These unique projects for making working locks entirely from wood will present an exciting challenge to woodworkers. "The Big Book of Wooden Locks" presents all of the most popular wooden lock projects of Tim Detweiler, the "Lock Man," from his first two books. Detweiler's beautiful and complex wooden lock designs have captivated woodworkers around the world. These amazing projects are all fully functional and are constructed entirely in wood, with no metal parts. Step-by-step instructions, complete dimensioned drawings, and color photographs give readers complete information on constructing each project. These intricate designs will challenge readers' woodworking skills, teach techniques for creating wooden mechanisms and puzzles, and produce impressive, beautiful creations that testify to the builder's skill and woodworking accomplishments. From a simple warded lock with key to a

complex push-button combination lock, these projects are fantastic conversation starters and make highly impressive gifts. *A Physical Penetration Tester's Training Guide*

**The Big Book of Wooden Locks**

Forensic Investigation of Stolen-Recovered and Other Crime-Related Vehicles provides unique and detailed insights into the investigations of one of the most common crime scenes in the world. In addition to a thorough treatment of auto theft, the book covers vehicles involved in other forms of crime—dealing extensively with the various procedures and dynamics of evidence as it might be left in any crime scene. An impressive collection of expert contributors covers a wide variety of subjects, including chapters on vehicle identification, examination of burned vehicles, vehicles recovered from under water, vehicles involved in terrorism, vehicle tracking, alarms, anti-theft systems, steering columns, and ignition

locks. The book also covers such topics as victim and witness interviews, public and private auto theft investigations, detection of trace evidence and chemical traces, vehicle search techniques, analysis of automotive fluids, vehicle registration, document examination, and vehicle crime mapping. It is the ultimate reference guide for any auto theft investigator, crime scene technician, criminalist, police investigator, criminologist, or insurance adjuster. Extensively researched and exceptionally well-written by internationally-recognized experts in auto theft investigation and forensic science All the principles explained in the text are well-illustrated and demonstrated with more than 450 black and white and about 100 full-color illustrations, many directly from real cases Serves as both a valuable reference guide to the professional and an effective teaching tool for the forensic science student

Books and Pamphlets, Including Serials and Contributions to Periodicals
