The Idea of a Renewed Nation Simon
and Schuster

As a \$3-trillion economy, India is on her way to becoming an economic superpower. Between 1991 and 2011, the period of our best growth, there was also a substantial decline in the number of people below the poverty line. Since 2011, however, there has been a marked retreat in the high growth performance of the previous two decades. What happened to the promise? Where have we faltered? How do we change course? How do we overcome the ever-present dangers of the middle-income trap, and get rich before we grow old? And one question above all

else: What do we need to do to make our trust with destiny? As professional economists as well as former civil servants, Vijay Kelkar and Ajay Shah have spent most of their lives thinking about and working on these questions. The result: *In Service of the Republic*, a meticulously researched work that stands at the intersection of economics, political philosophy and public administration. This highly readable book lays out the art and the science of the policymaking that we need, from the high ideas to the gritty practicalities that go into building the Republic.

REALIZING A BILLION ASPIRATIONS

Grove/Atlantic, Inc.

This inspiring story takes you on a journey from Sunil Robert's childhood of battling poverty to support a family of six, to his

becoming a global, award-winning communicator.

FASTER, HIGHER, STRONGER

Routledge

- More than 500 appearances on national bestseller lists
- #1 Wall Street Journal, New York Times, and USA Today
- Won 12 book awards
- Translated into 35 languages
- Voted Top 100 Business Book of All Time on Goodreads

People are using this simple, powerful concept to focus on what matters most in their personal and work lives. Companies are helping their employees be more productive with study groups, training, and coaching. Sales teams are boosting sales. Churches are conducting classes and recommending for their members. By focusing their energy on one thing at a time people are living more rewarding lives by building their

careers, strengthening their finances, losing weight and getting in shape, deepening their faith, and nurturing stronger marriages and personal relationships. YOU WANT LESS. You want fewer distractions and less on your plate. The daily barrage of e-mails, texts, tweets, messages, and meetings distract you and stress you out. The simultaneous demands of work and family are taking a toll. And what's the cost? Second-rate work, missed deadlines, smaller paychecks, fewer promotions--and lots of stress. AND YOU WANT MORE. You want more productivity from your work. More income for a better lifestyle. You want more satisfaction from life, and more time for yourself, your family, and your friends. NOW YOU CAN HAVE BOTH — LESS AND MORE. In *The ONE Thing*, you'll learn to * cut through the clutter * achieve better results in less time * build momentum toward your goal* dial down the stress * overcome that overwhelmed feeling * revive your energy * stay on track * master what matters to you *The ONE Thing* delivers extraordinary results in every area of your life--work, personal, family, and spiritual. WHAT'S YOUR ONE THING?

A Memoir Harper Collins
Instant New York Times bestseller · Empowering advice for overcoming setbacks from the authors of the popular blog *Marc & Angel Hack Life* Marc and Angel Chernoff have become go-to voices in the area of personal development, reaching tens of thousands of fans each day with their fresh and relatable insights. Now they're writing the book they wish they'd had when they needed it most. *Getting Back to Happy* reveals their strategies for changing thought patterns and daily habits to bounce back from tough times. Sharing never-before-published stories and advice, the book shows us how to harness the power of daily rituals, mindfulness, self-care, and more to overcome whatever life throws our way--in order to become our best selves.

Wasted in Engineering Princeton University Press

'Engineering padicha nalla future - If you study engineering, you will have a good future.' This is a claim often repeated to children and teenagers by parents and teachers in many parts of India. But only those who have gone through an

engineering college life know that it's not completely true. There is a difference between calling yourself as an engineering graduate and an engineer. India produces millions of engineering graduates like you and me but only very few of us are actual engineers. Many of us just graduate with an engineering degree, with an artistic dream in mind. What do you think is the difference between engineers in many countries around the world and engineers from India? In other countries, if David Pascal studied electrical engineering in college, few years later you can find him working as an electrical engineer. In India, if Ram Krishnamurthy studied electrical engineering, few years later you can find him working in a completely irrelevant field like software coding, banking, photography and even movie directing. This book is not about the few engineering students in your class who love engineering. I don't hate them. In fact, I am very jealous that they study what they love. This book is about the majority of engineering graduates whose lives are wasted in engineering and is intended to tell you why you should make an attempt in pursuing your real passion, instead of

being suffocated under the weight of an engineering degree. This is a story of India's Youth. Welcome to India, the land of Wasted Engineers.

