language competences of students. It can take several forms, including English for Specific Purposes (ESP) and Academic English (AE). The objectives of ESP courses in higher education are to prepare students for their professional lives by developing communicative language skills. Content and Language Integrated Learning (CLIL) methodology offers the potential to

combine the learning of a foreign language with the content of professional subjects. Moreover, it also offers a new dimension in thinking and deepening foreign language competences within non-linguistic subjects. These aspects contribute towards ELT modernization with the aim of developing a learner's autonomy and building bridges between educational institutions

and the professional world. This book focuses on applying CLIL methodology within the context of ESP classes, highlighting the possible benefits that might be applicable in any higher educational institution.

English for Specific Purposes
Springer
Designed for pre-service teachers and teachers new to the field of ELT, *What English Teachers Need to Know* Volumes I, II,

and III are companion textbooks organized around the key question: What do teachers need to know and be able to do in order for their students to learn English? In the Second Edition of Volume I, Murray and Christison return to this essential question and call attention to emerging trends and challenges affecting the contemporary classroom. Addressing new skills and strategies that

EFL teachers require to meet the needs of their shifting student populations who are impacted by changing demographics, digital environments, and globalization, this book, which is grounded in current research, offers a strong emphasis on practical applications for classroom teaching. This updated and expanded Second Edition features a new chapter

on technology in TESOL new and updated classroom examples throughout discussions of how teachers can prepare for contemporary challenges, such as population mobility and globalization. The comprehensive texts work for teachers across different contexts—where English is the dominant language, an official language, or a foreign language; for different levels—eleme

ntary/primary, secondary, university, or adult education; and for different learning purposes—general English, workplace English, English for academic purposes, or English for specific purposes. *Integrating Information and Communication Technologies in English for Specific Purposes* Routledge I first used the Internet in fall 1993, as a Fulbright

Scholar at Charles University in Prague. I immediately recognized that the Internet would radically transform second language teaching and learning, and within a year had written my first book on the topic, *E-Mail for English Teaching*. The book galvanized a wave of growing interest in the relationship of the Internet to language learning, and was soon followed by

many more books on the topic by applied linguists or educators. This volume, though, represents one of the first that specifically analyzes the relationship of new technologies to the teaching of languages for specific purposes (LSP), and, in doing so, makes an important contribution. The overall impact of information and communication technology

(ICT) on second language learning can be summarized in two ways, both of which have special significance for teaching LSP. First, ICT has transformed the context of language learning. The stunning growth of the Internet—resulting in 24 trillion email messages sent in 2005, and more than 600 billion Web pages and 50 million blogs online in the same year—has helped make

possible the development of English as the world's first global language. *Introducing Course Design in English for Specific Purposes* Routledge This edited book focuses on current practices, challenges and innovations in the emerging field of English for Specific Purposes (ESP). By combining diverse, empirically-proven and innovative ESP practices from all over the world with

inspiring theoretical input and reflections from experienced practitioners, the authors in this volume examine both best-practice examples and ESP programmes which by various metrics are deemed to have failed. This book will be of interest to practitioners, teacher educators and researchers working in the field of ESP, as well as readers interested in language

education and curriculum development more broadly.

ENGLISH FOR SPECIFIC PURPOSES

Cambridge University Press

This book provides a practical and accessible update of major developments in ESP today.

Developments in English for Specific

Purposes A&C Black

This book proposes a new paradigm for English language teaching based on

concepts from English for Specific Purposes (ESP) research and applications as well as from growing evidence relating pattern recognition to language learning ability. The contributors to the volume argue that learners should not try to become proficient all-around users of 'idealistic native-like' English, but instead should be realistic about what they need to acquire and

how to go about achieving their specific goals. The book discusses the present situation by describing the status quo of English language education in Japan, taking into consideration recent trends of CLIL (content and language integrated learning), EMI (English medium instruction), and TBLT (task-based language teaching) as well as the work done on

the Common European Framework of Reference for Languages (CEFR). It introduces new movements in ESP in Japan and in other Asian regions, covering topics ranging from genre analysis to corpus linguistics, and presents application examples of ESP practice in a range of educational situations in Japan from the graduate school level to elementary and middle school contexts. It

also offers readers application examples of ESP practice in a range of business settings and expands the discussion to the global sphere where EAP and ESP are gaining importance as the number of ELF (English as a Lingua Franca) speakers continue to increase. The book will be of great interest to academics, researchers, and post-graduate students working in the fields of EFL and ESL.

