Chinese, Japanese, South (and North) Koreans in East Asia have a long, intertwined and distinguished cultural history and have achieved, or are in the process of achieving, spectacular economic success. Together, these three peoples make up one quarter of the world population. They use a variety of unique and fascinating writing systems: logographic Chinese characters of ancient origin, as well as phonetic systems of syllabaries and alphabets. The book describes, often in comparison with English, how the Chinese, Korean and Japanese writing systems originated and developed; how each relates to its spoken language; how it is learned or taught; how it can be computerized; and how it relates to the past and present literacy, education, and culture of its users. Intimately familiar with the three East Asian cultures, Insup Taylor with the assistance of Martin Taylor, has written an accessible and highly readable book. Writing and Literacy in Chinese, Korean and Japanese is intended for academic readers (students in East Asian Studies, linguistics, education, psychology) as well as for the general public (parents, business, government). Readers of the book will learn about the interrelated cultural histories of China, Korea and Japan, but mainly about the various writing systems, some exotic, some familiar, some simple, some complex, but all fascinating.

COMPARATIVE SOCIOLOGY OF EXAMINATIONS

Disha Publications

This is a study of higher education in the world's four largest developing economies—Brazil, Russia, India, and China. Already important players globally, by mid-century, they are likely to be economic powerhouses. But whether they reach that level of development will depend in part on how successfully they create quality higher education that puts their labor forces at the cutting edge of the information society. Using an empirical, comparative approach, this book develops a broad picture of the higher education system in each country in the context of both global and local forces. The authors offer insights into how differing socioeconomic and historic patterns of change and political contexts influence developments in higher education. In asking why each state takes the approach that it does, this work situates a discussion of university expansion and quality in the context of governments' educational policies and reflects on the larger struggles over social goals and the distribution of national resources.
