There are few industries in which decisions are so intently scrutinized by millions of Canadians as the healthcare industry. Each day important decisions concerning the funding and delivery of healthcare are made far from the patient's bed, in the offices of administrators and policy makers. These decisions can have considerable impact on the lives of patients and the practice of healthcare professionals. Whether you are a seasoned executive or an entry-level manager, Administration Ethics is intended to assist you in rendering effective and ethical decisions. Brimming with engaging examples, this text provides a practical guide to understanding the essential but often challenging areas of ethics theories, principles, codes, and rights, and insightfully illustrates how these concepts are integrated. Administration Ethics goes beyond academic debate and enters the daily practice of health administration. It examines the psychology of decision making, revealing how we sometimes make well-intentioned, but unethical decisions. Each chapter includes illustrative cases pertinent to the ethical management and policy decisions required of healthcare administrators. Featuring a new, user-friendly decision model and designed specifically with the Canadian healthcare system in mind, this volume will be an indispensable resource for both current and future healthcare administrators in Canada.

This book explores new approaches and strategies that luxury fashion brands could adopt in their operations toward sustainability goals. It addresses the unique challenges faced by luxury fashion brands, given that concepts of luxury and sustainability may be conflicting. In doing so, it elaborates on how fashion brands need to manage their suppliers to comply with and improve social and environmental conditions, the pressure to fulfill the triple-bottom lines, consumer demands for transparency, and social media and its advantages in achieving sustainability goals. Exploring the notion that luxury fashion brands are in a better position to pursue superior sustainability performance, it presents research that highlights how the consequences of non-compliance could have more devastating effects on luxury brands than on mass-market brands. The book is a valuable resource for academics and practitioners in the field of business, sustainability, and fashion.

Given the popular-level conversations on phenomena like the Gospel of Thomas and Bart Ehrman's Misquoting Jesus, as well as the current gap in evangelical scholarship on the origins of the New Testament, Michael Kruger's *Canon Revisited* meets a significant need for an up-to-date work on canon by addressing recent developments in the field. He presents an academically rigorous yet accessible study of the New Testament canon that looks deeper than the traditional surveys of councils and creeds, mining the text itself for direction in understanding what the original authors and audiences believed the canon to be. *Canon Revisited* provides an evangelical introduction to the New Testament canon that can be used in seminary and college classrooms, and read by pastors and educated lay leaders alike. In contrast to the prior volumes on canon, this volume distinguishes itself by placing a substantial focus on the theology of canon as the context within which the historical evidence is evaluated and assessed. Rather than simply discussing the history of canon—rehashing the Patristic data yet again—Kruger develops a strong theological framework for affirming and authenticating the canon as authoritative. In effect, this work successfully unites both the theology and the historical development of the canon, ultimately serving as a practical defense for the authority of the New Testament books.

*Law and Mental Health: International Perspectives, Volume 3* considers the jurisprudence and models of legislation concerning public mental health that suit the particular requirements of different

cultural and geographical regions. This book is composed of five chapters and begins with the major accomplishment both for Dutch legal psychiatry and for the English language audience, followed by a survey of the civil dimensions of the forensic system. The next chapter tackles the primary variables in assessing terrorism, including the social, political, religious, and economic factors, which, coupled with highly complex variables of psychological predisposition, can give some guarded inroads with respect to the limits of the knowledge in predicting and reacting to terrorist incidents. These topics are followed by discussions on the techniques for assessment designed for the differentiated legal questions in criminal, civil, and juvenile and family law. A chapter focuses on the measured assessments of the parameters of the professional knowledge about the nature of dangerous behavior based on clinical and research investigation. The final chapter contains a precise summary of the research that is to be done on a spectrum of techniques for assessing malingering. Mental health workers, forensic experts, and policy makers will find this book invaluable.

This third volume, with three supporting editors, broadens its focus on genetic eye research from the Asian to the global scale. New efforts and a new awareness have sparked important discussions on genetic eye research, and new plans are being implemented to identify the genes responsible for numerous eye diseases. The book introduces the latest findings on genetics in eye diseases, gene therapy, and genome-wide association analysis,

and the efforts of the Global Eye Genetic Consortium (GEGC). The book's editors have been instrumental in developing strategies for discovering the new genes involved in many eye diseases. All chapters were written by leading researchers working on eye genetics from the fields of Human Genetics, Ophthalmology, Molecular Biology, Biochemistry, Sensory Sciences, and Clinical Research. *Advances in Vision Research, Volume III* is a major resource for all researchers, clinicians, clinical researchers, and allied eye health professionals with an interest in eye diseases around the globe.

In order to succeed in a construction business, you have to be able to price your jobs to cover all labor, material and overhead expenses, and make a decent profit. But calculating markup is only part of the picture. If you're going to beat the odds and stay in business -- profitably, you also need to know how to write good contracts, manage your crews, work with subcontractors and collect on your work. This book covers the business basics of running a construction company, whether you're a general or specialty contractor working

in remodeling, new construction or commercial work. The principles outlined here apply to all construction-related businesses. You'll find tried and tested formulas to guarantee profits, with step-by-step instructions and easy-to-follow examples to help you learn how to operate your business successfully. Includes a link to free downloads of blank forms and checklists used in this book.

