For most Americans, candy is an uneasy pleasure, eaten with side helpings of guilt and worry. Yet candy accounts for only 6 percent of the added sugar in the American diet. And at least it's honest about what it is—a processed food, eaten for pleasure, with no particular nutritional benefit. So why is candy considered especially harmful, when it's not so different from the other processed foods, from sports bars to fruit snacks, that line

supermarket shelves?

How did our definitions of food and candy come to be so muddled? And how did candy come to be the scapegoat for our fears about the dangers of food? In *Candy: A Century of Panic and Pleasure*, Samira Kawash tells the fascinating story of how candy evolved from a luxury good to a cheap, everyday snack. After candy making was revolutionized in the early decades of mass production, it was celebrated as a new kind of food for energy and

enjoyment. Riding the rise in snacking and exploiting early nutritional science, candy was the first of the panoply of "junk foods" that would take over the American diet in the decades after the Second World War—convenient and pleasurable, for eating anytime or all the time. And yet, food reformers and moral crusaders have always attacked candy, blaming it for poisoning, alcoholism, sexual depravity and fatal disease. These charges have been disproven and

forgotten, but the mistrust of candy they produced has never diminished. The anxiety and confusion that most Americans have about their diets today is a legacy of the tumultuous story of candy, the most loved and loathed of processed foods. Candy is an essential, addictive read for anyone who loves lively cultural history, who cares about food, and who wouldn't mind feeling a bit better about eating a few jelly beans.

For as long as anyone can remember, a man named Luca Turin has had an uncanny relationship with smells. He has been compared to the hero of Patrick Süskind's novel *Perfume*, but his story is in fact stranger, because it is true. It concerns how he made use of his powerful gifts to solve one of the last great mysteries of the human body: how our noses work. Luca Turin can distinguish the components of just about any smell, from the world's most refined perfumes to the air in a

subway car on the Paris metro. A distinguished scientist, he once worked in an unrelated field, though he made a hobby of collecting fragrances. But when, as a lark, he published a collection of his reviews of the world's perfumes, the book hit the small, insular business of perfume makers like a thunderclap. Who is this man Luca Turin, they demanded, and how does he know so much? The closed community of scent creation opened up to Luca Turin, and he discovered a fact that

astonished him: no one in this world knew how smell worked. Billions and billions of dollars were spent creating scents in a manner amounting to glorified trial and error. The solution to the mystery of every other human sense has led to the Nobel Prize, if not vast riches. Why, Luca Turin thought, should smell be any different? So he gave his life to this great puzzle. And in the end, incredibly, it would seem that he solved it. But when enormously powerful interests are

threatened and great reputations are at stake, Luca Turin learned, nothing is quite what it seems. Acclaimed writer Chandler Burr has spent four years chronicling Luca Turin's quest to unravel the mystery of how our sense of smell works. What has emerged is an enthralling, magical book that changes the way we think about that area between our mouth and our eyes, and its profound, secret hold on our lives.

Award-winning author and broadcaster Carol Off reveals the fascinating – and often horrifying – stories behind our desire for all things chocolate. Whether it's part of a Hallowe'en haul, the contents of a heart-shaped box or just a

candy bar stashed in a desk drawer, chocolate is synonymous with pleasures both simple and indulgent. But behind the sweet image is a long history of exploitation. In the eighteenth century the European aristocracy went wild for the Aztec delicacy. In later years, colonial territories were ravaged and slaves imported in droves as native populations died out under the strain of feeding the world's appetite for chocolate. Carol Off traces the origins of the cocoa craze

and follows chocolate's evolution under such overseers as Hershey, Cadbury and Mars. In Côte d'Ivoire, the West African nation that produces nearly half of the world's cocoa beans, she follows a dark and dangerous seam of greed. Against a backdrop of civil war and corruption, desperately poor farmers engage in appalling practices such as the indentured servitude of young boys – children who don't even know what chocolate tastes like. Off shows that, with the complicity of

Western governments and corporations, unethical practices continue to thrive. Bitter Chocolate is a social history, a passionate investigative account and an eye-opening exposé of the workings of a multi-billion dollar industry that has institutionalized misery as it served our pleasures. From the bestselling author of SPQR: A History of Ancient Rome, the fascinating story of how images of Roman autocrats have influenced art, culture, and the representation of power for more than 2,000 years. What does the face of power look like? Who gets commemorated in art and why? And how do we react to statues of politicians we deplore? In this book—against a

background of today's "sculpture wars"—Mary Beard tells the story of how for more than two millennia portraits of the rich, powerful, and famous in the western world have been shaped by the image of Roman emperors, especially the "Twelve Caesars," from the ruthless Julius Caesar to the fly-torturing Domitian. Twelve Caesars asks why these murderous autocrats have loomed so large in art from antiquity and the Renaissance to today, when hapless leaders are

still caricatured as Neros fiddling while Rome burns. Beginning with the importance of imperial portraits in Roman politics, this richly illustrated book offers a tour through 2,000 years of art and cultural history, presenting a fresh look at works by artists from Memling and Mantegna to the nineteenth-century American sculptor Edmonia Lewis, as well as by generations of weavers, cabinetmakers, silversmiths, printers, and ceramicists. Rather than a story of a simple

repetition of stable, blandly conservative images of imperial men and women, *Twelve Caesars* is an unexpected tale of changing identities, clueless or deliberate misidentifications, fakes, and often ambivalent representations of authority. From Beard's reconstruction of Titian's extraordinary lost Room of the Emperors to her reinterpretation of Henry VIII's famous Caesarian tapestries, *Twelve Caesars* includes fascinating detective work

and offers a gripping story of some of the most challenging and disturbing portraits of power ever created. Published in association with the Center for Advanced Study in the Visual Arts, National Gallery of Art, Washington, DC *The Emperor of Evening Stars (The Bargainers Book 2.5)* Greenwood Publishing Group *Candide* is the picaresque tale of the titular character's fantastical journey from an insular, idealized life in a picturesque castle

through the difficulties and evils of the real world. Satirical, comical, witty, and cutting, *Candide* was widely banned in its day for containing blasphemous and seditious concepts. Despite that, it survived controversy to become an important book in the Western literary heritage. Today *Candide* remains a breezy and darkly funny read. "Imperial law enforcer Amaranthe Lokdon is good at her job: she can deter thieves and pacify thugs, if not with a blade, then by toppling an eight-foot pile of coffee canisters onto their heads. Worse, Sicarius, the empire's most notorious
