Medieval Art Ingram
New edition of a two-volume text that balances formalist traditions with the newer interests of contextual art history. Reaching beyond the West to include a critical examination of the arts of other regions and cultures, it covers not only paintings and sculpture

but also architecture, drawings, photographs, works in metal and ceramics, textiles, and jewelry. Attractively designed and illustrated with about 1,350 color and bandw white photographs, as well as hundreds of line drawings that include architectural plans and cutaways. Oversize: 9x12". The Getty Museum's collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in English and Italian editions), the text is here organized first by national school, then

alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography.

Art of the Non-Western World Fairchild Books
 Since it first appeared in 1968, *History of Modern Art* has emphasized the unique formal properties of artworks, and the book has long been recognized

for the acuity of its visual analysis.

ART HISTORY provides students with the most student-friendly, contextual, and inclusive art history survey text on the market. These hallmarks make ART HISTORY the choice for instructors who seek to actively engage their students in the study of art. This new edition of ART HISTORY is the result

of a happy and productive collaboration between two scholar-teachers (Marilyn Stokstad and Michael Cothren) who share a common vision that survey courses on the history of art should be filled with as much enjoyment as erudition, and that they should foster an enthusiastic, as well as an educated, public for the visual arts. Like its predecessors, this new edition seeks to balance formal and iconographic analysis with contextual art history in order to craft

interpretations that will engage a diverse student population. Throughout the text, the visual arts are treated as part of a larger world, in which geography, politics, religion, economics, philosophy, social life, and the other fine arts are related components of a vibrant and cultural landscape.

This collection offers an expansive, multiplatform exploration of the rapidly-

expanding area of motion design and motion graphics, taking into account both theoretical questions and creative professional practice. Spanning interaction design, product interfaces, kinetic data visualizations, typography, TV and film title design, brand building, narrative storytelling, history, exhibits and environments, editors R. Brian Stone and Leah Wahlin offer an interdisciplinary range of academic essays and

professional interviews that together form a dialogue between motion design theory and professional practice. Written for both those critically engaged with motion design as well as those working or aspiring to work professionally in the field, the book features a range of international contributors and interviews with some of the best-known designers in the field, including Kyle Cooper, Karin Fong, and Daniel Alenquer. The Theory and Practice of Motion Design

seeks to illuminate the diverse, interdisciplinary field of motion design by offering a structured examination of how motion design has evolved, what forces define our current understanding and implementation of motion design, and how we can plan for and imagine the future of motion design as it unfolds. An accompanying online resource site, www.motionresource.com, contains visual representations of the examples described in the

text.

 In this bracing engagement with the many versions of art history, James Elkins argues that the story of modernism and postmodernism is almost always told in terms of four narratives. Works of art are either seen as modern or postmodern, or praised for their technical skill or because of the politics they appear to embody. These are master narratives of contemporary criticism,

and each leads to a different understanding of what art is and does. Both a cogent overview of the state of thinking about art and a challenge to think outside the art historical box, *Master Narratives and their Discontents* is the first volume in a series of short books on the theories of modernism by leading art historians on twentieth-century art and art criticism. *Real Spaces* Getty Publications
 Surveys the history of art, including painting, sculpture, architecture,

and photography, from cave paintings to modern art.

Recent scandals and controversies, such as data fabrication in federally funded science, data manipulation and distortion in private industry, and human embryonic stem cell research, illustrate the importance of ethics in science. Responsible Conduct of Research, now in a completely updated second edition, provides an introduction to the

social, ethical, and legal issues facing scientists today.

This book provides, from a critical perspective, a first contact with the key debates and authors who, over the last 2,500 years, have tried to define, study and evaluate the arts in the west, as well as tell their stories so as to highlight Europe's outstanding achievements and supposed civilizational mission. It shows and deconstructs how the western theories

and stories on different media - theatre, sculpture, literature, painting, photography, performance art, contemporary art, etc. - repeat and vary certain fixed ideas in diverse disciplines - from philosophy to media studies - so as to deal with and often repress arts' power. By drawing on texts from recent picture and image theory, as well as on present-day Amerindian authors, anthropologists and philosophers, this introductory panoramic

survey argues for the need to question the power structure inherent in Eurocentric art discourses and to decolonise art studies, using Brazil's arts, its theory and history as a case study to do so.
