PROCESS RESEARCH

National Academies Press
This book constitutes the refereed proceedings of the 18th International Conference on Product-Focused Software Process Improvement, PROFES 2017, held in Innsbruck, Austria, in

November/December 2017. The 17 revised full papers presented together with 10 short papers, 21 workshop papers, 3 posters and tool demonstrations papers, and 4 tutorials were carefully reviewed and selected from 72 submissions. The papers

are organized in topical sections on : Agile software Development; Data science and analytics; Software engineering processes and frameworks; Industry relevant qualitative research; User and value centric approaches; Software startups; Serum; Software testing.

The Semantic Web: ESWC 2017 Satellite Events

Vernon Press

This book contains the refereed proceedings of the 14th International Conference on Knowledge Management in

Organizations, KMO 2019, held in Zamora, Spain, in July 2019. The 46 papers accepted for KMO 2018 were selected from 109 submissions and are organized in topical sections on: knowledge management models and analysis; knowledge transfer and learning; knowledge and service innovation; knowledge creation; knowledge and organization; information systems and information science; data mining and intelligent science; social networks and social aspects of KM; big data

and IoT; and new trends in IT.

Virtual, Augmented and Mixed Reality IGI Global

How can we capture the words, gestures and conduct of study participants? How do we transcribe what happens in social interactions in analytically useful ways? How could systematic and detailed transcription practices benefit research? This book demonstrates how best to represent talk and interaction in a manageable and academically credible way

that enables analysis. It describes and assesses key methodological and epistemological debates about the status of transcription research while also setting out best practice for handling different types of data and forms of social interaction. Featuring transcribing basics as well as important recent developments, this book guides you through: Time and sequencing Speech delivery and patterns Non-vocal conduct Emotive displays like laughter, tears, or pain

Talk in non-English languages Helpful technological resources As the first book-length exposition of the Jeffersonian transcription conventions, this well-crafted balance of theory and practice is a must-have resource for any social scientist looking to produce high quality transcripts.

Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases

Springer Nature
A new generation of technological vaccines

protect against many infectious diseases. This book describes synthetic peptide-based vaccine prototypes – the future of vaccination. Production of peptides becomes simple using automatic synthesizers. Peptides are weak immunogen and need adjuvants to provide an effective autoimmune response, which is why peptide antigens are conjugated with biopolymers and loaded with nanoparticles. The book illustrates the use of peptides vaccine systems and makes predictions of

future development not only for infectious diseases, but also for cancers and brain diseases such as Alzheimer, Parkinson and psychiatric diseases. Key Features Summarizes current studies on technological vaccines Describes the uses of vaccines for the prevention of brain diseases Reviews the ways different polymers are used to enhance vaccine efficacy Early Childhood to Senior Secondary Elsevier Health Sciences

Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a

standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here

are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

14th International Conference, KMO 2019, Zamora, Spain, July 15-18, 2019,

Proceedings IOS Press Business Innovation driven by the advancement of technology has dramatically changed the business landscape over recent years, not only in advanced countries but also in emerging markets. It is expected that business innovation could help achieve economic inclusion, which has been a global initiative over the last decade, creating opportunities for all people to benefit from the economic development. These proceedings

provide an outlet for discussing the importance of business innovation, especially in emerging countries in helping to reach inclusive economies. The papers cover the subject areas management, accounting, finance, economics and social sciences.

Wiley

The hypothalamic-pituitary-adrenal axis controls reactions to stress and regulates various body processes such as digestion, the

immune system, mood and sexuality, and energy usage. This volume focuses on the role it plays in the immune system and provides substantive experimental and clinical data to support current understanding in the field, and potential applications of this knowledge in the treatment of disease. * Evidence presented in this book suggests that the nervous, endocrine, and immune systems form the Neuroendocrine Supersystem, which integrates all the

biological functions of higher organisms both in health and disease for their entire life cycle. * Contributors include both the scientists who initiated the work on the HPA axis and on the autonomic nervous system, and those who joined the field later.

NEW DEVELOPMENTS AND FINANCIAL APPLICATIONS

Frontiers Media SA
"The signature undertaking of the Twenty-Second Edition was clarifying the QC

practices necessary to perform the methods in this manual. Section in Part 1000 were rewritten, and detailed QC sections were added in Parts 2000 through 7000. These changes are a direct and necessary result of the mandate to stay abreast of regulatory requirements and a policy intended to clarify the QC steps considered to be an integral part of each test method. Additional QC steps were added to almost half of the sections."--Pref. p. iv.

