aspects covering abiotic stress, plant water relations, mineral nutrition and reproduction. Plant response to reduced water availability and other abiotic stress (e.g. metals) have been analysed through changes in water absorption and transport mechanisms, as well as by molecular and genetic approach. A relatively new aspects of fruit nutrition are presented in order to provide the basis for the improvement of some fruit quality traits. The involvement of hormones, nutritional and proteomic plant profiles together with some structure/function of sexual components have also been addressed. Written by leading scientists from around the world it may serve as source of methods, theories, ideas and tools for students, researchers and experts in that areas of plant physiology.

He was sent from Spain on a religious crusade to Mexico to "detect the sickness of idolatry," but Bernardino de Sahagún (c. 1499-1590) instead became the first anthropologist of the New World. The Franciscan monk developed a deep appreciation for Aztec culture and the Nahuatl language. In this biography, Miguel León-Portilla presents the life story of a fascinating man who came to Mexico intent on changing the traditions and cultures he encountered but instead ended up working to preserve them, even at the cost of persecution. Sahagún was responsible for

documenting numerous ancient texts and other native testimonies. He persevered in his efforts to study the native Aztecs until he had developed his own research methodology, becoming a pioneer of anthropology. Sahagún formed a school of Nahua scribes and labored with them for more than sixty years to transcribe the pre-conquest language and culture of the Nahuas. His rich legacy, our most comprehensive account of the Aztecs, is contained in his *Primeros Memoriales* (1561) and *Historia General de las Cosas de Nueva España* (1577). Near the end of his life at age 91, Sahagún became so protective of the Aztecs that when he died, his former Indian students and many others felt deeply affected. Translated into English by Mauricio J. Mixco, León-Portilla's absorbing account presents Sahagún as a complex individual—a man of his times yet a pioneer in many ways.
