Brown has taught us
what it means to dare
greatly, rise strong,
and brave the
wilderness. Now, based
on new research
conducted with
leaders, change
makers, and culture
shifters, she's showing
us how to put those
ideas into practice so

we can step up and lead. Look for Brené Brown's new podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into

vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven

years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a

collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

SMALL ACTS OF LEADERSHIP

Legacy Isle Publishing
Positive leaders are

able to dramatically expand their people's—and their own—capacity for excellence. And they accomplish this without enormous expenditures or huge heroic gestures. Here leading scholars—including Adam Grant, author of the bestselling *Give and Take*; positive organizational scholarship movement cofounders Kim Cameron and Robert Quinn; and thirteen more—describe how this is being done at companies such as Wells Fargo, Ford, Kelly Services, Burt's Bees, Connecticut's Griffin Hospital, the Michigan-based Zingerman's Community of Businesses, and many others. They show that, like the butterfly in Brazil whose flapping

wings create a typhoon in Texas, you can create profound positive change in your organization through simple actions and attitude shifts.

"Across the realms of civic and private enterprise alike, bureaucracies vitally impact our security, freedoms, and everyday life. With so much at stake, competence, efficiency, and fiscal prudence are essential, yet Americans know these institutions fall short. Many despair that they are too big and too hard to reform. Robert Gates disagrees. Having led change successfully at three monumental organizations -- the

CIA, Texas A & M University, and the Department of Defense -- he offers an insider's look at how major bureaus, organizations, and companies can be transformed. Gates includes advice on tailoring reform to the operative culture (we see how Gates worked within the system to increase diversity at Texas A & M); effecting change within committees; engaging the power of compromise ("In the real world of bureaucratic institutions, you almost never get all you want when you want it"); and listening and responding to your team" (ed.).

Best practices for using accountability, trust, and purpose to turn your long-term vision into reality
Accountability explains why the "carrot-and-stick" approach doesn't work—and describes how to build and sustain a culture based on shared beliefs, positive action, and internal leadership development. The

author's conclusions are based on data resulting from his work with more than 3,000 executives worldwide, plus exclusive interviews with Fortune's Most Admired Companies and Best Places to Work. Greg Bustin has written a monthly bulletin about leadership and accountability that goes to more than 4,000 managers/executives. He speaks about 50 times per year in the U.S., Canada, and the UK and is one of the top-rated Vistage speakers. He also gives workshops and webinars on planning, execution, and accountability to business owners and leaders in the U.S. and Canada.

The success of any leadership is all too often pointed to the characteristics of good leadership. The reality is that many of us are fully aware of the qualities of a good leader. Book after book in the pastoral community may light the path to good leadership but rarely gives us the markers that allow us to discern if we are still moving in the right direction. Big Results: Leadership tackles that obstacle by guiding our future leaders in their early steps but also points to the “results” of that kind of leadership. The main take away from this read is that God-centered leadership always yields big

results.

In 2009, Simon Sinek

started a movement to

help people become

more inspired at work,

and in turn inspire their

colleagues and

customers. Since then,

millions have been

touched by the power

of his ideas, including

more than 28 million

who've watched his

TED Talk based on

START WITH WHY -- the

third most popular TED

video of all time. Sinek

starts with a

fundamental question:

Why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who've had the greatest influence in the world all think, act, and communicate the same way -- and it's

the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

The DUH! Book of Management and Supervision

Routledge
The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good

companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock

returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting

through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you

combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings? Accountability: The Key to Driving a High-Performance Culture Simon & Schuster

Gives trainers information they need to teach and apply leadership competencies participants need. Featuring adaptable exercises on a range of leadership topics, this collection of activities is an all-in-one resource for trainers seeking to prepare leaders.

Essential Advice for

New Managers
"O'Reilly Media, Inc."
Now an epic documentary event on the HISTORY Channel! The illuminating, bestselling exploration on leadership from Pulitzer Prize-winning author and presidential historian Doris Kearns Goodwin, and also the inspiration for the HISTORY Channel multipart series Abraham Lincoln and Theodore Roosevelt. "After five decades of magisterial output, Doris Kearns Goodwin leads the league of presidential historians" (USA TODAY). In her "inspiring" (The Christian Science Monitor) Leadership, Doris Kearns Goodwin draws upon the four presidents she has studied most closely—Abraham Lincoln, Theodore

Roosevelt, Franklin D. Roosevelt, and Lyndon B. Johnson (in civil rights)—to show how they recognized leadership qualities within themselves and were recognized as leaders by others. By looking back to their first entries into public life, we encounter them at a time when their paths were filled with confusion, fear, and hope. Leadership tells the story of how they all collided with dramatic reversals that disrupted their lives and threatened to shatter forever their ambitions. Nonetheless, they all emerged fitted to confront the contours and dilemmas of their times. At their best, all four were guided by a sense of moral purpose. At moments of great challenge,

they were able to summon their talents to enlarge the opportunities and lives of others. Does the leader make the times or do the times make the leader? “If ever our nation needed a short course on presidential leadership, it is now” (The Seattle Times). This seminal work provides an accessible and essential road map for aspiring and established leaders in every field. In today’s polarized world, these stories of authentic leadership in times of apprehension and fracture take on a singular urgency. “Goodwin’s volume deserves much praise—it is insightful, readable, compelling: Her book arrives just in time” (The Boston Globe).

Dare to Lead Berrett-Koehler Publishers

You are a leader. Even if you don't realize it, you inherently have influence on your world and the people around you. Bigger Than

Leadership: Stories of Influence, Intention, and Inspiration explores what it means to be an intentional everyday leader.

Through more than eighty-five individual stories, including those of John Norlin, Houston Kraft, and Drew Dudley, author Brittany Do shows us: How being your authentic self, living uncomfortably, and taking chances actually pays off in the end How being intentional, in even the smallest of positive actions, has more impact than you may originally think How you can work collectively with others for the benefit of all Life and leadership are intertwined, even in the often small, mundane moments. Although every human's journey to

leadership is unique as we flow in and out of each other's lives, there is much to learn from our peers. Do's Bigger Than Leadership aims to arm readers with a diverse arsenal of inspiration and show how you, yes you, are a leader. Quick, Fun Activities for Building Morale, Communication and Team Spirit Penguin

The authors of this book explain the differences between managing by the 3-Ps (Proximity, Position, and Persuasion) and the 3-Cs (Clarity, Consistency, and Connectivity). Leaders who employ the 3-Ps manage with a focus on the individual. Leaders who use the 3-Cs, however, manage by weaving personal leadership techniques with a process of

managing the business or organization that has proven extremely effective during the decade since it was introduced. It's a way to lead a company or organization that leaves a legacy of sustained growth and success for those who come after the leader to latch onto and continue. The book is written as a business novel. What is learned on the protagonist's journey is expanded upon in a lesson at the conclusion of each chapter. Readers are then invited to assess their own legacy potential by completing a self-assessment. The management process this book contains is now being employed successfully not only by small and medium size businesses, but

also by Fortune 500 municipalities, and the
companies, successful United States Army.
