O'zbekiston tarixi London : G. Allen & Unwin

Some of the hardest computational problems have been successfully attacked through the use of probabilistic algorithms, which have an element of randomness to them. Concepts from the field of probability are also increasingly useful in analyzing the performance of algorithms, broadening our understanding beyond that provided by the worst-case or average-case analyses. This book surveys both of these emerging areas on the interface of the mathematical sciences and computer science. It is designed to attract new researchers to this area and provide them with enough background to begin explorations of their own.

To those who are unfamiliar with the achievements of Poland in the field of human rights, representative government and general participation of the citizens in the public life, the book may appear as a revelation. To those who know something about Polish history, Dr Jedruch's observations will give a wealth of interesting data, facts, details and comments. Written with care and learning, this guide will be very useful to all who approach the Polish legislative tradition with a desire to learn more of its concern with individual rights, freedom of conscience, civil disobedience, pacifism and militarism, and of the way it has been focus at crucial times for the life of the nation.

The Oxford Handbook of Philosophy of Religion contains newly commissioned chapters by 21 prominent experts who cover the field in a comprehensive but accessible manner. Each chapter is expository, critical, and representative of a distinctive viewpoint.

akademik litsey va kasb-hunar kollejlari 1-bosqich talabalari uchun darslik Routledge Environmental and Natural Resource Economics is the best-selling text for natural resource economics and environmental economics courses, offering a policy-oriented approach and introducing economic theory and empirical work from the field. Students will leave the course with a global perspective of both environmental and natural resource economics and how they interact. Complemented by a number of case studies showing how underlying economic principles provided the foundation for specific environmental and resource policies, this key text highlights what can be learned from the actual experience. This new, 11th edition includes updated data, a number of new studies and brings a more international focus to the subject. Key features include: Extensive coverage of the major issues including climate change, air and water pollution, sustainable development, and environmental justice. Dedicated chapters on a full range of resources including water, land, forests, fisheries, and recyclables. Introductions to the theory and method of environmental economics including externalities, benefit-cost analysis, valuation methods, and ecosystem goods and services. Boxed 'Examples' and 'Debates' throughout the text which highlight global examples and major talking points. The text is fully supported with end-of-chapter summaries, discussion questions, and self-test exercises in the book and multiple-choice questions, simulations, references, slides, and an instructor's manual on the Companion Website. Macmillan

This book explores why some members of Congress are more effective than others at navigating the legislative process and what this means for how Congress is organized and what policies it produces. Craig Volden and Alan E. Wiseman develop a new metric of individual legislator effectiveness (the Legislative Effectiveness Score) that will be of interest to scholars, voters, and politicians alike. They use these scores to study party influence in Congress, the successes or failures of women and African Americans in Congress, policy gridlock, and the specific strategies that lawmakers employ to advance their agendas.

BEING THE ACCOUNT OF A JOURNEY FROM TEHERAN ACROSS THE TURKOMAN DESERT ON THE EASTERN SHORE OF THE CASPIAN TO KHIVA, BOKHARA, AND SAMARCAND. PERFORMED IN THE YEAR 1863

GMB Publishing Ltd

Intense media coverage of the public pension funding crisis continues to fuel heightened awareness in and debate over public pension benefits. With over \$3 trillion in assets currently under management, the ramifications of poor oversight are severe. It is important that practitioners, researchers, and taxpayers be well-advised regarding any concer

Training Guide for the Dental Team Routledge

The last decade of the 20th century saw radical changes in Eastern Europe and the former USSR. Most of these countries made a transition from totalitarianism or authoritarianism to democracy and from central planning to a market economy. Adding to the latter, a number of national entities gained their independence after the disintegration of the federative states of the USSR, Yugoslavia and Czechoslovakia. Many recent studies have focused on these double, in some cases triple transitions, and scholars from different fields analyzed the so-called "1989 Revolution" from different perspectives. Rather less scholarly attention has been paid to the future of post-communist constitutions and prospects for constitutionalism in these countries. The main

questions dealt with throughout this study can be formulated as follows: Will liberal democratic constitutionalism take root in these countries? Will new constitutions in Eastern Europe and the former USSR perish or survive? This study also aims at contributing to the construction of a general constitutional theory by studying the causes and dynamics of constitutional change in general. Such constitutional change is not only on the East European, but also on the West European agenda. The purpose of this study is not to introduce a general theory about constitutional in/stability, but studying post-communist constitutions will help us to understand the causes and dynamics of constitutional change from a broader perspective.

These Transactions publish research in computer-based methods of computational collective intelligence (CCI) and their applications in a wide range of fields such as the Semantic Web, social networks and multi-agent systems. TCCI strives to cover new methodological, theoretical and practical aspects of CCI understood as the form of intelligence that emerges from the collaboration and competition of many individuals (artificial and/or natural). The application of multiple computational intelligence technologies such as fuzzy systems, evolutionary computation, neural systems, consensus theory, etc., aims to support human and other collective intelligence and to create new forms of CCI in natural and/or artificial systems. This second TCCI issue contains a collection of 10 articles selected from high-quality submissions addressing advances in the foundations and applications of computational collective intelligence.

