textes  
fondateurs de  
la psychologie  
moderne. Ils  
sont donc peu  
connus et  
semblent  
inaccessibles  
par leur  
difficulté de  
lecture en  
langue  
originale  
(anglais ou  
allemand).  
C'est pour  
répondre à ce

manque que  
Ludovic  
Ferrand et  
Serge Nicolas  
ont réuni pour  
la première  
fois en langue  
française, les  
grands textes  
de référence  
de la  
psychologie  
du vingtième  
siècle, issus  
d'une  
sélection  
d'écrits très

souvent cités dans la littérature de référence. Ils abordent ainsi les différents courants majeurs : Le structuralisme (Mundt et Titchener) Le fonctionnalisme (James et Dewez) Le behaviorisme (Watson et Skinner) La Gestalt (Ehrenfels et Köhler) La psychanalyse (Freud) Le cognitivisme (Miller, Neisser) Pour chaque grande tendance, les auteurs offrent une traduction française

intégrale des textes originaux, accompagnés d'une présentation du courant, d'une bibliographie sélective et d'une information biographique des grands auteurs.

**RECUEIL  
DES COURS,  
COLLECTED  
COURSES,  
1934**

Wipf and Stock Publishers  
This collection of essays on the structure and interpretation of the French lyric sequence

marks a number of tentative signposts for future travelers along this relatively unmarked path. It explores the means of seeing how harmony and greater meaning, concordia discors, arises from the organization of a collection of poems into a poetic work.  
*Liber Amicorum*  
*Peter Hagggenmacher*  
Média Diffusion  
From a late 15th-century Catalan incunabula and

drawing on a rich tradition of astrological magic, geomancy, Pythagorean numerology and Hebrew gematria, this practical manual reveals a unique expression of medieval syncretism, the mingling of traditions and the development of new ideas.

University of  
Virginia Press

For much of the twentieth century scientists sought to explain objects and processes by reducing them to their components—nuclei into protons and neutrons, proteins into amino acids, and so on—but over the past forty years there has been a marked turn toward explaining phenomena by building them up rather than breaking them down. This collection reflects on the

history and significance of this turn toward “growing explanations” from the bottom up. The essays show how this strategy—based on a widespread appreciation for complexity even in apparently simple processes and on the capacity of computers to simulate such complexity—has played out in a broad array of sciences. They describe how scientists are reordering knowledge to

emphasize growth, change, and contingency and, in so doing, are revealing even phenomena long considered elementary—like particles and genes—as emergent properties of dynamic processes. Written by leading historians and philosophers of science, these essays examine the range of subjects, people, and goals involved in changing the character of scientific analysis over

the last several decades. They highlight the alternatives that fields as diverse as string theory, fuzzy logic, artificial life, and immunology bring to the forms of explanation that have traditionally defined scientific modernity. A number of the essays deal with the mathematical and physical sciences, addressing concerns with hybridity and the materials of the everyday

world. Other essays focus on the life sciences, where questions such as “What is life?” and “What is an organism?” are undergoing radical re-evaluation. Together these essays mark the contours of an ongoing revolution in scientific explanation. Contributors. David Aubin, Amy Dahan Dalmedico, Richard Doyle, Claus Emmeche, Peter Galison, Stefan Helmreich,

Ann Johnson, Evelyn Fox Keller, Ilana Löwy, Claude Rosental, Alfred Tauber <u>Historical Perspectives on Recent Science</u> Martinus Nijhoff Publishers Les divers lieux et aspects d'un paysage riche et changeant, mais essentielleme nt connexe, sont, pour le mathématicie n, une métaphore de l'intelligence. Les deux conceptions contradictoire s, une sorte de fractal et une belle	variété, font qu'il est nécessaire de faire appel à une multiplicité de points de vue pour faire sentir la nature des mathématique s. C'est le choix qui a clairement guidé la structure novatrice des Grands courants. <b>LES GRANDS COURANTS DE L'HISTOIRE UNIVERSELLE ...</b> BRILL Sommaire de l'ouvrage Chap. 1 Du contexte au	texte : l'histoire littéraire Chap. 2 Du contexte au texte : la critique sociologique marxiste Chap. 3 Auteur et texte : la critique psychanalytiq ue Chap. 4 Auteur et texte : la critique thématique Chap. 5 Le texte comme objet : du formalisme au structuralisme Chap. 6 Le texte comme objet : structuralisme et narratologie Chap. 7 Le texte comme objet :