An Action Agenda for Reform SAGE Publishing India

An electrifying biography of one of the most extraordinary scientists of the twentieth century and the world he made. The smartphones in our pockets and computers like brains. The vagaries of game theory and evolutionary biology. Nuclear weapons and self-replicating spacecrafts. All bear the fingerprints of one remarkable, yet largely overlooked, man: John von Neumann. Born in Budapest at the turn of the century, von Neumann is one of the most influential scientists to have ever lived. A child prodigy, he mastered calculus by the age of eight, and in high school made lasting contributions to mathematics. In Germany, where he helped lay the foundations of quantum mechanics, and later at Princeton, von Neumann's colleagues believed he had the

fastest brain on the planet—bar none. He was instrumental in the Manhattan Project and the design of the atom bomb; he helped formulate the bedrock of Cold War geopolitics and modern economic theory; he created the first ever programmable digital computer; he prophesized the potential of nanotechnology; and, from his deathbed, he expounded on the limits of brains and computers—and how they might be overcome. Taking us on an astonishing journey, Ananyo Bhattacharya explores how a combination of genius and unique historical circumstance allowed a single man to sweep through a stunningly diverse array of fields, sparking revolutions wherever he went. *The Man from the Future* is an insightful and thrilling intellectual biography of the visionary thinker who shaped our century.

THE ART AND SCIENCE OF ECONOMIC POLICY

Read Out Loud Publishing LLP

As a child, Biddu dreamt of going west and making it big as a composer. At the age of sixteen, he formed a band and started playing in a cafe in Bangalore, his home town. At eighteen, he was part of a

popular act at Trinca's, a nightclub in Calcutta devoted to food, wine and music. At nineteen, he had college students in Bombay dancing to his music. In his early twenties, he left the country and ended up hitchhiking across the Middle East before arriving in London with only the clothes on his back and his trusty guitar. What followed were years of hardship and struggle but also great music and gathering fame. From the nine million selling "Kung Fu Fighting" to the iconic youth anthem of "Made in India" and the numerous hits in between. Biddu's music made him a household name in India and elsewhere. In this first public account of all that came his way: the people, the events, the music tours and companies Biddu writes with a gripping sense of humor about his remarkable journey with its fairy tale ending. Charming, witty, and entirely likable, Biddu is a man you are going to enjoy getting to know.

An Action Agenda for Reform
Getting India Back on Track
An Action Agenda for Reform
How many, in a Mumbai room full of

Hermes ties and finance whizkids, are Dalit? What if Mahesh Bhatt's son, David Headley's friend, had been a Muslim? Why is Delhi getting better as a city and Mumbai going downhill? When did the Congress first start shrinking its prime minister? When did it become clear that Narendra Modi would take over his party? Who are the HMTs? And what does an angry Arvind Kejriwal say about us? Raising such questions is the hallmark of Shekhar Gupta's National Interest, the most eagerly awaited news and current affairs column in Indian journalism. Informed by three decades and more of formidable reporting and a credibility that gives Gupta unrivalled access to decision makers in government, politics and business, the best of these columns in Anticipating India explain and interpret, provoke and predict change for more than a billion people. A riveting first draft of modern Indian history, Anticipating India interprets everything from the successes and failings of Atal Bihari Vajpayee and Manmohan Singh to the ascent of Rahul Gandhi, Narendra Modi and Arvind Kejriwal, from the forces that have deepened Indian federalism and

constitutionalism to the public mood that keeps a check on excesses in the use of political power. Each chapter in Anticipating India, in its questioning of power, its use and abuse, carries within it ideas of India that challenge conventional wisdom, shatter stereotypes and, in the end, question our long-held assumptions of who we are as a nation and a people. *Landscaping Your Life to Get Back on Track* Simon and Schuster How can India become a great country once again, is the question explored in this book. In the past, India had significant achievements in science, technology, mathematics and business. A failure to build robust institutional networks of information and trust and indifference of the state to business communities, brought all that crashing down within a generation. Many of these historical patterns persist till today. The ability to create wealth has everything to do with such networks. There was never any shortage of innovation in India. What was lacking was the ability to learn from their own experience. The building of learning networks and a learning ecosystem that could be used by people to leverage

success – this is what is needed to unlock the huge talent pool that India possesses. This book addresses young, educated and aspiring Indians in different walks of life who are interested in contemporary issues relating to nation, society and economy. It puts forward some solutions to the problems that India faces. It would be of interest to anyone who would like to know how history can teach us to re-write the Indian growth story and to re-build a great nation. The book could also be used as reading material for students of history, political science, public administration, business administration, in under-graduate and post-graduate classes. Please note: This title is co-published with Manohar Publishers, New Delhi. Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka

There are a lot of redundant processes in schools. We need to take a hard look at these and consider whether they are adding value to the core purpose of schools. We need to apply Greg McKeown's 'disciplined pursuit of less' in order to create the time and space to do deep, satisfying work on the curriculum. This means that there will be some hard choices and recognise that if we cannot do everything, we need to move to a space which acknowledges there will be trade offs. This is more than a workload issue, it is about focusing our efforts on the most important agenda item in schools today - the development of an ambitious curriculum for every child, in every school.

