GENE THERAPY FOR DISEASES OF THE LUNG

Brooklands Books Limited

The first biography in a decade of Afghan resistance leader Ahad Shah Massoud. When the Soviets invaded Afghanistan in 1979, the forces of resistance were disparate. Many groups were caught up in fighting each other and competing for Western arms. The exception were those commanded by Ahmad Shah Massoud, the military strategist and political operator who solidified the resistance and undermined the Russian occupation, leading resistance members to a series of defensive victories. Sandy Gall followed Massoud during Soviet incursions and reported on the war in Afghanistan, and he draws on this first-hand experience in his biography of this charismatic guerrilla commander. Afghan Napoleon includes excerpts from the surviving volumes of Massoud's prolific diaries--many translated into English for the first time--which detail crucial moments in his personal life and during his time in the resistance. Born into a liberalizing Afghanistan in the 1960s, Massoud ardently opposed communism, and he rose to prominence by coordinating the defense of the Panjshir Valley against Soviet offensives. Despite being under-equipped and outnumbered, he orchestrated a series of victories over the Russians. Massoud's assassination in 2001, just two days before the attack on the Twin Towers, is believed to have been ordered by Osama bin Laden. Despite the ultimate frustration of Massoud's attempts to build political consensus, he is recognized today as a national hero.

Aidid Mukhlis - Berpelajaran tinggi dan mempunyai kerjaya yang bagus. Dari kecil sudah menetap di luar negara membuatkan jiwanya seakan hilang rasa cinta pada kampung halaman. Akhirnya kerana dipaksa, dia pulang juga tanpa rela. Nurul Liyana - Dia hanya gadis biasa. SPM pun setakat cukup makan. Memang dia dalam kategori bukan pelajar cerdas tapi jiwanya besar. Cintanya pada tanah air cukup menebal. Bila bertemu, mereka sentiasa berlaga angin. Seorang serius bukan main. Yang seorang lagi, nakalnya! Nauzubillah. "Macamlah bagus sangat Kota London dia tu," ejek Liyana penuh jengkel. "Memang bagus pun," jawab Aidid dengan nada yang menyakitkan hati. "Apa yang bagus sangat? Apa yang London ada, Malaysia tak ada? Cer cite....cer cite." Liyana melawan kata-kata Aidid. "Yang bagusnya, kat London tu tak ada mulut mak nenek macam kau!" Hmm....asyik bertekak sahaja Mr. London dan Ms. Langkawi ini. Kata orang, perbezaan akan mewujudkan keserasian. Tetapi adakah keserasian akan wujud dalam jiwa Aidid Mukhlis dan Nurul Liyana?

The fifth edition of Numerical Methods for Engineers with Software and Programming Applications continues its tradition of excellence. The revision retains the successful pedagogy of the prior editions. Chapra and Canale's unique approach opens each part of the text with sections called Motivation, Mathematical Background, and Orientation, preparing the student for what is to come in a motivating and engaging manner. Each part closes with an Epilogue containing sections called Trade-Offs, Important Relationships and Formulas, and Advanced Methods and

Additional References. Much more than a summary, the Epilogue deepens understanding of what has been learned and provides a peek into more advanced methods. Users will find use of software packages, specifically MATLAB and Excel with VBA. This includes material on developing MATLAB m-files and VBA macros. Also, many, many more challenging problems are included. The expanded breadth of engineering disciplines covered is especially evident in the problems, which now cover such areas as biotechnology and biomedical engineering

This is the story of the little known Kiwi mechanic - Kim Newcombe - who, in 1973, came second in the 500cc grand prix motorcycle championships. Kim Newcombe was a rider who risked it all, reached the top - then lost it all. Killed in a crash at Stowe Corner, Silverstone, 12 August, 1973. New Zealander Newcombe had come to Europe on an overseas adventure, finding a home in West Berlin working as an engineer for Konig, the outboard and hydroplane specialists. Newcombe became the test rider. Newcombe subsequently won the Yugoslavian GP and topped the 500GP table. Then came Silverstone. Newcombe's achievements were singular and remarkable and his story offers an unique insight into the world of grand prix racing in the early seventies.

Grid-Scale Energy Storage Systems and Applications provides a timely introduction to state-of-the-art technologies and important demonstration projects in this rapidly developing field. Written with a view to real-world applications, the authors describe storage technologies and then cover operation and control, system integration and battery management, and other topics important in the design of these storage systems. The rapidly-developing area of electrochemical energy storage technology and its implementation in the power grid is covered in particular detail. Examples of Chinese pilot projects in new energy grids and micro grids are also included. Drawing on significant Chinese results in this area, but also including data from abroad, this will be a valuable reference on the development of grid-scale energy storage for engineers and scientists in power and energy transmission and researchers in academia. Addresses not only the available energy storage technologies, but also topics significant for storage system designers, such as technology management, operation and control, system integration and economic assessment. Draws on the wealth of Chinese research into energy storage and describes important Chinese energy storage demonstration projects. Provides practical examples of the application of energy storage technologies that can be used by engineers as references when designing new systems.
