The secrets behind

China's extraordinary educational system – good, bad, and ugly Chinese students' consistently stunning performance on the international PISA exams— where they outscore students of all other nations in math, reading, and science—have positioned China as a world education leader. American educators and pundits have declared this a "Sputnik Moment," saying that we must learn from China's education system in order to maintain our status as an education leader and global superpower. Indeed, many of the reforms taking hold in United States schools, such as a greater emphasis on standardized testing and the increasing importance of core

subjects like reading and math, echo the Chinese system. We're following in China's footsteps—but is this the direction we should take? Who's Afraid of the Big Bad Dragon? by award-winning writer Yong Zhao offers an entertaining, provocative insider's account of the Chinese school system, revealing the secrets that make it both "the best and worst" in the world. Born and raised in China's Sichuan province and a teacher in China for many years, Zhao has a unique perspective on Chinese culture and education. He explains in vivid detail how China turns out the world's highest-achieving students in reading, math, and science—yet by all accounts Chinese

educators, parents, and political leaders hate the system and long to send their kids to western schools. Filled with fascinating stories and compelling data, *Who's Afraid of the Big Bad Dragon?* offers a nuanced and sobering tour of education in China. Learn how China is able to turn out the world's highest achieving students in math, science, and reading. Discover why, despite these amazing test scores, Chinese parents, teachers, and political leaders are desperate to leave behind their educational system. Discover how current reforms in the U.S. parallel the classic Chinese system, and how this could help (or hurt) our students' prospects.

The Korean labour migration system has

expanded since the mid-2000s, primarily in the admission of temporary foreign workers for less skilled jobs. Its temporary labour programme, addressed largely at SMEs in manufacturing and based on bilateral agreements with origin countries, has become the largest such programme in the OECD. Structural changes in the labour force, with a rapidly shrinking and highly educated youth population, keep the underlying demand for this programme strong. Yet skills levels of workers are increasing, and there is interest in increasing Korea's share in global talent mobility, including international students and innovative entrepreneurs. This book addresses the

question of how to ensure that international recruitment can help meet urgent needs in the labour market which cannot be met locally, and how the temporary labour migration programme - and other migration streams - can evolve to ensure that Korea meets its policy objectives. This review first examines the characteristics of the Korean labour market and main challenges where labour migration can help address demand. Following a discussion of various programmes and procedures, the review assesses how labour migration is playing a role in different sectors and how programme governance could be improved. It then explores the channels

for high-skilled migrants and how these could be improved in light of international experience.

**Korean Language for Beginners** Financial Times/Prentice Hall  
A “fascinating” (The Economist) dive into the world of linguistics that is “part travelogue, part science lesson, part intellectual investigation...an entertaining, informative survey of some of the most fascinating polyglots of

our time” (The New York Times Book Review). In *Babel No More*, Michael Erard, “a monolingual with benefits,” sets out on a quest to meet language superlearners and make sense of their mental powers. On the way he uncovers the secrets of historical figures like the nineteenth-century Italian cardinal Joseph Mezzofanti, who was said to speak seventy-two languages, as well as those of living language-superlearners such as Alexander Arguelles, a modern-day polyglot who knows dozens of languages and shows Erard the tricks of the trade to give him a dark glimpse into the life of obsessive language acquisition. With his ambitious

examination of what language is, where it lives in the brain, and the cultural implications of polyglots' pursuits, Erard explores the upper limits of our ability to learn and use languages and illuminates the intellectual potential in everyone. How do some people escape the curse of Babel—and what might the gods have demanded of them in return?
