Songs and Politics in Eastern Africa brings together important

essays on songs and politics in the region and beyond. Through an analysis of the voices from the margins, the authors (contributors) enter into the debate on cultural productions and political change. The theme that cuts across the contributions is that songs are, in addition to their aesthetic appeal, vital tools for exploring how political and social events are shaped and understood by citizens. Urbanization, commercialization and globalization contributed to the vibrancy of East African popular music of the 1990s which was marked by hybridity, syncretism and innovativeness. It was a product of social processes inseparable from society, politics, and other critical issues of the day. The lyrics explored social cosmology, worldviews, class and gender relations, interpretations of value systems, and other political, social and cultural practices, even as they entertained and provided momentary escape for audience members. Frustration, disenchantments, and emotional fatigue resulting from corrupt and dictatorial political systems that stifle the potential of citizens drove and still drive popular music in Eastern Africa as in most of Africa. Songs and Politics in Eastern Africa is

an important addition to the study of popular culture and its role in shaping society.

### HOPE IN ACTION

Guilford Publications

The treatment of early psychosis has been bedevilled by an entrenched pessimism, stemming from the asylum era and the Kraepelinian model of schizophrenia. More recently, however, there has been a surge of interest in preventively oriented treatment of patients showing the first signs of psychotic illness, with the realization that these illnesses are frequently highly responsive to early treatment. This is the first text to focus on the potential of early detection of psychosis, and the practicalities of treatment. Based on the pioneering experience and research of a now well-established prevention and intervention centre, and with contributions from international authorities, the book outlines a framework for intervention, reviews the evidence available to guide clinical practice, and describes models of treatment. Incorporating many personal narratives and case histories, it is strong on theory, sensitive on practical issues, and will challenge, inform and guide clinicians.

*Psychoeducation Manual for Bipolar Disorder* K G Saur Verlag GmbH & Company

This ambitious resource presents an inventive approach to integrating pediatric and mental health care based in comprehensive, family-centered service delivery. Its framework adds a problem-solving focus to the core principles of pediatric consultation-liaison psychiatry, emphasizing young patients' developmental, family, and social context. An international panel of expert clinicians explores the value of the mental health component in treating complex and chronic cases across varied settings, as well as practical considerations in implementing collaborative pediatric care systemwide, including at the global level. Detailed case histories illustrate skills and traits essential to making this problem-based approach work, such as multidimensional thinking, a prevention mentality, a dedication to lifelong learning, and empathy and respect for young clients and their families. Included in the coverage:

- Pediatric medicine for the child psychiatrist.
- Safety issues in a general medical facility setting.
- "Other medical" presentations and considerations in pediatric consultation-liaison psychiatry.
- Principles of biopsychosocial formulation and interventions in the pediatric medical setting.
- Preventive models for reducing major causes of morbidity and mortality in childhood.

Child and adolescent psychiatrists, child and school psychologists, and physicians in pediatrics, general practice, and family medicine will welcome *Pediatric Consultation-Liaison Psychiatry* as both a robust training text and a blueprint for the future of children's medicine.

Treatment of Personality Disorders Simon and Schuster

As fish must swim so must man drink and eat Titus Petronius Arbiter Examine thy customs of diet Francis Bacon For John eat & drank to drive away Loves pain But all he could do he grew thinner & thinner Tho he eat & drank as much as Ten men for dinner Some said he had a Wolf in his stomach day and night William Blake To paraphrase and cast in contemporary speech observations of the Gothic-era monk Bernard of Clairvaux, the eating disorders may be viewed as a corruption of the social process, a distortion of the body image, and a perversion of bodily processes. It is this multifactorial etiology that makes the diagnosis and treatment of dietary -disorders so difficult and frustrating. Because of social demands and a distorted (body) image, men and women have perverted the simple act of eating into always painful, sometimes tragic, and occasionally deadly outcomes. The eating disorders fall into three categories. There is obesity-the overconsumption of food, and its antithesis, anorexia-

the act of voluntary starvation. In true Hegelian fashion, there follows the synthesis, bulimia-the voluntary purging of overconsumed amounts of food to produce an anorectic-like countenance. As the contributing authors emphasize in their chapters, these diseases are not unique to contemporary culture. Rather they are cultural artifacts, created by both men and women, since classical antiquity. The recognition of these diseases is dependent upon recognizing a disease actually exists: that there is a distortion of the eating process.

### HEALTH IN PRISONS

Cambridge University Press

The Mclean Screening Instrument-BPD Is A 10-Item, Yes/No, Self-Report Patient Screening Scale. It Is Used With An Undiagnosed Population To Identify People Who Need Further Evaluation For BPD. The Scale Demonstrates Strong Sensitivity (The Degree To Which It Correctly Identifies Patients Who Do Have The Disorder), As Well As Strong Specificity (The Degree To Which It Correctly Identifies Patients Who Do Not Have The Disorder).