THEORY, PRACTICE, AND CASES

SAGE

This is an engaging interdisciplinary guide to the unique role of language within ethnography. The book provides a philosophical overview of the field alongside practical support for designing and developing your own ethnographic research. It demonstrates how to build and develop arguments and engages with practical issues such as ethics, transcription

and impact. There are chapter-long case studies based on real research that will explain key themes and help you create and analyse your own linguistic data. Drawing on the authors' experience they outline the practical, epistemological and theoretical decisions that researchers must take when planning and carrying out their studies. Other key features include: A clear introduction to discourse analytic traditions Tips on how to produce effective

field notes Guidance on how to manage interview and conversational data Advice on writing linguistic ethnographies for different audiences Annotated suggestions for further reading Full glossary This book is a master class in understanding linguistic ethnography, it will of interest to anyone conducting field research across the social sciences. Design, Synthesis, Purification and Characterization Springer Die inhaltlichen Schwerpunkte des

Tagungsbands zur ATZlive-Veranstaltung Netzintegration der Elektromobilität 2018 sind u.a. folgende Fragen: Wann können Stromnetze volatile Wind- und Solarenergie speichern? Wie sind die Stromübertragungsnetze ausgelegt? Können Spitzenlastsituationen abgedeckt werden? Die Tagung ist eine unverzichtbare Plattform für den Wissens- und Gedankenaustausch von Forschern und Entwicklern aller Unternehmen und Institutionen, die

Antworten auf diese Fragen suchen.
Editorial: Best Practice Approaches for Mixed Methods Research in Psychological Science
 Elsevier
 This book links research in wine marketing/management and wine tourism, offering international and multidisciplinary perspectives. Addressing the evolving nature of the wine tourism industry and market, the book brings in new research streams and technology advances such as; social media,

customer empowerment and engagement, co-creation, social / responsible marketing and wine consumption. Each section includes an introductory chapter written by the editors discussing the aims and the chapters of the section. Section chapters provide theoretical and research based insights with practical implications, while every section is also complemented with case studies that further enrich the practice and industry implications of theory.

Researchers will find in this book a holistic analysis of research and cases relating to the management and marketing of wine tourism businesses and visitors.

Stemming from the ENEA
Young Researcher
Committee, this didactical
book comprehensively
discusses all aspects of
pituitary adenomas,
particularly the practical
aspects arising in
everyday clinical practice.
Offering valuable tips, it
serves as a guide for
young trainee
endocrinologists facing
their first cases of
pituitary adenomas. It
also includes illustrative
clinical cases of
acromegaly,
prolactinomas, Cushing's

disease, and TSHomas. In
addition, a Questions &
Answers section is
available online. The mix
of fresh enthusiasm and
well-established expertise
in the field provided by
the editors and the
committee they belong to
make the book both solid
and innovative, with an
appropriate balance
between the traditional
knowledge and the most
exciting innovations from
recent or ongoing
research. Written and
edited by young
researchers active in the
field of

neuroendocrinology, it is a valuable resource for anyone working or interested in the field.

Standard Methods for the Examination of Water and Wastewater

Courier Dover Publications
The integrity of knowledge that emerges from research is based on individual and collective adherence to core values of objectivity, honesty, openness, fairness, accountability, and stewardship. Integrity in science means that the organizations in which research is conducted

encourage those involved to exemplify these values in every step of the research process. Understanding the dynamics that support " or distort " practices that uphold the integrity of research by all participants ensures that the research enterprise advances knowledge. The 1992 report Responsible Science: Ensuring the Integrity of the Research Process evaluated issues related to scientific responsibility and the conduct of research. It provided a valuable

service in describing and analyzing a very complicated set of issues, and has served as a crucial basis for thinking about research integrity for more than two decades. However, as experience has accumulated with various forms of research misconduct, detrimental research practices, and other forms of misconduct, as subsequent empirical research has revealed more about the nature of scientific misconduct, and because technological

and social changes have altered the environment in which science is conducted, it is clear that the framework established more than two decades ago needs to be updated. Responsible Science served as a valuable benchmark to set the context for this most recent analysis and to help guide the committee's thought process. Fostering Integrity in Research identifies best practices in research and recommends practical options for discouraging

and addressing research misconduct and detrimental research practices.

