 Unlike any other text that discusses day hospital programming, A Guide to Creative Group Programming in the Psychiatric Day Hospital contains protocols for the invention of new groups,

saving you the time and effort needed to create one yourself. Intended for social workers, psychologists, and occupational therapists, this book introduces new and unique methods on how to invent or manage groups for a day hospital program, inpatient unit, or intensive outpatient program. The text also includes exercises that address the topics of motivation, self-esteem, shifting cognitive distortions, and risk-taking in relationships. Because the protocols were created with different types of patient

groups in mind, this book contains ideas not offered in typical treatment settings. A Guide to Creative Group Programming in the Psychiatric Day Hospital is designed to help clinicians capture the interest of patients and to promote the discourse of important treatment issues by providing: 50 protocols for operating existing day hospital, inpatient or outpatient groups advice, professional opinions, and notes from the author to the clinician on all protocols exercises to help patients strengthen their abilities to

handle the activities of daily living and socialization several hypothetical exercises, complete with a list of preparations, a description of the activity, and progress notes from observations with patient assessments numerous examples that use parts of popular movies to create new groups and stimulate discussion comprehensive, easy-to-follow instructions for both clinicians and patients The protocols in *A Guide to Creative Group Programming in the Psychiatric Day Hospital* contain detailed example activities complete with worksheets, skits, sample discussions, and hypothetical patient reactions to certain topics. Many exercises request that the patient set goals for himself or herself before starting a new topic. In addition, there is suggested homework for the patient to complete after a topic has been discussed, allowing you to monitor what your patients have learned and how they have improved after the exercise. After reading *A Guide to Creative Group Programming in the Psychiatric Day Hospital*, you'll be ready to treat your patients using easy, effective methods that will lead to successful group discussions and lessen the chance of patient relapse.

Currently the director of the International Conciliation Committee, he has worked with governments, justice departments, youth programs, and other groups in Latin America, the Philippines, Cambodia, as well as Asia and Africa. Lederach blends a special training method in mediation with a tradition derived from his work in development. Throughout the book, he uses anecdote and pertinent experiences to demonstrate his resolution techniques. With an emphasis on the exchange involved in negotiation, Lederach conveys the key to successful conflict resolution: understanding how to guide disputants, transform their conflicts, and launch a process that empowers them.

### HIGH CONFLICT VIOLENT AND SEPARATING FAMILIES

John Wiley & Sons

This series of monographs is dedicated to the increasingly vital area of prevention in healthcare. The works are organized into four categories of preventive practice: education, social competency enhancement, natural caregiving, and systems change. Tragedy should not and need not occur before a school or community begins making efforts to prevent violence. This volume describes the steps taken by Responding In Peaceful and Positive Ways (RIPP), a program developed to promote 'non-violence' among students in middle schools. RIPP provides young people with new ways to respond to conflict. Using the acronym RAID, the students are taught four types of non-violent options: Resolve, Avoid, Ignore, and Diffuse. By teaching that they have other choices in any conflict, the idea that 'fighting' is a necessary response to an insult or a conflict is dispelled. RIPP also teaches the need for everyone to accept differences, to affirm those with whom they come in contact, and not to engage in 'put downs' of others. This empirically validated program has been proven to work in a variety of settings and was designed with real-life experiences in mind. It was originally developed and implemented in collaboration with school administrators in both urban and rural settings.

Restorative Justice - The Empowerment Model presents a powerful challenge to many current accounts of the criminal justice system. Charles Barton gives a clear and insightful analysis of current restorative justice philosophy and theory. He uses a unifying and overarching principle of empowerment to provide a distinct conceptual framework for restorative justice theory and practice. He puts forward a step-by-step implementation process, which includes restorative meeting facilitation, complete with seating plans and scripted prompts for mediators, keepers, and facilitators. There will also be two sample role plays in the book and additionally there will be four complete role plays available on our website, closer to publication. Barton emphasises the importance of each participant in a restorative justice meeting - the victims, offenders and their supporters as well as professionals such as police, social workers and legal advocates.

Successful programs must consistently and reliably achieve maximally restorative outcomes for all of them. Practitioners need always keep this objective in mind.. Barton's book will strengthen their comprehension and facilitate application of the practical process.