It explores through these works, and less well- known but equally popular patriotic novels of the</p>	<p>period, the effect that experiencing war has upon the writer's understanding of the world, arguing that, in their depiction of conflict, these writers demonstrate a decidedly complex and modernist understanding of humanity's place in the world. In particular, the author examines the French combat novel's evocation of a world where a sense of the Absurd vies with the novelist's</p>
--	---	--

desire to re-impose order through a particular political understanding of the Great War itself, be it in the form of revolutionary socialism, French nationalism, or humanism. In this way, this volume contends, ideology becomes a force for responding to and countering the sense of contingency that characterises the human experience of combat. It will be of interest

to scholars of twentieth-century French fiction and thought."-

**LES GRANDS  
COURANTS  
DE LA  
PSYCHOLOGIE  
MODERNE  
ET  
CONTEMPORAINE**

BRILL  
Cet ouvrage présente les principaux courants de pensée qui sont nés, se sont développés ou ont traversé le monde juif. Il propose ainsi une immersion dans l'histoire

d'une civilisation qui a traversé les siècles et échangé avec beaucoup d'autres. Un récit y est présenté qui se veut aussi large que possible, sans exclusive quant au choix des sujets. Aucune idée majeure qui s'est développée dans ou autour du judaïsme, n'en a été sciemment omise. En revanche, la trame de narration historique factuelle en été minorée pour ne retenir que

la substantifique moelle, en évitant les énumérations datées. On y trouvera un foisonnement de courants, une richesse spirituelle souvent méconnue, de tous les lieux et de tous les temps dont les Juifs ont été les acteurs ou les témoins.

eLes grands courants de la pensée sociologique par les textesLes grands courants de la pensée mathématique Editions Hermann **Between Culture and Mathematics** Editions l'Age d'Homme LOUIS DE BROGLIE AND THE SINGLE QUANTUM PARTICLE By A. O. Barut We have abundant evidence and testimony that Louis de Broglie deeply cared about the foundations,

the meaning, and our understanding of quantum theory in general and of wave mechanics in particular. So, too, did Erwin Schrodinger, along with Einstein, Bohr, Dirac, and Heisenberg. For de Broglie and Schrodinger this preoccupation meant not simply the acceptance of a novel set of rules, but a constant struggle and a search for complete clarity about the way in which the new

theory fits into the great classical traditions of an objective physical world view. We may call this a striving for "physical rigor," rigor in reasoning, or intellectual rigor. There is not only mathematical rigor inside an axiomatic system with which everybody agrees, but there is, and there should be, rigor also in our concepts and methods. To this kind of rigor belongs the unity, the economy and

simplicity, and the consistency of physical theories; naturally along with as complete and as clear an understanding of phenomena as possible. No loose ends, no proliferation of poorly tested and phenomenological entities, no bending of logic and compromise, and no handwaiving arguments can be tolerated. Unfortunately this kind of rigor seems to be missing in today's

forefront of fundamental physical theories, viz. , particle or high-energy physics.

### **FROM SOMETHING TO NOTHING**

Armando  
Editore  
This book examines the social, institutional and cultural setting of medical practices in the medieval town of Montpellier which boasted a famous school of medicine and a large community of barber-surgeons and

apothecaries.  
 Their collective fate is studied here.  
Les grands courants de la pensée mathématique  
 Peter Lang  
 Imagine mathematics, imagine with the help of mathematics, imagine new worlds, new geometries, new forms.  
 Imagine building mathematical models that make it possible to manage our world better, imagine solving great problems, imagine new problems

never before thought of, imagine combining music, art, poetry, literature, architecture, theatre and cinema with mathematics.  
 Imagine the unpredictable and sometimes counterintuitive applications of mathematics in all areas of human endeavour.  
 This seventh volume starts with a homage to the Italian artist Mimmo Paladino who created exclusively for the Venice

Conference 2019 ten original and unique works of art paper dedicated to the themes of the meeting. A large section is dedicated to the most recent Fields Medals including a Homage to Maryam Mirzakhani including a presentation of the exhibition on soap bubbles in art and science that took place in 2019. A section is dedicated to cinema and theatre including the performances

by Claire Bardainne & Adrien Mondot. A part of the conference focused on the community of mathematicians, their role in literature and even in politics with the extraordinary example of Antanas Mockus Major of Bogotá. Mathematics in the constructions of bridges, in particular in Italy in the Sixties was presented by Tullia Iori. A very particular contribution on Origami by a

mathematician, Marco Abate and an artist, Alessandro Beber. And many other topics. As usual the topics are treated in a way that is rigorous but captivating, detailed and full of evocations. This is an all-embracing look at the world of mathematics and culture. The world, life, culture, everything has changed in a few weeks with the Coronavirus. Culture, science are

the main ways to safeguard people's physical and social life. Trust in humanity's creativity and ability. The motto today in Italy is Everything will be fine. This work is addressed to all those who have an interest in Mathematics. **Les Grands Courants de la Littérature Française Contemporaine** Springer Science & Business Media This collection of essays gathers

contributions from leading international lawyers from different countries, generations and angles with the aim of highlighting the multifaceted history of international law.

