 At the outset of the twenty-first century, more than 9 million people are held in custody in over 200 countries around the world. --from the essay "Prisons and Jails" by Ron King The first comparative study of this increasingly integral social subject, *International Handbook of Penology and Criminal Justice* provides a comprehensive and balanced review of the philosophy and practicality of punishment. Drawn from the expertise of scholars and researchers from around the world, this book covers the theory, practice, history, and empirical evidence surrounding crime prevention, identification, retribution, and incarceration. It analyzes the efficacy of both traditional methods and thinking as well as novel concepts and approaches. Beginning with a study of the changing attitude of penal practice in Florida from one of offender transformation to one of risk-management, imprisonment, surveillance, and control, this volume embarks on an objective and sober appraisal of every aspect of the field. Contributions consider the sociology of incarcerated prisoners including the increasing prevalence of prison suicides. The book evaluates arguments regarding the world-wide abolition of capital punishment from moral, utilitarian, and practical positions. It examines non-incarcerative and alternative punishments such as financial restoration and restrictions of liberty, as well as the positive effects of Victim Offender Mediation. It also considers several methods aimed at achieving measurable crime prevention including identifying at-risk juveniles and minimizing crimes of opportunity, as well as the pros and cons of employing the coercive power of police. Further essays consider subjects such as international policing, the roles of prosecution and defense attorneys, current discretionary sentencing practices, and the role and treatment of victims. The volume concludes with two chapters of case studies that provide a "hands-on" feel for the interplay of the concepts discussed. This volume is the first in a three-part trilogy.  In the fourth edition of *Essential Criminology*, authors Mark M. Lanier, Stuart Henry, and Desire .M. Anastasia build upon this best-selling critical review of criminology, which has become essential reading for students of criminology in the 21st century. Designed as an alternative to overly comprehensive, lengthy, and expensive introductory texts, *Essential Criminology* is, as its title implies, a concise overview of the field. The book guides students through the various definitions of crime and the different ways crime is measured. It then covers the major theories of crime, from individual-level, classical, and rational choice to biological, psychological, social learning, social control, and interactionist

perspectives. In this latest edition, the authors explore the kind of criminology that is needed for the globally interdependent twenty-first century. With cutting-edge updates, illustrative real-world examples, and new study tools for students, this text is a necessity for both undergraduate and graduate courses in criminology.

This book provides a comprehensive overview of the methods used in the Criminal Justice system in the United States to counsel and treat offenders. It is aimed at advanced undergraduate and early graduate-level students for courses in Correctional Treatment or Rehabilitation, or Community Corrections more broadly. The sections in the book provide: - Aims and Scope of Correctional Counseling and Treatment -Tools that Corrections Workers Use (including counseling and case management) - Behavioral Modification Treatments: Examples and Applications - Cognitive Therapies: Examples and Applications Throughout the text, there is an emphasis on the big picture: the interaction of the correctional component of the justice system with other components, particularly courts (including special courts like family courts, drug courts, veterans courts and other programs). Chapters in this book address the diverse population of correctional facilities, including juvenile offenders; those with mental illness, addiction and substance abuse problems, physical and mental disabilities; and homeless populations. The author also provides analysis of how legislation influences the corrections process. This work is also enhanced by providing comparative analysis of the criminal and juvenile justice systems: their goals, objectives, and how these can affect counseling and treatment available within these two systems. This pedagogical features of this engaging text include: excerpted interviews with correctional practitioners about the problems and challenges they encounter, discussion questions, classification instruments and real-world examples of specific treatments programs, and case studies that give students the chance to select the appropriate interviewing, counseling or treatment approach to deal with the problem/ issues of the case. This work provides students with an overview of the methods used for Correctional Treatment and Counseling, and the tools to begin to think critically about how and when to apply these methods.

This book aims to serve as a comprehensive resource for a myriad of crime and mental health topics and issues in the African criminal justice system from a psycho-criminological perspective. *Crime, Mental Health and the Criminal Justice System in Africa: A Psycho-Criminological Perspective* is an ideal primary text for courses in criminology, criminal justice, and forensic psychology, as well as asource of reference for practitioners who deal with offenders or victims. "For a long time, African historiography has been viewed and interpreted from Eurocentric perspectives. This book is a timely contribution towards infusing Afrocentric perspectives in African scholarship by indigenous scholars. The authors' interdisciplinary topical approach, covering a gamut of topics ranging from African criminology, through mental health and psychology, to criminal justice systems, has lent a decolonizing voice toward African literary pursuit and thereby laid a solid foundation for further research by other scholars. I highly recommend it to readers, academic institutions and researchers

on Africa." - Emmanuel Onyeozili, Ph.D., Professor of Criminology and Criminal Justice, Department of Criminal Justice, University of Maryland Eastern Shore, USA "This edited volume by an array of experts from West and Southern Africa has given a refreshing voice to psycho-criminological narratives in the continent. In a region of the world in which there is insufficient documentation of the patterns, determinants and outcomes of criminal behaviour, this book offers a culturally competent and contemporary flavour to an ancient discourse. Its focus on new areas of concern such as online dating scams, kidnapping and the mental health of officials in the criminal justice system compellingly captures the potential reader and gives good value for time. It is warmly recommended for its breadth of coverage, the authority of its claims and the multi-disciplinary outlook of its authors." - Adegboyega Ogunwale, MBBS, FWACP, Consultant Psychiatrist, Forensic Unit, Neuropsychiatric Hospital, Aro, Ogun State, Nigeria "This collection represents a significant step in the study of mental health, crime and criminal justice in sub-Saharan Africa. The breadth of topics covered is impressive, with each contribution based on methodologically-sound empirical analyses. It deserves to become a key reference for students, researchers and policy makers interested in suicide, drug use, violence, the work of prison officers, criminal investigations, and police-community interactions." - Justice Tankebe, Ph.D., Lecturer, Institute of Criminology, University of Cambridge, UK "Mental health and criminal justice issues are growing problems facing the world today. Questions about whether mental health affects crime or whether involvement in the criminal justice system affects an individual's health have become part of national policy discussion. This nicely written book brings together eminent scholars and experts with extensive experience in their various fields to address these and other questions related to crime, mental health, and criminal justice in Africa. The editors did well to coordinate the efforts of the contributors into a valuable pierce. I highly recommend it for all who are interested in the nexus between crime, mental health, and criminal justice systems." - Francis D. This book brings together a selection of papers originally presented and discussed at the fourth international restorative justice conference, held at the University of Tübingen. The contributors include many of the leading authorities in the burgeoning field of restorative justice, and they provide a comprehensive review of developing international practice and directions, and the context in which restorative justice practices

