 Studio Hibernate This topic covers the  
 process for creating the hibernate.cfg.xml  
 file in a Java project using the JBoss  
 Developer Studio. Procedure 10.3. Task.  
 Open a Java project in the JBoss Developer  
 Studio. Right click the project root  
 directory in the Project Explorer panel.  
 Select ...10.2.3.4. Create the Hibernate  
 Configuration File in JBoss ...The hibernate-  
 tools.jar file, available from  
 tools.hibernate.org, contains the core code  
 for Hibernate Tools™. It is used as the  
 basis for both the Ant tasks described in  
 this document and the Eclipse plugins  
 available as part of JBoss Developer  
 Studio. The hibernate-tools.jar file is  
 located in your Eclipse plugins directory at  
 /plugins/org.hibernate.eclipse.x.x.x/lib/tool  
 s/hibernate-tools.jar. Chapter 5. Ant Tools -  
 JBoss Type the following command to build  
 the artifacts. \$ mvn clean package wildfly:  
 deploy. This deploys the  
 hibernate/target/hibernate.war to the  
 running instance of the server. You should  
 see a message in the server log indicating

that the archive deployed successfully.  
 Access the Application.hibernate | Red Hat  
 Developer Hibernate Tools have been part  
 of JBoss Developer Studio for a long time -  
 now they are integrated with Dali - and  
 you can use Dali's JPA Generate Entities  
 from Tables feature. This video walks you  
 through how to setup the Hibernate  
 Configuration and the JDBC connection to  
 allow for JPA entity generation.5.  
 Hibernate Tools for DB Reverse  
 Engineering on Vimeo Now, it's time to  
 write some JPA queries using the  
 Hibernate perspective in JBoss Developer  
 Studio. In the upper right corner of the  
 workbench there is a small icon (see the  
 figure below), click on it and choose
