Including Temple Architecture, Iconography & Iconometry Springer Knowledge updating is a never-ending process and so should be the revision of an effective textbook. The book originally written fifty years ago has, during the intervening period, been revised and reprinted several times. The authors have, however, been thinking, for the last few years that the book needed not only a thorough revision but rather a substantial rewriting. They now take great pleasure in presenting to the readers the twelfth, thoroughly revised and enlarged, Golden Jubilee edition of the book. The subject-matter in the entire book has been re-written in the light of numerous criticisms and

suggestions received from the users of the earlier editions in India and abroad. The basis of this revision has been the emergence of new literature on the subject, the constructive feedback from students and teaching fraternity, as well as those changes that have been made in the syllabi and/or the pattern of examination papers of numerous universities. Fundamentals of Business Statistics is intended to serve as a core textbook for undergraduate students of BBA, BCA, B Com and CA, ICWA and those who need to understand the basic concepts of business statistics and apply results directly to real-life business problems. The book also suits the requirement of students of AMIE, who need both theoretical and practical knowledge of

business statistics. The second edition has been extensively revised with the objective of enhancing and strengthening the conceptual, as well as practical knowledge of readers about various techniques of business statistics. Its easy-to-understand approach will enable readers to develop the required skills and apply statistical techniques to decision-making problems. With a completely new look and feel, this book will facilitate the teaching of business statistics techniques as well as enhance the learning experience for students.
New in This Edition • Completely revised and reorganized text to make explanations more cogent through relevant and interesting examples. • Large number of new business-oriented solved as well as practice problems

representing the various business statistics techniques. • Explanations well illustrated with numerous interesting and varied business-oriented examples. • Pedagogical features like Conceptual Questions, Self Practice Problems with Hints and Answers. • Complete conformity to the latest trends of questions appearing in universities and professional examinations.

The Seventh Revised Edition of “Business Law” as per Tamil Nadu University syllabus for all BBA, B.Com. students. The new edition, like its predecessors, attempts to present the basic principles of Law in a way that makes the subject easily intelligible even to a non-specialist. This object has been achieved by dividing into IV units: Unit I – The Indian Contract Act consists of 157

Illustrative Cases, 213 Test Questions, 326 Practical Problems (with Hints and Solutions), 174 Multiple-choice Questions, 194 True & False Questions and 644 Examples with the idea of testing the depth of knowledge of the reader, basic understanding of concepts and his ability to apply whatever he has learnt to a particular situation or problem. Unit II – The Sale of Goods Act, 1930. Unit III – Law Relating to The Indian Partnership Act, 1932 and The Limited Liability Partnership Act, 2008. It facilitate the reader in understanding the Nature of Partnership, Relations of Partners & Dissolution of Firm followed by a chapter on ‘Limited Liability Partnership’ popularly known as LLP has been added in the present edition. LLP combines the advantage of both the

Company and Partnership into a single form of organization. The Limited Liability Partnership Act, 2008 was published in Official Gazette of India on 9th January, 2009 and has been notified with effect from 31st March, 2009. Unit IV – The Companies Act, 2013 as Amended upto 2019. The Companies Act, 2013 (Schedules) which has been thoroughly updated and amended upto 2019 to our esteemed readers.

Quantitative Techniques Pearson College Division

This is the first book to provide the student of tourism, hospitality and events with all that they need to undertake statistical analysis using SPSS for research in their industry. Employing examples directly from the tourism, hospitality and events sector, it provides

a comprehensive explanation on how appropriate statistical tools and methods can be identified for this research context and provides a step-by-step demonstration on how to carry out the chosen statistical operations. Each chapter opens with a sector-specific case study reflecting current research trends and issues from a range of different countries that are affecting the industry today. It is followed by an examination of the SPSS procedures relating to the case study and various solutions are offered. The implementation of clear, step-by-step demonstrations on how to carry out statistical operations using a combination of screenshots, diagrams, and tables aids the reader's understanding. Chapters close with thorough guidance on how to

appropriately write up interpretations of the research in a report. Research implications and recommendations for tourism and hospitality businesses are also provided, to enable them to successfully create and manage research strategies in action. Adopting an interdisciplinary perspective and written by a range of industry experts from all over the globe, this book will be essential for all students and researchers in the field of tourism, hospitality, and events as well as all those in related fields with an interest in statistical data analysis.

