Organizations, like people, are creatures of habit. They tend to approach problems in predictable ways. This revolutionary book argues that such ingrained habits, which often masquerade as efficient procedures, actually obstruct growth. The 2,000 Percent Solution introduces "stall busting," a process that shows you how to recognize typical stalls (like poor communications, disbelief, misconceptions, procrastination, tradition and bureaucracy) and how to overcome them. Through unorthodox examples ranging from the sinking of the Titanic to sketches attributed to Leonardo da Vinci for a bicycle, The 2,000 Percent Solution redirects knee-jerk reactions onto more productive paths. In addition, you'll learn about a new set of thought processes for designing and implementing solutions that will reap benefits 20 times greater or faster than the same tired "normal" solutions. Packed with specific examples, advice and questions to help you improve your organization's process weaknesses, you'll learn how to go beyond today's best practices into the

uncharted realm of what needs to be imagined and accomplished. Since the first printing of this book in 1999, organizations all over the world have made The 2,000 Percent Solution a daily resource for overcoming the dual challenges of tough competitors and a difficult business environment. We are particularly pleased that the book has become popular in the rapidly growing and changing markets of China. Readers say the advice and examples are as timely today as when the book was first published. We look forward to hearing your comments and questions at mitchell@mitchellandco.com.

How to make money in stocks? First step: don't trade stocks. In a radical departure from most investment books, a former day trader demonstrates how a simple asset allocation strategy that 'adapts' to changing market conditions has delivered a 12% average annual return over the past 10 years. What does 12% mean? If you're familiar with investing basics, you'll know that figure comes close to doubling the average return of the benchmark S&P 500. It also outperforms 99% of all mutual funds. But what's outperformance without protection? When the S&P 500 crashed in 2008 and lost 37% of its value, this plan actually returned +10.9%. Beat the market with this unique ETF trading system. Beat The Street and build long-term wealth in the stock market with this simple ETF rotation strategy that automates decision making, reduces risk and volatility in your portfolio, and lets you sleep soundly at night without worries of market bears or bursting bubbles. A trading plan that's understandable, repeatable, that works and works simply. Anyone can do this. Whether you're new to stock market investing, or a stock trading veteran grown wary of Wall Street gurus with subpar track records touting the latest hot stock that underperforms the minute you buy it, this will make sense. In easy-to-understand language, you'll discover... The six index fund ETFs that power the strategy, and why. The simple technique for identifying which of those ETFs to buy, and which to sell -- and most importantly, when. How \$5,000 can end up \$1,000,000 in your retirement portfolio. How to protect your portfolio during market downturns with a simple cash trigger. In short, how to earn an average of 12% annually in the stock market with minimal trading, less volatility, and less risk. Make money trading without obsessing. Overthinking isn't a personality trait. It's the sneakiest form of fear. It steals time, creativity, and goals. It's the most expensive, least productive thing companies invest in without even knowing it. And it's an epidemic. When New York Times bestselling author Jon Acuff changed his life by transforming his overthinking, he wondered if other people might benefit from what he discovered. He commissioned a research study to ask 10,000 people if they struggle with overthinking too, and 99.5 percent said, "Yes!" The good news is that in Soundtracks, Acuff offers a proven plan to change overthinking from a super problem into a superpower. When we don't control our thoughts, our thoughts control us. If our days are full of broken soundtracks, thoughts are our worst enemy, holding us back from the things we really want. But the solution to overthinking isn't to stop thinking. The solution is running our brains with better soundtracks. Once we learn how to choose our soundtracks, thoughts become our best friend, propelling us toward our goals. If you want to tap into the surprising power of overthinking and give your dreams more time and creativity, learn how to DJ the soundtracks that define you. If you can worry, you can wonder. If you can doubt, you can dominate. If you can spin, you can soar.

"At last--a global plan that actually adds up."--James Hansen, former director, NASA Goddard Institute for Space Studies The world must reach negative greenhouse gas emissions by 2050 to avoid the most catastrophic effects of climate change. Yet no single plan has addressed the full scope of the problem--until now. In The 100% Solution, Solomon Goldstein-Rose--a leading millennial climate activist and a former Massachusetts state representative--makes clear what needs to happen to hit the 2050 target: the manufacturing booms we must spur, the moonshot projects we must fund, the amount of CO2 we'll have to sequester from the atmosphere, and much more. Most importantly, he shows us the more prosperous and equitable world we can build by uniting the efforts of activists, industries, governments, scientists, and voters to get the job done. This is the guide we've been waiting for. As calls for a WWII-scale mobilization intensify--especially among youth activists--this fully illustrated, action-oriented book arms us with specific demands, sets the stakes for what our leaders must achieve, and proves that with this level of comprehensive thinking we can still take back our future.

"Copyright law and contract language are complex, even for attorneys and experts. Authors may be tempted to sign the first version of a publication contract that they receive, especially if negotiating seems complicated, intimidating, or risky. But there is a lot at stake for authors in a book deal, and it is well worth the effort to read the contract, understand its contents, and negotiate for favorable terms. To that end, Understanding and Negotiating Book Publication Contracts identifies clauses that frequently appear in publishing contracts, explains in plain language what these terms (and typical variations) mean, and presents strategies for negotiating "author-friendly" versions of these clauses. When authors have more information about copyright and publication options for their works, they are better able to make and keep their works available in the ways they want"--Publisher.

An extensively illustrated appendix presents case studies of eleven Old Master prints that were treated using the techniques Schweidler discusses.

Millions of Americans use e-cigarettes. Despite their popularity, little is known about their health effects. Some suggest that e-cigarettes likely confer lower risk compared to combustible tobacco cigarettes, because they do not expose users to toxicants produced through combustion. Proponents of e-cigarette use also tout the potential benefits of e-cigarettes as devices that could help combustible tobacco cigarette smokers to quit and thereby reduce tobacco-related health risks. Others are concerned about the exposure to potentially toxic substances contained in e-cigarette emissions, especially in individuals who have never used tobacco products such as youth and young adults. Given their relatively recent introduction, there has been little time for a scientific body of evidence to develop on the health effects of e-cigarettes. Public Health Consequences of E-Cigarettes reviews and critically assesses the state of the emerging evidence about e-cigarettes and health. This report makes recommendations for the improvement of this research and highlights gaps that are a priority for future research.

Brian Kateman coined the term "Reductarian"—a person who is deliberately reducing his or her consumption of meat—and a global movement was born. In this book, Kateman, the founder of the Reductarian Foundation, presents more than 70 original essays from influential thinkers on how the simple act of cutting 10% or more of the meat from one's diet can transform the life of the reader, animals, and the planet. This book features contributions from such luminaries as Seth Godin, Joel Fuhrman, Victoria Moran, Jeffrey Sachs, Bill McKibben, Naomi Oreskes, Peter Singer, and others. With over 40 vegan, vegetarian, and "less meat" recipes from bestselling cookbook author Pat Crocker, as well as tons of practical tips for reducing the meat in your diet (for example, skip eating meat with dinner if you ate it with lunch; replace your favorite egg omelet with a tofu scramble; choose a veggie burrito instead of a beef burrito; declare a meatless day of the week), The Reductarian Solution is a life—not to mention planet!—saving book.
