Ellyse Perry 3: Winning Touch Koala Books

What was life like millions of years ago? The answer lies deep underground, in a place once home to a ferocious predator much larger than most animals walking around today. Through photographs and detailed illustrations, readers will learn how the secrets buried in a midwestern hillside helped scientists understand early life on Earth. This book's simple but informative format allows readers to follow along as paleontologist Matt Forir and his team of experts unravel a prehistoric mystery.

NATIONAL BESTSELLER • In this extraordinary book, the world's most extraordinary distance swimmer writes about her emotional and spiritual need to swim and about the almost mystical act of swimming itself. Lynne Cox trained hard from age nine, working with an Olympic coach, swimming five to twelve miles each day in the Pacific. At age eleven, she swam even when hail made the water "like cold tapioca pudding" and was told she would one day swim the English Channel. Four years later—not yet out of high school—she broke the men's and women's world records for the Channel swim. In 1987, she swam the Bering Strait from America to the Soviet Union—a feat that, according to Gorbachev, helped diminish tensions between Russia and the United States. Lynne Cox's relationship with the water is almost mystical: she describes swimming as flying, and remembers

swimming at night through flocks of flying fish the size of mockingbirds, remembers being escorted by a pod of dolphins that came to her off New Zealand. She has a photographic memory of her swims. She tells us how she conceived of, planned, and trained for each, and re-creates for us the experience of swimming (almost) unswimmable bodies of water, including her most recent astonishing one-mile swim to Antarctica in thirty-two-degree water without a wet suit. She tells us how, through training and by taking advantage of her naturally plump physique, she is able to create more heat in the water than she loses. Lynne Cox has swum the Mediterranean, the three-mile Strait of Messina, under the ancient bridges of Kunning Lake, below the old summer palace of the emperor of China in Beijing. Breaking records no longer interests her. She writes about the ways in which these swims instead became vehicles for personal goals, how she sees herself as the lone swimmer among the waves, pitting her courage against the odds, drawn to dangerous places and treacherous waters that, since ancient times, have challenged sailors in ships.

"Among the greatest unresolved issues within schools is developing great models of implementation: Sprints is certainly one of the breakthroughs. This book can make major improvements in schools and classrooms, ironically by focusing on tiny shifts." John Hattie, Laureate Professor Melbourne Graduate School of Education Melbourne, Australia "Once in a while you come across a book that really cuts through the complexity of issues and provides a refreshing and practical approach to improving what happens in schools. This is such a book. Evidence-based, easy to read and full of down-to-earth ideas that busy teachers can implement. I love it." Steve Munby, Visiting Professor University College London Former CEO, National College for School Leadership London, UK Enhance teachers' expertise - in every term, every school year. With all of the everyday

demands of teaching, the job of improving classroom practice is a challenge for teachers and school leaders. Grounded by research and field-tested around the world, Teaching Sprints offers a professional improvement process that works in theory and practice. Including insights from the field, and practical protocols, this book outlines a simple model for engaging in short bursts of evidence-informed improvement work. Using Teaching Sprints, teams of teachers can enhance their expertise together, in a way that is sustainable on the ground. In Teaching Sprints, readers will find:

- three big ideas about practice improvement
- a detailed description of a simple improvement process
- advice on how to establish a routine for continual improvement

Whether you're a classroom teacher thinking about your own practice, an instructional leader supporting colleagues to teach better tomorrow, or a school leader interested in enhancing your program for professional learning, Teaching Sprints is a must-read for you.

Acronym agglomeration is an affliction of the age, and there are acronym addicts who, in their weakness, find it impossible to resist them. More than once in recent months my peers have cautioned me about my apparent readiness to use not only acronyms, but abbreviations, foreignisms, codes, and other cryptic symbols rather than common, ordinary American words. Many among us, though, either have not received or have chosen to ignore such advice. As a consequence, what we write and speak is full of mystery and confusion. It is then for the reader and listener and for the writer and speaker that Reta C. Moser has compiled this guide. Its effective application to the art of communication is urged. Such use should help avoid many of the misunderstandings involving terminology which occur daily. Although such misunderstandings are certainly crucial in humanistic and social situations, they are often of immediate import and the trigger to disaster in scientific, technical, and political situations. Some 15,000 acronyms and 25,000 definitions are provided (a 50- and 47 -percent increase over the 1964 edition!), with due credit to Miss Moser's diligence in making the compilation and with the acknowledgment that the acronymical phenomenon is very much with us. This edition, like the first, is certain to be of value to writers, librarians, editors, and others who must identify and deal with acronyms.

This book explores the transformation of cultural and national identity of global sports fans in South

Korea, which has undergone extensive cultural and economic globalization since the 1990s. Through ethnographic research of Korean Major League Baseball fans and their online community, this book demonstrates how a postcolonial nation and its people are developing long-distance affiliation with American sports accompanied by nationalist sentiments and regional rivalry. Becoming an MLB fan in South Korea does not simply lead one to nurturing a cosmopolitan identity, but to reconstituting one's national imaginations. Younghan Cho suggests individuated nationalism as the changing nature of the national among the Korean MLB fandom in which the national is articulated by personal choices, consumer rights and free market principles. The analysis of the Korean MLB fandom illuminates the complicated and even contradictory procedures of decentering and fragmenting nationalism in South Korea, which have been balanced by recalling nationalism in combination with neoliberal governmentality.

one of Australia's most exceptional athletes. Ellyse Perry is among the all-time cricket greats, and the only player, female or male, to represent Australia in both cricket and football World Cups, making her international debut in both sports at the age of 16. *Perspective* is about sitting back from the world you're involved in and evaluating what it means to you. What are the important things that you know make experiences special? What are the things that motivate you? What are the things that give you joy? The things that challenge you but, ultimately, make you a better person? Most importantly, who are the people whose unwavering help and support you couldn't go without? From the lessons of a high-performance athlete's career to appreciating the small things in life, this inspiring illustrated book features stories and reflections from Ellyse's childhood and career on the themes of dreaming, belief, work, resilience, appreciation, opportunity, balance and perseverance - and their importance in everything we do. This empowering book is a unique view from one of Australia's most admired sports stars about what it is to be an elite athlete.

On 14th June 2017, Grenfell Tower was in flames. I realised the tragedy of Grenfell was happening on my doorstep, I instinctively grabbed my camera. The devastating scene that I had watched unfold on television was just five minutes' walk from my former home. I was determined to play a part in the relief effort and felt from the outset that this was a situation I had to document.