Highly praised for its clarity and great examples, Weiers' INTRODUCTION TO

BUSINESS STATISTICS, 6E introduces fundamental statistical concepts in a conversational language that connects with today's students. Even those intimidated by statistics quickly discover success with the book's proven learning aids, outstanding illustrations, non-technical terminology, and hundreds of current examples drawn from real-life experiences familiar to students. A continuing case and contemporary applications combine with more than 100 new or revised exercises and problems that reflect the latest changes in business today with an accuracy you can trust. You can easily introduce today's leading statistical software and teach not only how to complete calculations by hand and using Excel, but also how to determine which method

is best for a particular task. The book's student-oriented approach is supported with a wealth of resources, including the innovative new CengageNOW online course management and learning system that saves you time while helping students master the statistical skills most important for business success.

Quantitative Techniques: Theory and Problems adopts a fresh and novel approach to the study of quantitative techniques, and provides a comprehensive coverage of the subject. Essentially designed for extensive practice and self-study, this book will serve as a tutor at home. Chapters contain theory in brief, numerous solved

examples and exercises with exhibits and tables.

STATISTICS FOR MANAGEMENT

Tata McGraw-Hill Education
Business Statistics has been given an important place in our courses of studies in various social sciences, business management, public administration, etc. No student of these disciplines can afford without knowledge of this important branch of knowledge. The present textbook 'Business Statistics' is designed to introduce students of business economics and management to the method and application of Statistics. This book is of utmost utility for the students of various courses namely B.Com, M.Com, MBA, etc. For the help of the students, the subject matter of the

book is simple, comprehensible and easily understandable. Moreover, wherever required, important facts, examples, tables, graphs, etc. are used for enhancing the quality of the chapters. For a better understanding of various theories and principles in each lesson, Practical Problems And Solutions are also included. In addition to this for self-assessment, at the end of each chapter Long Answer Type Questions, Short Answer Type Questions and Objective Type Questions are given. Statistical Methods Tata McGraw-Hill Education Sultan Chand & Sons present the 38th Revised and Enlarged Edition of the book entitled "Elements of Mercantile Law". This book is specially written for B. Com, M. Com, CA, CS, CMA, MBA, LLB and

Other Commerce Courses of all Indian Universities. The book is divided into three Volumes. Volume I is Law of Contract, Volume II is Company Law and Volume III is Industrial Law The salient features of the present edition are as follows: A new chapter on 'Goods and Services Tax (GST)' has been included in this edition. In order to bring uniformity in Tax rates and to simplify the tax mechanism, Central Government rolled out Goods and Services Tax (GST) from 1st July, 2017. The Insolvency and Bankruptcy Code, 2016' is the Bankruptcy Law of India has been added. A chapter on 'Limited Liability Partnership' popularly known as LLP has been added in the present edition. LLP combines the advantage of both the Company and Partnership into a single

form of organization. Volume II of the book on Company Law with Schedules has been thoroughly updated and amended upto 2019.

The Thirty-first Revised Edition of the book entitled “Company Law & Secretarial Practice” with Companies Act, 2013 (Schedules) for B.Com., B.Com. (Corporate Secretaryship), M.Com., IPCC, CS & LLB. The book is divided into two parts volume I Company Law contains 32 chapters and volume II Secretarial Practice contains 10 chapters having more than 270 Test Questions; 67 Practical Problems (with Hints and Solutions); 79 short Answer & Objective

Type Question; 48 Multiple Choice, Presentation of Examples (10); Illustrative cases (12) etc., University Questions Papers have been added at the end of the book to give an idea about the pattern of questions asked. Business Statistics Business Statistics (According to Minimum Uniform Syllabus Prescribed by National Education Policy) Statistics is a mathematical science pertaining to the collection, analysis, interpretation or explanation, and presentation of data. This book covers the subject as per the requirement at the UG level, supporting each topic with good number of examples and exercise problems.