A Global, Healthcare Systems-Focused, and Problem-Based Approach Lavoisier

Updated for DSM-IV, the Structured Interview for DSM-IV Personality (SIDP-IV) is a semi-structured interview that uses nonpejorative questions to examine behavior and personality traits from the patient's perspective. The SIDP-IV is organized by topic sections rather than disorder to allow for a more natural conversational flow, a method that gleans useful information from related interview questions and produces a more accurate diagnosis. Designed as a follow-up to a general psychiatric interview and chart review that assesses episodic psychiatric disorders, the SIDP-IV helps the interviewer to more easily distinguish lifelong behavior from temporary states that result from an episodic psychiatric disorder. During the session, the interviewer can also refer to the specific DSM-IV criterion associated with that question set. In the event that the clinician decides to interview a third-party informant such as family members or close friends, a consent form is provided at the end of the interview. With this useful, concise interview in hand, clinicians can move quickly from diagnosis to treatment and begin to improve their patient's quality of life.

### HOMELESSNESS AND MENTAL HEALTH

African Books Collective

The Member States in the WHO European Region met at the WHO European Ministerial Conference on Mental Health in Helsinki in January 2005 to tackle one of the major threats to the well-being of Europeans: the epidemic of psychosocial distress and mental ill health. These countries took mental health from the shadow of stigma and discrimination and brought it to the centre of the public health policy arena. By adopting the Mental Health Declaration and Action Plan for Europe they set the course for mental health policy for the next 5-10 years. Member States now face the challenge of acting on the principles of the Declaration and accomplishing the goals in the Action Plan's 12 areas of work. This book contributes to the achievement of this task by describing the current situation in the Region presenting the texts of the Declaration and Action Plan offering brief discussions of the areas of work (with examples of initiatives already underway in each) and describing WHO's plans to assist Member States in improving mental health in the European Region.

### LE BLESSÉ PAR ATTENTAT TERRORISTE

Academic Press

A reference guide to autism spectrum disorders that provides an in-depth overview of the communication, language, social, and

behavioral issues of autism spectrum disorders.

**Psychiatrie de l'enfant** American Psychiatric Pub

As research emerges on the effectiveness of psychological therapies for bipolar disorder, this is the first manual guiding the treatment of those in adolescence and early adulthood, taking into account the developmental issues which can have significant impact on therapeutic outcomes. Core issues covered include engagement difficulties, how cognitive therapy should be adapted for adolescents, the impact of the disorder on the person's psychosocial development, managing comorbidity (particularly alcohol and substance use), medication adherence, the impact of family dynamics, and issues around control and independence in the therapeutic relationship. The manual is illustrated with case studies and text boxes describing tips and techniques for the therapist. Providing clear clinical guidance, backed by an extensive literature review and theoretical overview, this is essential reading for all mental health specialists implementing psychological interventions for young people with bipolar disorder.

### MODELS OF CLINICAL INTERVENTION WITH INFANTS AND THEIR FAMILIES

Routledge

School is starting in the forest, but Chester Raccoon does not want to go. To help ease Chester's fears, Mrs. Raccoon shares a family secret called the Kissing Hand to give him the reassurance of her love any time his world feels a little scary. Since its first publication in 1993, this heartwarming book has become a children's classic that has touched the lives of millions of children and their parents, especially at times of separation, whether starting school, entering daycare, or going to camp. It is widely used by kindergarten teachers on the first day of school. Stickers at the back will help children and their parents keep their Kissing Hand alive.

**The Eating Disorders** WHO Regional Office Europe

Clinical staging is a solution to transform psychiatric diagnosis and improve mental health outcomes.

### THE OXFORD HANDBOOK OF SOCIAL NEUROSCIENCE

Brookes Pub

Numerical Methods and Advanced Simulation in Biomechanics and Biological Processes covers new and exciting modeling methods to help bioengineers tackle problems for which the Finite Element Method is not appropriate. The book covers a wide range of important subjects in the field of numerical methods applied to biomechanics, including bone biomechanics, tissue and cell mechanics, 3D printing, computer assisted surgery and fluid dynamics. Modeling strategies, technology and approaches are continuously evolving as the knowledge of biological processes increases. Both theory and applications are covered, making this an ideal book for researchers, students and R&D professionals. Provides non-conventional analysis methods for modeling Covers the Discrete Element Method (DEM), Particle Methods (PM), MeshLess and MeshFree Methods (MLMF), Agent-Based Methods (ABM), Lattice-Boltzmann Methods (LBM) and Boundary Integral Methods (BIM) Includes contributions from several world renowned experts in their fields Compares pros and cons of each method to help you decide which method is most applicable to solving specific problems

An Observational and Psychoanalytic Study Springer

Essentials of WAIS®-IV Assessment: Complete coverage of administration, scoring, interpretation, and reporting Expert advice on avoiding common pitfalls Conveniently formatted for rapid reference Quickly acquire the knowledge and skills you need to confidently administer, score, and interpret the WAIS®-IV