Getting Back On Track Westland

"India is probably in the middle of the most reform-friendly phase in its history open to conceptions that can help transform the nation faster, put it on a stronger firmament to help it leap higher. This book, a collection of ideas, by one of India's foremost thinkers, marries his deep academic understanding with the rich practical experience; The penetrating

macroeconomic analysis with the intricate microeconomic observations; And the vast knowledge of the governance ecosystem with the challenging requirements of the governed. Be it simplifying and reforming the legal structures and statutes, decentralisation to boost the quality of governance, upgrading the parameters of data collection for mapping administrative performance and improving its efficiency or promoting the cause of a better and streamlined railway system, the ideas captured in this book present a fresh and inspiring result-based approach to the pressing problems India faces today. Innovative, precise and practical, solutions offered in this book are a treasure trove, not just for India, but other developing countries of the world too, for both their constitutional arms as also the civil society."

Challenge and Strategy W. W. Norton & Company

Why were some countries able to build "developmental states" in the decades after World War II while others were not? Through a richly detailed examination of India's experience, *Locked in Place* argues that the critical factor was the reaction of

domestic capitalists to the state-building project. During the 1950s and 1960s, India launched an extremely ambitious and highly regarded program of state-led development. But it soon became clear that the Indian state lacked the institutional capacity to carry out rapid industrialization. Drawing on newly available archival sources, Vivek Chibber mounts a forceful challenge to conventional arguments by showing that the insufficient state capacity stemmed mainly from Indian industrialists' massive campaign, in the years after Independence, against a strong developmental state. Chibber contrasts India's experience with the success of a similar program of state-building in South Korea, where political elites managed to harness domestic capitalists to their agenda. He then develops a theory of the structural conditions that can account for the different reactions of Indian and Korean capitalists as rational responses to the distinct development models adopted in each country. Provocative and marked by clarity of prose, this book is also the first historical study of India's post-colonial industrial strategy. Emphasizing the

central role of capital in the state-building process, and restoring class analysis to the core of the political economy of development, *Locked in Place* is an innovative work of theoretical power that will interest development specialists, political scientists, and historians of the subcontinent.

Making India Great Again Simon and Schuster

The National Institution for Transforming India, also called NITI Aayog, is the premier policy 'Think Tank' of the Government of India, providing both directional and policy inputs. Niti Aayog has an initiative known as the Young Professionals (YPs) program. Some YPs join Niti Aayog immediately after completing higher education others have a few years of experience and come from a diverse and varied background (in terms of region, ethnicity, gender, caste and religion). 20 YPs were invited to write brief essays on what they would like India to be like in 2047, focusing on what interested them personally and individually.

Solving Technology's People Problem Rupa Publications

A timely call to reshape government

through technology, from Nandan Nilekani and Viral Shah, two leading experts in the field. For many aspects of how our countries are run - from social security and fair elections to communication, infrastructure and the rule of law - technology can play an increasingly positive, revolutionary role. In India, for example, where many underprivileged citizens are invisible to the state, a unique national identity system is being implemented for the first time, which will help strengthen social security. And throughout the world, technology is essential in the transition to clean energy. This book, based on the authors' collective experiences working with government, argues that technology can reshape our lives, in both the developing and developed world, and shows how this can be achieved. Praise for Nandan Nilekani: 'A pioneer . . . one of India's most celebrated technology entrepreneurs' *Financial Times* 'There is a bracing optimism about Nilekani's analysis . . . which can only be welcome in this age of doom and gloom' *Telegraph* 'The Bill Gates of Bangalore . . . Nilekani achieves an impressive breadth' *Time* Nandan Nilekani is a software

entrepreneur, Co-founder of Infosys Technologies, and the head of the Government of India's Technology Committee. He was named one of the '100 Most Influential People in the World' by *TIME* magazine and *Forbes*' 'Business Leader of the Year', and he is a member of the World Economic Forum Board. Viral B. Shah is a software expert who has created various systems for governments and businesses worldwide.