**LES GRANDS  
COURANTS  
DE LA  
PENSÉE  
SOCIOLOGI-  
QUE PAR LES  
TEXTES**

BRILL  
Jewish  
mysticism  
approaches  
God as no-  
thing or  
nothing,  
reflecting

Judaism's  
traditional  
identification  
of God as  
incorporeal.  
Whereas  
technical  
philosophical  
language  
often  
employed to  
discuss Jewish  
mysticism has  
a tendency to  
ward off  
otherwise  
interested  
readers, this  
study  
sufficiently  
breaks down  
the technical  
language of  
Jewish  
mysticism in  
its various  
expressions to  
allow a  
beginner to  
benefit from  
what may  
otherwise be

indescribable  
and only  
approached  
by  
consideration  
of what is not  
rather than  
what is.  
Integral to the  
title, From  
Something to  
Nothing, is the  
concept that  
God cannot be  
something,  
because that  
would be  
restricting, so  
God is simply  
no-thing.  
Ironically, the  
conventional  
religious  
expression for  
the biblical  
notion of  
creation is  
"something  
from nothing",  
whereas the  
title of this  
volume is its

precise opposite, which may at first seem to be illogical - creation in reverse. However, in a volume dedicated to various deliberations on magic and mysticism, the ultimate reality may receive expression as nothingness, that is, no-thingness, no quality associated with things. What adds to our difficulty today is that nothingness is inextricably linked with silence. Is silence also an

element or indication of an ultimate reality or its absence? Or is it merely the reflection of nothing whatsoever? This is at the heart of modern debates between atheists and believers. Believers feel that even this silence speaks to this ultimate reality, whereas atheists claim that if you cannot show it, then you do not know it. In other words, believers are victims of their own

wishful thinking. From Something to Nothing memorializes Canadian mystic and scholar Zalman Schachter Shalomi, z"l, engaging in particular aspects that he addressed at some phase of his colourful and erudite life, providing the reader with a broad spectrum of both phenomenological and intellectual topics.

**Studies** Duke University Press This bibliography contains the publications of Husserl and the main secondary literature on Husserl, from Husserl's earliest publication (1887) till today (1997). As the collection of material was concluded in June 1997, the list of publications for the year 1997 is of course incomplete. In this bibliography publications in the following languages have been included: German, English, French, Italian, Spanish, Portuguese and Dutch - for both primary and secondary literature. Since this bibliography has been based primarily on the consultation of the included documents (and not restricted to copying already existing bibliographies) , it was not possible to include publications in languages other than those mentioned. The bibliography has been constructed in the following way: 1. The list of Husserl's works and secondary literature by individual authors is preceded by a list of all edited volumes in which a text by or on Husserl is published. This list is ordered chronologically and runs from 1921 till 1997

(inclusive). Edited volumes of the same year are classified according to language, and this in the order mentioned above: German, English, French, etc. Edited volumes with a title in more than one language are classified according to the above order of languages (this of course concerns only the title of the edited volume, not the title(s) of the individual contributions).

This order is maintained throughout the other parts of the bibliography.

### **COSMIC LITURGY**

Springer Science & Business Media  
Ce livre tente de retracer l'histoire du pouvoir, caractérisée par la nécessité de réguler le conflit toujours sous-jacent à la coexistence des hommes. La pensée politique a ainsi été vouée à la recherche d'une

conciliation entre autorité et liberté ; il peut montrer que, après les tragédies du XXe siècle liées à la substitution du scientisme à l'éthique, la pensée politique classique demeure la référence à laquelle la modernité peut continuer à puiser son inspiration et à vérifier sans cesse l'universalité de ses normes.

Publishing This book presents a powerful, attractive, religiously compelling portrait of the thought of a major Christian theologian who might, for this book, have remained only an obscure name in the handbooks of patrology. It is based on an intelligent and careful reading of Maximus's own writings. Here the history of theology has become itself a way of theological	reflection. Springer Nature Cet ouvrage s'adresse à un public large, à tous ceux qui veulent s'initier à l'économie et maîtriser les concepts de base des grands courants de la théorie. Il comprend quatre parties : * la fondation de l'économie politique et les classiques ; * la démarche néo-classique : les équilibres d'agents et de marché ; * Marx et la contestation de l'économie politique ; * L'approche	Keynésienne. L'objet est de fournir au lecteur une première reconnaissanc e de ces concepts, assez large pour saisir les évolutions, mais suffisamment précise et fidèle aux textes des grands auteurs pour susciter de l'intérêt. Manuel original, quant à ses objectifs et sa formulation, il permet d'apprécier la relativité des discours économiques dans leur progression
--	---	--

historique et leur continuité logique.

The Academy is a prestigious international institution for the study and teaching of Public and Private International Law and related

subjects. The work of the Hague Academy receives the support and recognition of the UN. Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical

and practical aspects of the subject, including legislation and case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the "Collected Courses of the Hague Academy of International Law .
