Salient Features of the Book : Child-friendly lay-out and attractive illustrations. Worksheets are as per the age and level of understanding of the students. Ample space for writing answers. Includes all varieties of questions. Mental Maths at the end of each chapter. For Term 1 : One Model Test Paper for Half Yearly Examination

For Term 2 : One Model Test Paper for Yearly Examination We have a great pleasure in presenting the book NCERT Practice Workbook Math-Magic, for Class 1. It is a part of the series NCERT Practice Workbook Math-Magic (for Classes 1 – 5). This series would prove to be a great aid to the teachers as well as the learners. The worksheets in this book are designed to help the child comprehend the concepts fully, and to improve the mathematical and calculation skills of the learner. The book provides drilling practice with the aim of leading to a deeper understanding of the basic concepts of mathematics. The drilling practice is both learner and teacher friendly, as it gives enough opportunity to the teacher to test the retention ability of the learner. Each

worksheet is based on the exercises given in the Text Book. Solving of these worksheets would lead to a clear grasp of what is taught. It would also enhance the confidence of the learner to solve mathematical problems with speed and accuracy. It would lead to the application of these concepts in day to day life. Salient features of the book are : Child-friendly lay-out and attractive illustrations to create the interest of the students in the subject. Worksheets are prepared keeping in mind the age and level of understanding of the students. Ample space for writing answers. Includes various types of questions, viz, Tick the Correct Answer, Fill in the Blanks, True or False, Word Problems, etc. Mental Maths at the end of each chapter to enhance the mental agility of

the students. Two Model Test Papers – one for Half Yearly Examination (Term 1) and other for Yearly Examination (Term 2), have been given. We are sure that the book would prove to be a useful Practice Workbook for the learners. Suggestions and criticism for the improvement of the book would be highly appreciated. — Goyal Brothers Prakashan

This One-Sheet-A-Day math drill workbook is for 7th grade students who want extra practice with multiplication of decimals up to thousandths with one or two digits. It contains 200 math practice sheets, one for each school day of the year. Upon completion, the student will be more competent in 7th grade mathematics and ready to proceed with more difficult exercises. Unlike other math drill books, this is one of 24 workbooks created to establish a daily routine for each student to practice on their own from grades 1 through 7. It is specifically designed to gradually increase mathematic ability with the least amount of stress for both parent

and student. Kids need to practice at home to support what they are learning in school, but finding resources to help with that goal can be daunting. It takes a lot of time searching online for free resources to print or for books with enough exercises. Beyond that, the options include going to libraries, enrolling them in an afterschool class or hiring a personal tutor. Who has the time and money for all of that? The answer is, not many parents. Each and every parent wants to provide enough practice work to their kids, but on top of the challenges in finding resources, questions remain about how much practice a child needs to boost educational success: twenty sheets of practice work a day? One sheet a week? What's the optimum practice work

during a whole academic year? Confused? The authors have a decade of classroom expertise and have spent a large amount of time researching and wasting resources trying all the options for their own kids. Now you can benefit from what they have learnt. The result is finding out that "ONE-SHEET-A-DAY" is the optimum way to support classroom learning, and it is amazingly simple. This book eliminates the need to take home prints or run around franchises, bookstores and libraries trying to find enough material. It also prevents you from overwhelming your kids with too many math drill worksheets. There are approximately 200 school days a year. Simply have your child complete ONE per day. Work is far easier when it is part of a routine, especially for kids. The One-

Sheet-per-Day program is an easy routine to start and maintain because it takes less than 20 minutes per day, using basic skills your child already knows. Simply take one sheet from the book, ask your child to complete it in a quiet place, and return it to you to check the answers, a painless routine for you and your child, and instant feedback for both of you. Geared to follow most math curriculums, most kids can do the appropriate sheet on their own based on what they are learning at school. "One-Sheet-A-Day" math practice drills will give your child practice they need to score higher on test day, and build confidence in their math abilities.

This new book by authors Jane Emerson and Patricia Babbie follows on from their award winning book, the Dyscalculia Assessment. Once careful assessment has identified the particular numeracy difficulties your pupils may have, the Dyscalculia Solution provides a practical teaching guide for addressing and solving those difficulties. The Dyscalculia Solution includes step-by-step instructions on how to teach pupils to use whole numbers by talking and reasoning about them, and communicating their thinking in a verbal, diagrammatic and written form. The

book includes scripts to emphasise the importance of using the correct language to develop numerical thinking, as well as teaching objectives, activities and games which are important for fostering a positive attitude to numeracy. Each new concept builds on previous understanding so that new facts are derived by reasoning from known facts. The Dyscalculia Solution is ideal for use with primary school children, but can easily be adapted for older students, and is invaluable for SENCOs, TAs, educational psychologists and mainstream teachers, keen to support students with numeracy difficulties in their class. Accompanying materials in both print and electronic formats to support busy teachers by providing lesson plans and worksheets

are available with this book.