An Interactive Multimedia Course of Study (Part I: Chapters 1-10) Sultan Chand & Sons

This book has been written in a lucid and easy-to-understand manner to facilitate learning of the fundamentals, use, and application of statistics in areas like business decision making and economic analysis. With rich pedagogy and student-friendly features, it will create the interest of the students in this subject. Written primarily for the students of business management, it will also cater to the requirements of undergraduate and postgraduate students in other disciplines, especially commerce and economics.

The authors show students how to recognize and understand each business question, use statistical tools to do the analysis, and how to communicate their results clearly and concisely. In addition to providing cases and real data to demonstrate real business situations, this text provides resources to support understanding and

engagement. A successful problem-solving framework in the 4-M Examples (Motivation, Method, Mechanics, Message) model a clear outline for solving problems, new What Do You Think questions give students an opportunity to stop and check their understanding as they read, and new learning objectives guide students through each chapter and help them to review major goals. Software Hints provide instructions for using the most up-to-date technology packages. The Second Edition also includes expanded coverage and instruction of Excel® 2010.

 Each aspect of a chapter has been

discussed in detail in order to meet the
 requirements of the syllabus prescribed
 by different universities and professional
 institutes. Salient Features of the Book
 The following features are worth nothing
 in the present text: • The illustrations
 and assignment material has been made
 to conform to the requirements of
 Schedule III of the Companies Act, 2013.
 The relevant problems/ solutions has
 also been revised. • The revised revision
 of Paragraph 14 of Accounting Standards
 — 4 concerning Financial Statements
 regarding Proposed final dividend has
 been incorporated at relevant pages and
 the illustrations amended accordingly. •
 The relevant provisions of Ind AS — 7:
 Statements of Cash Flows dealing with
 Bank Overdraft and Proposed Dividend
 have also been taken care of in this

book. • In the chapter of Redemption of Debentures, the treatment of interest on Debenture Redemption Funds Investments or Profit (or Loss) on the sale of DRFI have been also summarised in the chapter. • All chapters have been revised and adapted. Problems of each chapter have been suitably graded and edited to include questions of topical interest. We are confident that the book in its revised form will be more useful for B.Com (Pass and Hons.), M.Com, M.B.A., C.A., I.P.C.E, C.A.(Final), I.C.M.A. (Stage II) and Company Secretaries (Executive Programme) Examinations.

DECISION MAKING AND ANALYSIS

Tata McGraw-Hill Education

The essential introduction to the theory and application of linear models—now in a valuable new edition. Since most advanced statistical tools are generalizations of the linear model, it is necessary to first master the linear model in order to move forward to more advanced concepts. The linear model remains the main tool of the applied statistician and is central to the training of any statistician regardless of whether the focus is applied or theoretical. This completely revised and updated new edition successfully develops the basic theory of linear models for regression,

analysis of variance, analysis of covariance, and linear mixed models. Recent advances in the methodology related to linear mixed models, generalized linear models, and the Bayesian linear model are also addressed. *Linear Models in Statistics, Second Edition* includes full coverage of advanced topics, such as mixed and generalized linear models, Bayesian linear models, two-way models with empty cells, geometry of least squares, vector-matrix calculus, simultaneous inference, and logistic and nonlinear regression. Algebraic, geometrical, frequentist, and Bayesian approaches to both the inference of linear models and the analysis of variance are also illustrated. Through the expansion of relevant material and the inclusion of

the latest technological developments in the field, this book provides readers with the theoretical foundation to correctly interpret computer software output as well as effectively use, customize, and understand linear models. This modern Second Edition features: New chapters on Bayesian linear models as well as random and mixed linear models Expanded discussion of two-way models with empty cells Additional sections on the geometry of least squares Updated coverage of simultaneous inference The book is complemented with easy-to-read proofs, real data sets, and an extensive bibliography. A thorough review of the

requisite matrix algebra has been added for transitional purposes, and numerous theoretical and applied problems have been incorporated with selected answers provided at the end of the book. A related Web site includes additional data sets and SAS® code for all numerical examples. Linear Model in Statistics, Second Edition is a must-have book for courses in statistics, biostatistics, and mathematics at the upper-undergraduate and graduate levels. It is also an invaluable reference for researchers who need to gain a better understanding of regression and analysis of variance.