are developing. Restorative Justice in Context moves beyond a focus on restorative justice for juveniles to a broader concern with the application of restorative justice in such areas as corporate crime, family violence and the application of restorative justice in cases of extreme violent crimes. The contexts examined are drawn from Europe, North America, Australasia and Japan. Leading world authorities analyse international case studies reflecting the growth of restorative justice worldwiderapidly expanding area of interest

TERRORISM AND TORTURE

BRILL

The Criminology of Criminal Law considers the relation between criminal law and theories of crime, criminality and justice. This book discusses a wide range of topics, including: the way in which white-collar crime is defined; new perspectives on stranger violence; the reasons why criminologists have neglected the study of genocide; the idea of boundary crossing in the control of deviance; the relation between punishment and social solidarity; the connection between the notion of justice and modern sentencing theory; the social reaction to treason; and the association between politics and punitiveness. Contributors include Bonnie Berry, Don Gottfredson, David F. Greenberg, Marc Riedel, Jason Rourke, Kip Schlegel, Vered Vinitzky-Seroussi, Leslie T. Wilkins, Marvin E. Wolfgang, and Richard A. Wright. The Criminology of Criminal Law concludes with an analysis of the results of a study on the most cited scholars in the Advances in Criminological Theory series. This work will be beneficial to criminologists, sociologists, and scholars of legal studies.

Advances in Criminological Theory is the first series exclusively dedicated to the dissemination of original work on criminological theory. It was created to overcome the neglect of theory construction and validation in existing criminological publications. *Criminology* Lexington Books

Advancing Critical Criminology constitutes a timely addition to the growing body of knowledge on critical criminology scholarship. DeKeseredy and Perry have assembled a volume that provides

scholars with an in-depth review of the extant literature on several major branches of criminology as well as examples of how critical criminologists apply their theoretical perspectives to substantive topics, such as drugs, interpersonal violence, and rural crime.

Textbook on Criminology Routledge

This book explores the ways in which criminological methods can be imaginatively deployed and developed in a world increasingly characterized by the blurred nature of social reality. Whilst recognizing the importance of positivist approaches and research techniques, it advocates a commitment to understanding the ways in which those techniques can be used imaginatively, at times in combination with less conventional methods, discussing the questions concerning risk, ethics and access that arise as a result. Giving voice to cutting edge research practices both in terms of concepts and methods that shift the criminological focus towards the kind of imaginative work that comprised the foundations of the discipline, it calls into question the utility and credentials of mainstream work that fails to serve the discipline itself or the policy questions allied to it. A call not to 'give up on numbers' but also not to be defined by statistics and the methods that produce them, Liquid Criminology sheds light on a way of doing research for criminology that is not only creative but also critical. As such, it will appeal to scholars of sociology, criminology and social policy with interests in research methods and design. *International Handbook of Penology and Criminal Justice* Routledge

Crime and Justice: a Guide to Criminology has been for many years a leading Australian textbook for undergraduate and postgraduate students approaching this subject for the first time. The contributors are well known research active academics in Australia who contribute to the criminological debate at national and international level. Fully revised and updated, this 5th edition offers a comprehensive guide in criminal justice and criminology that is well suited to a dual-semester approach. It covers a wide range of topics including: different forms of crimes .. from street crime to state crime and international crimes; who commits crimes and who are the victims of crimes; and how society responds to crime. This book offers a balance between critical and administrative criminological traditions to add to the discourse of crime and justice in the twenty-first century.

Published in 2009, the first edition of Forensic Victimology introduced criminologists and criminal investigators to the idea of systematically gathering and examining victim information for the purposes of addressing investigative and forensic issues. The concepts presented within immediately proved vital to social scientists researching victims-offender relationships; investigators and forensic scientists seeking to reconstruct events and establish the elements of a crime; and criminal profilers seeking to link pattern crimes. This is because the principles and guidelines in Forensic Victimology were written to serve criminal investigation and anticipate courtroom testimony. As with the

first, this second edition of Forensic Victimology is an applied presentation of a traditionally theoretical subject written by criminal justice practitioners with years of experience-both in the field and in the classroom. It distinguishes the investigative and forensic aspects of applied victim study as necessary adjuncts to what has often been considered a theoretical field. It then identifies the benefits of forensic victimology to casework, providing clearly defined methods and those standards of practice necessary for effectively serving the criminal justice system. 30% new content, with new chapters on Emergency Services, False Confessions, and Human Trafficking Use of up-to-date references and case examples to demonstrate the application of forensic victimology Provides context and scope for both the investigative and forensic aspects of case examination and evidence interpretation Approaches the study of victimology from a realistic standpoint, moving away from stereotypes and archetypes Useful for students and professionals working in relation to behavioral science, criminology, criminal justice, forensic science, and criminal investigation