MACHINE LEARNING FOR ASSET MANAGEMENT

Frontiers Media SA
This book constitutes the thoroughly refereed post-conference proceedings of the Satellite Events of the 14th European Conference on the Semantic Web, ESWC 2017, held in Portoroz, Slovenia, in May/June 2017. The volume contains 8 poster and 24

demonstration papers, selected from 105 submissions. Additionally, this book includes a selection of 13 best workshop papers. The papers cover various aspects of the semantic web. The chapter 'Scholia, Scientometrics and Wikidata' is available open access under a CC BY 4.0 license via link.springer.com. [Targeting Developmental Pathways in Inflammation and Disease](#) Springer-Verlag
This book provides a comprehensive, state-of-

the art review of pediatric oncology. The text covers relevant concepts in molecular biology and addresses technical principles, applications, challenges, and integration of current and emerging genomic and molecular methods in the diagnosis and personalized management of childhood cancers. The text also discusses a wide array of pediatric neoplasms in the context of molecular pathology in a concise and understandable manner, with focus on

their molecular pathogenesis, clinicopathological features, classification, molecular diagnosis, and approaches to personalized care. Written by experts in the field, Precision Molecular Pathology of Neoplastic Pediatric Diseases serves as a valuable resource for pathologists, pediatric oncologists, trainees and researchers with an interest in pediatric and molecular pathology. Linguistic Ethnography Frontiers Media SA For four decades,

physicians and other healthcare providers have trusted Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases to provide expert guidance on the diagnosis and treatment of these complex disorders. The 9th Edition continues the tradition of excellence with newly expanded chapters, increased global coverage, and regular updates to keep you at the forefront of this vitally important field. Meticulously updated by Drs. John E. Bennett,

Raphael Dolin, and Martin J. Blaser, this comprehensive, two-volume masterwork puts the latest information on challenging infectious diseases at your fingertips. Provides more in-depth coverage of epidemiology, etiology, pathology, microbiology, immunology, and treatment of infectious agents than any other infectious disease resource. Features an increased focus on antibiotic stewardship; new antivirals for influenza,

cytomegalovirus, hepatitis C, hepatitis B., and immunizations; and new recommendations for vaccination against infection with pneumococci, papillomaviruses, hepatitis A, and pertussis. Covers newly recognized enteroviruses causing paralysis (E-A71, E-D68); emerging viral infections such as Ebola, Zika, Marburg, SARS, and MERS; and important updates on prevention and treatment of C. difficile infection, including new tests that

diagnose or falsely over-diagnose infectious diseases. Offers fully revised content on bacterial pathogenesis, antibiotic use and toxicity, the human microbiome and its effects on health and disease, immunological mechanisms and immunodeficiency, and probiotics and alternative approaches to treatment of infectious diseases. Discusses up-to-date topics such as use of the new PCR panels for diagnosis of meningitis, diarrhea and pneumonia;

current management of infected orthopedic implant infections; newly recognized infections transmitted by black-legged ticks in the USA: *Borrelia miyamotoi* and Powassan virus; infectious complications of new drugs for cancer; new drugs for resistant bacteria and mycobacteria; new guidelines for diagnosis and therapy of HIV infections; and new vaccines against herpes zoster, influenza, meningococci. PPID continues its tradition of

including leading experts from a truly global community, including authors from Australia, Canada and countries in Europe, Asia, and South America. Features more than 1,500 high-quality, full-color photographs—with hundreds new to this edition.
2020 Annual Report
 Frontiers Media SA
 Our political system in America is broken, right? Wrong. The truth is, the American political system is working exactly how it is designed to work, and it

isn't designed or optimized today to work for us—for ordinary citizens. Most people believe that our political system is a public institution with high-minded principles and impartial rules derived from the Constitution. In reality, it has become a private industry dominated by a textbook duopoly—the Democrats and the Republicans—and plagued and perverted by unhealthy competition between the players. Tragically, it has therefore become incapable of

delivering solutions to America's key economic and social challenges. In fact, there's virtually no connection between our political leaders solving problems and getting reelected. In *The Politics Industry*, business leader and path-breaking political innovator Katherine Gehl and world-renowned business strategist Michael Porter take a radical new approach. They ingeniously apply the tools of business analysis—and Porter's distinctive Five Forces

framework—to show how the political system functions just as every other competitive industry does, and how the duopoly has led to the devastating outcomes we see today. Using this competition lens, Gehl and Porter identify the most powerful lever for change—a strategy comprised of a clear set of choices in two key areas: how our elections work and how we make our laws. Their bracing assessment and practical recommendations cut through the endless

debate about various proposed fixes, such as term limits and campaign finance reform. The result: true political innovation. *The Politics Industry* is an original and completely nonpartisan guide that will open your eyes to the true dynamics and profound challenges of the American political system and provide real solutions for reshaping the system for the benefit of all. THE INSTITUTE FOR POLITICAL INNOVATION The authors will donate all royalties from the sale of this book to the Institute

for Political Innovation.