Federal Law Enforcement OECD Publishing

Belarus relies on Russia for about 85% of its total energy needs, while Russia needs Belarus' oil and gas pipelines to export its supplies to Western Europe. How will energy exports from Russia and Belarus' transit capabilities impact Western Europe if this interdependent relationship ends, either through political changes in Belarus or if Russia ends its energy subsidies to Belarus? This report looks at transit, infrastructure and investment issues and analyzes both the state of the current infrastructure, as well as the possibilities this transit opens to Western investors, particularly as the Yamal Pipeline nears completion. In addition, it looks at the current conflict between Belarus and Russian investors for control of the country's gas transit system and oil refineries. This series of reports establishes for the first time the confluence of Russian foreign policy with the acquisition of foreign energy assets by Russian entities. Nine specific country profiles focus on the oil, gas, electricity and nuclear power industries. Each report written by an author of international standing, explains how Russian foreign energy downstream mergers and acquisitions are transpiring to consolidate the new Russian empire.

Tracking Truth presents a unified treatment of knowledge, evidence, and epistemological realism and anti-realism about scientific theories. A wide range of knowledge-related phenomena, especially but not only in science, strongly favour the idea of tracking as the key to what makes something knowledge. A subject who tracks the truth - an idea first formulated by Robert Nozick - has the ability to follow the truth through time and changing circumstances. Epistemologists rightly concluded that Nozick's theory was not viable, but a simple revision of that view is not only viable but superior to other current views. In this new tracking account of knowledge, in contrast to the

old view, knowledge has the property of closure under known implication, and troublesome counterfactuals are replaced with well-defined conditional probability statements. Of particular interest are the new view's treatment of skepticism, reflective knowledge, lottery propositions, knowledge of logical truth, and the question why knowledge is power in the Baconian sense. Ideally, evidence indicates a hypothesis and discriminates it from other possible hypotheses. This is the idea behind a tracking view of evidence, and Sherrilyn Roush provides a defence of a confirmation theory based on the Likelihood Ratio. The accounts of knowledge and evidence she offers provide a deep and seamless explanation of why having better evidence makes one more likely to have knowledge. Roush approaches the question of epistemological realism about scientific theories through the question what is required for evidence, and rejects both traditional realist and traditional anti-realist positions in favour of a new position which evaluates realist claims in a piecemeal fashion according to a general standard of evidence. The results show that while anti-realists were immodest in declaring a priori what science could not do, realists were excessively sanguine about how far our actual evidence has so far taken us.

This Handbook is the first to explore the emergent field of 'placemaking' in terms of the recent research, teaching and learning, and practice agenda for the next few years. Offering valuable theoretical and practical insights from the leading scholars and practitioners in the field, it provides cutting-edge interdisciplinary research on the placemaking sector. Placemaking has seen a paradigmatic shift in urban design, planning, and policy to engage the community voice. This Handbook examines the development of placemaking, its emerging theories, and its future directions. The book is structured in seven distinct sections curated by experts in the areas concerned. Section One provides a glimpse at the history and key theories of placemaking and its interpretations by different community sectors. Section Two studies the transformative potential of placemaking practice through case studies on different places, methodologies, and theoretical frameworks. It also reveals placemaking's potential to nurture a holistic community engagement, social justice, and human-centric urban environments. Section Three looks at the politics of placemaking to consider who is included and who is excluded from its practice and if the concept of placemaking needs to be reconstructed. Section Four deals with the scales and scopes of art-based placemaking, moving from the city to the neighborhood and further to the individual practice. It juxtaposes the voice of the practitioner and professional alongside that of the researcher and academic. Section Five tackles the socio-economic and environmental placemaking issues deemed pertinent to emerge more sustainable placemaking practices. Section Six emphasizes placemaking's intersection with urban design and planning sectors and includes case studies of generative planning practice. The final seventh section draws on the expertise of placemakers, researchers, and evaluators to present the key questions today, new methods and approaches to evaluation of placemaking in related fields, and notions for the future of evaluation practices. Each section opens with an introduction to help the reader navigate the text. This organization of the book considers the sectors that operate alongside the core placemaking practice. This seminal Handbook offers a timely contribution and international perspectives for the

growing field of placemaking. It will be of interest to academics and students of placemaking, urban design, urban planning and policy, architecture, geography, cultural studies, and the arts.

The World Bank and IMF are placing increasing emphasis on projects aimed at improving the management of public finances. An integrated treasury system forms the backbone for recording and processing all transactions. This book provides a treasury reference model (TRM) to give guidelines for the design of automated treasury systems for governments. It provides detailed flow charts of the functional processes associated with Treasury systems. This book also includes a diagnostic questionnaire that could be used to evaluate country specific requirements as well as a set of sample functional specifications that could be used for procurement and/or development of the application software that would be required to implement these systems.

The Making of Humanity Cambridge University Press

Kid's Box is bursting with bright ideas to inspire you and your pupils! This six-level course gives children a confident start to learning English, and makes lessons a joy for teachers. Perfect for general use, Kid's Box also fully covers the syllabus of the Cambridge Young Learners English (YLE) tests. New language is presented through amusing stories that your students will adore and practised with fantastic songs and activities, making the learning process a delight. Key language is continuously revised and recycled, helping to build children's confidence, and a focus on communicative activities ensures that children use the language they have learned in a fun, 'no-pressure' context. The loveable members of the Star family will delight young learners, while an extensive range of supplementary materials provides the teacher with all the extra activities they need.