Canon Revisited Springer Nature Engaging, comprehensive coverage presents the most current issues and communication concepts. Fully adapted content reflects Canada's unique health care context and cultural landscape. Canadian statistics, research, references and resources, guidelines, assessment and screening tools, and more are incorporated throughout the text. Canadian cultural and demographic considerations address issues related to race/ethnicity, Indigenous peoples, gender identity, LGBTQ2 community, family composition, recent immigrants, refugees, and vulnerable persons. Engaging with Humility: Authentic Interpersonal Communication in Partnership with Indigenous Peoples chapter increases awareness and knowledge of the impact of colonization on Indigenous peoples, in order to understand and develop practices which respectfully engage in cultural safety and humility through holistic communication with Indigenous peoples and communities. Rich art programme reflects Canada's cultural diversity in the health care setting. Emphasis on collaborative communication includes related evidence-informed case studies and analysis. Socio-cultural communication competencies coverage discusses how to reduce health disparities and increase health literacy.

Questions for Review and Discussion help students practise their reflective analysis skills and provide opportunities for thoughtful review of chapter content. Content on social media and transitional care delivery reflects current practice standards. Simulation exercises enable students to practise, observe, and critically evaluate their professional communication skills in a safe learning environment. Case examples help students learn to develop empathy for patients' perspectives and needs. Discussion of spirituality and end-of-life needs focuses on trust, empathy, and the nurse-patient relationship — all central components of holistic nursing. Nursing, behavioural, developmental, family, and communication theories provide an essential foundation and a theoretical perspective for effective communication. Ethical Dilemma boxes with reflection questions at the end of each chapter help students absorb and retain key ethical content throughout the text. Evidence-Informed Nursing Practice boxes in each chapter offer a summary of research findings related to the chapter subject and are intended to strengthen awareness of the link between research and practice. Separate chapters on communication across the lifespan highlight crucial communication tools that are the first step in developing a culture of safety in contemporary health care delivery.

Canada Revisited 7  
In *Inequality in Canada* Eric Sager considers one of the defining – but hardest to define – ideas of our era and traces its different meanings and contexts across the nineteenth and twentieth centuries. Sager shows how the idea of inequality arose in the long evolution in Britain and the United States from classical economics to the emerging welfare economics of the twentieth century. Within this transatlantic frame, inequality took a distinct form in Canada: different iterations of the idea appear in Protestant critiques of wealth, labour movements, farmer-progressive politics, the social gospel, social Catholicism in Quebec, English-Canadian political economy, and political and intellectual justifications of the social security state. A tradition of idealist thought persisted in the twentieth century, sustaining the idea of inequality despite deep silences among Canadian economists. Sager argues that inequality goes beyond the distribution of income and wealth: it is the idea that there are wide gaps between rich and poor, that the gaps are both an economic problem and a social

injustice, and that when inequality appears, it is as a problem that can be either eliminated or reduced. It is precisely because inequality appears in different contexts, and because it changes, Sager reasons, that we can begin to perceive the contours and cleavages of inequality in our time. In our century, a political solution to inequality may rest on the recovery of an ethical ideal and egalitarian politics that have long preoccupied the history of Canadian thought.

What too few people realize is that, as Andre Picard writes in his Foreword to *Redistributing Health*, "social justice--or lack thereof has a greater impact on the health of the population than the human genome, lifestyle choice, and medical treatment." The truth is that things like poverty, social exclusion, lack of meaningful employment, and lack of access to education or good housing contribute significantly to ill health in Canada--and none of these will be

remedied by doctors or hospitals or pill bottles.

Advances in Vision Research, Volume III  
John Wiley & Sons

A positive agenda for achieving the Sustainable Development Goals by 2030. All 193 member nations of the United Nations agreed in September 2015 to adopt a set of seventeen "Sustainable Development Goals," to be achieved by 2030. Each of the goals—in such areas as education and health care—is laudable in and of itself, and governments and organizations are working hard on them. But so far there is no overall, positive agenda of what new things need to be done to ensure the goals are achieved across all nations. In a search of fresh approaches to the longstanding problems targeted by the Sustainable Development Goals, the Japan International Cooperation Agency and the Global Economy and Development program at Brookings mounted a collaborative research effort to advance implementation of Agenda 2030. This edited volume is the product of that effort. The book approaches the UN's goals through three broad lenses. The first considers new approaches to capturing value. Examples include Nigeria's first green bonds, practical methods to expand women's economic opportunities, benchmarking to reflect business contributions to achieving the goals, new incentives for investment in infrastructure, and educational systems that promote cross-sector problem solving. The second lens entails new approaches to targeting places, including oceans, rural areas, fast-growing developing cities, and the interlocking challenge of data systems, including geospatial information generated by satellites. The third lens focuses on updating governance,

broadly defined. Issues include how civil society can align with the SDG challenge; how an advanced economy like Canada can approach the goals at home and abroad; what needs to be done to foster new approaches for managing the global commons; and how can multilateral institutions for health and development finance evolve.