Coauthored by Alan Kaufman, who was mentored by David Wechsler, the creator of the Wechsler scales, Essentials of WAIS®-IV Assessment provides beginning and seasoned clinicians with comprehensive step-by-step guidelines to administering, scoring, and interpreting this latest revision of the Wechsler Adult Intelligence Scale®. Like all the volumes in the Essentials of Psychological Assessment series, this book is designed to help busy mental health practitioners quickly acquire the basic knowledge and skills they need to make optimal use of a major psychological assessment instrument. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as test questions that help you gauge and reinforce your grasp of the information covered. Offering a clinically rich and innovative theory-based interpretive system, as well as a neuro-psychologically based interpretive approach articulated in detail by Dr. George McCloskey in an invited chapter, this book offers state-of-the-art interpretation of the most popular intelligence test for adults. In addition, the book is packaged with an accompanying CD-ROM containing scoring tables, case report material, worksheets, and a user-friendly software program that fully automates the interpretive system, making Essentials of WAIS®-IV Assessment the best and most authoritative resource of information on this test. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

**The Transdiagnostic Road Map to Case Formulation and Treatment Planning** Cambridge University Press

'How are you today?' the doctor asked. 'I'm fine', was the reply.

'But Sybil isn't. She was so sick she couldn't come. So I came instead.' Sybil is the story of a woman with sixteen separate personalities, and was instrumental in influencing the definition and diagnosis of multiple personality disorder. Sybil's diagnosis has since been called into question - but, forty years after it was first published, her story remains a gripping and disturbing account of one woman's struggle for mental stability and happiness. 'Astonishing book . . . It forces you to look at yourself and the people around you in a new way.' Doris Lessing

Making sense of people's problems John Wiley & Sons

[There has been an] extraordinary shift in how we understand and treat psychosis, none more so than in the arena of Early Intervention (EI) bringing with it new hope for young people with emerging psychosis and their families. From the introduction to the book Centred around the Early Psychosis Declaration (EPD), this book explores the declaration's five themes through contributions from a sizeable number of mental health practitioners, service-users and carers. It is designed to help those working with people experiencing psychosis at an early stage of illness to develop and implement effective early intervention skills, enabling them to examine and refine their practice. Most importantly, the book is a practical guide to delivering early intervention strategies with a unique focus on recovery. Includes an abundance of case studies to link theory to practice Evidence-based Edited by a team with a wealth of clinical and research experience Suitable for qualified practitioners from all disciplines working in the Early Intervention field, including mental health nurses, psychiatrists, social workers, occupational therapists, clinical psychologists and lecturer/practitioners

*The Kissing Hand* John Wiley & Sons

Getting Better Bite by Bite is an essential, authoritative and evidence-based self-help program that has been used by bulimia sufferers for over 20 years. This new edition maintains the essence of the original book, while updating its content for today's readers, drawing on the latest knowledge of the biology and psychology of bulimia and its treatment. The book provides step-by-step guidance for change based on solid research. The

use of everyday language, stimulating contemporary case study story-telling and evocative illustrations in *Bite by Bite* provide encouragement, hope and new perspectives for all readers. This handy-sized book fills a need for easy-to-understand information about Bulimia Nervosa, a serious and prevalent eating disorder. Ulrike Schmidt and Janet Treasure are world-renowned researchers and authorities on eating disorders, and June Alexander, a former sufferer of anorexia and bulimia, is a respected writer and internationally-known eating disorder awareness advocate. *Getting Better Bite by Bite* is a valuable resource - for sufferers, for their families, and for the health professionals and carers treating them.

Based on the experience of many countries in the WHO European Region and the advice of experts, this guide outlines some of the steps prison systems should take to reduce the public health risks from compulsory detention in often unhealthy situations, to care for prisoners in need and to promote the health of prisoners and prison staff. This requires that everyone working in prisons understand how imprisonment affects health, what prisoners' health needs are, and how evidence-based health services can be provided for everyone needing treatment, care and prevention in

prison. Other essential elements are being aware of and accepting internationally recommended standards for prison health; providing professional care with the same adherence to professional ethics as in other health services; and, while seeing individual needs as the central feature of the care provided, promoting a whole-prison approach to care and promoting the health and well-being of people in custody.

Routledge

The first edition of *Formulation in Psychology and Psychotherapy* caught the wave of growing interest in formulation in a clinical context. This completely updated and revised edition summarises recent practice, research, developments and debates while retaining the features that made the first a leading text in the field. It contains new chapters on personal construct formulation, formulation in health settings, and the innovative practice of using formulation in teams. The book sees formulation as a dynamic process which explores personal meaning collaboratively and reflectively, taking account of relational and social contexts. Two case studies, one adult and one child, illustrate the use of formulation from the perspectives of expert clinicians from six different theoretical positions. The book encourages the reader to take a constructively critical perspective on the many philosophical, professional and ethical debates raised by the process of formulating people's problems. Among the issues explored are: The social and political context of formulation  
Formulation in relation to psychiatric diagnosis  
The limitations of formulation  
Controversies and debates about formulation  
This readable and comprehensive guide to the field provides a clear, up to date and thought-provoking overview of formulation from a number of perspectives, essential for clinicians working in all areas of mental health and social care, psychology, therapy and counselling.