English for Specific Purposes Instruction and Research

Springer Nature English for Specific Purposes (ESP), addressing the communicative needs and practices of particular professional or occupational groups, has developed rapidly in the past fifty years and is now a major force in English language teaching and research. This critical volume

helps innovate the theory, practice, and methodology for ESP teaching and research in Asian countries and areas. Promoting communication and enhancing cooperation on ESP research and pedagogy across cultures, it provides ESP scholars, educators and practitioners with an opportunity to benefit from each other's research and expertise in an age of globalization

and digitalization. The volume provides an in-depth analysis of the latest scholarship on English teaching and research for general and specific academic and occupational purposes; the intercultural communication in ESP contexts; corpus linguistics and data-driven instruction for ESP; computer-assisted language learning and mobile-assisted language

learning; evaluation of English writing courses; and ESP translation strategies.

Specific Purposes is an accessible and practical guide to research in ESP. It's for novice researchers, graduate students and for ESP practitioners who want to do some research themselves. The author takes the reader step by step through the stages of research, starting with choosing a topic and reviewing the literature through to writing up research findings. Examples are

taken from academic journals and dissertations to highlight aspects of the research process. The book covers the following areas: developing a research project research design theoretical approaches to ESP research choosing a research topic quantitative, qualitative and mixed methods in ESP research validity, reliability and ethics writing up research in ESP The book includes

recommendations for further reading and tasks. There is also a glossary and a chapter providing advice, templates and links to useful research sources. Introducing Researching English for Specific Purposes is essential reading for anyone wanting to conduct research in ESP.

This comprehensive volume brings together the most insightful papers from the First International Conference on Teaching English for Specific and Academic Purposes, titled "Connect and Share", held at the Faculty

of Electronic Engineering of the University of Niš, Serbia, in May 2013. The collection covers a diverse and extensive list of topics, and provides a number of invaluable contributions which prove the presence of ESP in all continents, and in many different professions, sciences, and businesses. Also of interest is the fact these papers highlight the interrelatedness of ESP and linguistics, the methodology

of teaching, sociolinguistics, and a number of other fields relevant to the study and practice of languages. The chapters of this book prove that immense, original, creative and worthwhile research is being conducted in the ever-growing and increasingly relevant field of ESP. At the same time, the book also offers rich insights into many innovative teaching practices that

justify ESP as an important area of academic study.

Science & Business Media

This volume offers research-based studies on English for Specific Purposes in higher education from across the world. By drawing on international studies, the book brings together diverse ESP practices and aspects of relevant

issues in the development of ESP programs, teachers and learners in a coherent fashion. There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world. Knowledge of ESP is an important factor in subject matter learning by students, and also closely related to the performance of university graduates in

the relevant sectors. Careful planning and efficient implementation are essential to ensure the quality of the language learning process. For a variety of reasons, it proves difficult to maintain ESP instruction in higher education. These reasons include the incompetence of teachers, lack of materials for that specific context, as well as lack of opportunities for ESP teachers to

develop their skills. The chapters in this book, taken from a wide variety of countries, shed light on the diversity of current practices and issues surrounding ESP.

WORDS FOR WORKING

Springer
With the unrelenting spread of globalization, the English language has been firmly established as the Lingua Franca. Now more than ever, the importance of learning

English is paramount within nearly all professional and educational sectors. English for Specific Purposes (ESP) has long been accepted as an effective method for teaching English as a foreign language. In recent years, it has experienced an increasing presence in secondary and tertiary education across the globe. This is predominantly due to its learner-centered approach that focuses on developing linguistic competence in the student's specific discipline, may that be academics, business or tourism, for example. Positioning English for Specific Purposes in an English Language Teaching Context attempts to present and define the relevance and scope of ESP within English Language teaching. From mobile phones as educational tools to the language needs of medical students, the contributors to this volume examine and propose different epistemological and methodological aspects of ESP teaching. Its unique approach to ESP marks this volume out as an important and necessary contribution to existing ESP literature, and one that will be of use to both researchers and practitioners of ESP.

<p><u>Languages for Specific Purposes in Theory and Practice</u> Cambridge University Press Introducing Needs Analysis and English for Specific Purposes is a clear and accessible guide to the theoretical background and practical tools needed for this early stage of curriculum development in ESP.
