Engaging Writing, a newly expanded two-level series, gives students the concepts and skills they need for success in academic writing. Engaging Writing provides clear, step-by-step instruction in the writing process, focusing first on paragraphs (Engaging Writing 1) and progressing to essays (Engaging Writing 2). Engaging Writing fully supports the needs of intermediate to advanced ESL learners. Features of the new edition of Engaging Writing 2: Introductory readings establish chapter themes and provide context for vocabulary exercises. Case studies of student writing provide realistic models of the writing process. Part I contains thematically-oriented, process-based writing instruction updated with fresh models and exercises. Chapter 1 reviews paragraph writing and Chapters 2-5 guide students in writing essays using various rhetorical models. Part II highlights the issue of academic honesty and shows students how to quote, paraphrase, summarize, cite, and incorporate source material. Appendices provide comprehensive grammar and mechanics review for reference and practice. Together Engaging Writing 1 and 2 feature a solid pedagogical core, using clearly presented and logically sequenced rhetorical, grammatical, and lexical teaching points supported by high-interest activities.

Scales describing language proficiency in a series of levels can provide orientation for educational programmes, criteria for assessment, and reporting to stakeholders. However, in most cases such instruments are produced just by expert opinion. A scale of language proficiency actually implies a descriptive scheme related to theory but usable by practitioners. It also implies a methodology for scaling content to different levels. This book describes the use of both qualitative and quantitative techniques to develop scales for the «Common Reference Levels» in the Common European Framework of Reference for modern languages. Short stand-alone descriptors were (i) developed and classified, (ii) refined and elaborated in workshops, and then (iii) scaled by analyzing the

judgments of one hundred teachers on the English language proficiency of the learners in their classes.
