This volume is a compilation of carefully selected questions at the PhD qualifying exam level, including many actual questions from Columbia University, University of Chicago, MIT, State University of New York at Buffalo, Princeton University, University of Wisconsin and the University of California at Berkeley over a twenty-year period. Topics covered in this book include dynamics of systems of point masses, rigid bodies and deformable bodies, Lagrange's and Hamilton's equations, and special relativity. This latest edition has been updated with more problems and solutions and the original problems have also been modernized, excluding outdated questions and emphasizing those that rely on calculations. The problems range from fundamental to advanced in a wide range of topics on mechanics, easily enhancing the student's knowledge through workable exercises. Simple-to-solve problems play a useful role as a first check of the student's level of knowledge whereas difficult problems will challenge the student's capacity on finding the solutions.

This new kind of dictionary reflects the use of "rhythm rhymes" by rappers, poets, and songwriters of today. Users can look up words to find collections of words that have the same rhythm as the original and are useable in ways that are familiar to us in everything from vers libre poetry to the lyrics and music of Bob Dylan and hip hop groups.

For the Greeks, the craft
of Odysseus and the
wisdom of Athena were
examples of metis, an
elusive cast of mind that
ranged from wisdom and
forethought to craft and
cunning. Although it
informed many aspects of
Greek society, metis was
all but absent from the
language of Greek
philosophy. Invoking
indigenous Chinese
debates, Lisa Raphals
here examines the role
and significance of metis
intelligence in classical
Chinese philosophy,
literature, history, and
military strategy. Raphals
first examines the range
of meanings of the
Chinese word zhi. As with
the Greek metis, the uses
of zhi include "wisdom,"
"knowledge,"
"intelligence," "skill,"
"cleverness," and

"cunning." Drawing on
parallels between the two
traditions, she argues
that, in China as in
Greece, metis intelligence
tacitly informed many
aspects of cultural and
social life. In China, these
included views of the
nature of knowledge and
language, standards of
personal and social
morality, and theories of
military strategy and
statecraft. After surveying
representative texts from
the Warring States period,
Raphals considers the
function of metis
intelligence as the
dominant quality of
central characters in two
novels from the Ming
dynasty, the Romance of
Three Kingdoms and
Journey to the West.
Finally, she compares the
treatment of themes of
heroism and recognition
in the Chinese and Greek
narrative traditions.
Knowing Words will be

welcomed by sinologists,
classicists, and scholars of
comparative philosophy
and literature.