THE GOOD FIGHT

Rupa Publications India

A guide to using the metaphorical language of a "stuck" situation to discover the solution • Shares an easy, fun process of exploring well-known sayings as a means to identify new solutions and get unstuck in life and work • Explains how to bring clarity to a problem, highlight alternative perspectives, bypass any conscious resistance to finding a solution, and allow solutions to emerge organically, from within ourselves • Details the author's "Landscaping Your Life" method, which has been used successfully in business strategy development, team development, project problem resolution,

and in one-to-one coaching If you can't see the wood for the trees, feel like a fish out of water, or are going around in circles, we've got good news for you: that saying is also a clue to where you'll find the solution. Yes, you read right--you can use the language you're using to describe the stuck situation to discover the solution. It's not even the language as much as the landscape contained within your description of the situation that can give you pointers. As Alison Smith explains, "If a picture paints a thousand words, then a metaphor paints a thousand pictures. In other words, the metaphor in the saying you're using will provide a million words that will undoubtedly have the solution contained within them." That's what this book is all about--taking these sayings that you're using to describe being stuck and using them to get unstuck again. The language you apply provides clues to how you perceive the current situation. Subconsciously, you know the solution. Exploring the metaphors contained within your language allows your subconscious to communicate to your conscious awareness more easily. The metaphor reduces resistance and the

barriers we put up to change. It's as if we enjoy exploring the metaphor and forget what it means in reality, and before we know it, we have a metaphorical solution that we cannot help but translate into real life. Offering an effective, easy process based on the power of metaphors, Alison Smith introduces her "Landscaping Your Life" method as a means to bring clarity to a problem, highlight alternative perspectives, and allow solutions to emerge organically, from within ourselves. *Both/And* Notion Press

The #1 New York Times bestseller. Over 4 million copies sold! *Tiny Changes, Remarkable Results* No matter your goals, *Atomic Habits* offers a proven framework for improving--every day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change, but because you have the wrong system for change.

You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master their craft and vault to the top of their field. Learn how to:

- make time for new habits (even when life gets crazy);
- overcome a lack of motivation and willpower;
- design your environment to make success easier;
- get back on track when you fall off course; ...and much more.

Atomic Habits will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits--whether you are a team looking to win a championship, an

organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal.

Reset Penguin

NEW YORK TIMES BESTSELLER • NATIONAL BOOK AWARD WINNER • NAMED ONE OF TIME'S TEN BEST NONFICTION BOOKS OF THE DECADE "Inspiring . . . extraordinary . . . [Katherine Boo] shows us how people in the most desperate circumstances can find the resilience to hang on to their humanity. Just as important, she makes us care."—People "A tour de force of social justice reportage and a literary masterpiece."—Judges, PEN/John Kenneth Galbraith Award ONE OF THE TEN BEST BOOKS OF THE YEAR BY The New York Times • The Washington Post • O: The Oprah Magazine • USA Today • New York • The Miami Herald • San Francisco Chronicle • Newsday In this breathtaking book by Pulitzer Prize winner Katherine Boo, a bewildering age of global change and inequality is made human through the dramatic story of families striving toward a better life in Annawadi, a makeshift settlement in the shadow of luxury hotels

near the Mumbai airport. As India starts to prosper, the residents of Annawadi are electric with hope. Abdul, an enterprising teenager, sees "a fortune beyond counting" in the recyclable garbage that richer people throw away. Meanwhile Asha, a woman of formidable ambition, has identified a shadier route to the middle class. With a little luck, her beautiful daughter, Annawadi's "most-everything girl," might become its first female college graduate. And even the poorest children, like the young thief Kalu, feel themselves inching closer to their dreams. But then Abdul is falsely accused in a shocking tragedy; terror and global recession rock the city; and suppressed tensions over religion, caste, sex, power, and economic envy turn brutal. With intelligence, humor, and deep insight into what connects people to one another in an era of tumultuous change, *Behind the Beautiful Forevers*, based on years of uncompromising reporting, carries the reader headlong into one of the twenty-first century's hidden worlds—and into the hearts of families impossible to forget. WINNER OF: The PEN Nonfiction Award • The Los Angeles Times Book Prize • The

American Academy of Arts and Letters Award • The New York Public Library's Helen Bernstein Book Award NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New Yorker • People • Entertainment Weekly • The Wall Street Journal • The Boston Globe • The Economist • Financial Times • Foreign Policy • The Seattle Times • The Nation • St. Louis Post-Dispatch • The Denver Post • Minneapolis Star Tribune • The Week • Kansas City Star • Slate • Publishers Weekly

The Challenges of the Modi-Jaitley Economy Random House India

While a growing private sector and a vibrant civil society can help compensate for the shortcomings of India's public sector, the state is—and will remain—indispensable in delivering basic governance. In *Rethinking Public Institutions in India*, distinguished political and economic thinkers critically assess a diverse array of India's core federal institutions, from the Supreme Court and Parliament to the Election Commission and the civil services. Relying on interdisciplinary approaches and decades of practitioner experience, this volume interrogates the capacity of India's public

sector to navigate the far-reaching transformations the country is experiencing. An insightful introduction to

the functioning of Indian democracy, it offers a roadmap for carrying out

fundamental reforms that will be necessary for India to build a reinvigorated state for the twenty-first century.
