1st Place Gold Award in the 2015 Feathered Quill Book Program for Science Fiction/Fantasy! Finalist in the

2014 Book Pipeline Contest! Travel to the future - it will only cost you everyone you love. Attacked and injected with a drug which slows his metabolism to a fraction of normal, Martin James becomes an unwilling time traveler who hurtles through the years. His children grow up, his wife grows older, and his only hope is finding the people who injected him in the first place- not an easy task when one day for Martin lasts four years. And while Martin James strives to find a cure before everyone he loves is gone, others are uncertain if his journey can be stopped at all. W. Lawrence weaves a dystopian future filled with the best and worst of humanity, highlights the blessings and curses of technology, and pushes the limits of faith and hopelessness. Above

all, Syncing Forward is a tale of one man's love for his family, and their devotion to saving him from being lost forever.

In *Recording History*, Peter Martland uses a range of archival sources to trace the genesis and early development of the British record industry from 1888 to 1931. A work of economic and cultural history that draws on a vast range of quantitative data, it surveys the commercial and business activities of

the British record industry like no other work of recording history has before. Martland's study charts the successes and failures of this industry and its impact on domestic entertainment. Showcasing its many colorful pioneers from both sides of the Atlantic, *Recording History* is first and foremost an account of The Gramophone Company Ltd, a precursor to today's recording giant EMI, and then the most important British record company active from the late 19th century until the end of the second decade of the twentieth century. Martland's history spans the years from the original inventors through industrial and market formation and final take-off including the riveting battle in recording formats. Special attention is given to the impact of the First World

War and the that followed in its wake. Scholars of recording history will find in Martland s study the story of the development of the recording studio, of the artists who made the first records (from which some like Italian opera tenor Enrico Caruso earned a fortune), and the change records wrought in the relationship between performer and audience, transforming the reception and appreciation of musical culture. Filling a much-needed gap in scholarship, Recording History documents the beginnings of the end of the contemporary international record industry."

"...James Harvey has written an excellent book that fills a void in current metalworking instructional books. Most textbooks are aimed at the beginner in the machining trade and cover basic work practice admirably. What textbooks do not do is sit you down with a veteran of the trade who can fill you in on the tips and tricks that allow working faster, accurately and intelligently. What amazed me is at how all these tips are not recycled versions of the ones we are all familiar with (as published by Lindsay's books and others) but are new

tips, all useful and pertinent to the tools and methods of today.” Nicholas Carter

It's been called one of B.C.'s most bizarre drug cases in recent memory. A story with a cast of characters including an oddball hippy, a pot-bellied pig, an overly friendly raccoon and twenty-four black bears. Oh, and a thousand pot plants, apparently guarded by the bears.

The bust took place in August of 2010 near the Village of Christina Lake, British Columbia and the story travelled to all parts of the world, including the United States, Denmark, England, India and Russia, where a news anchor lady could not stop laughing as she read the story. The New York Post declared, "Don't Smokey near this bear." Today, Allen Piche, aka 'The Beardude', announced the release of his book, *The Beardude Story*, which chronicles his side of this strange tale.

*Dragon Born* McGraw-Hill Education

This is a memoir presented in an anthological - like format; in other words, a collection of short stories, on the life of the author. It starts when he was growing up in the Philippine countryside of Ilocos Sur province. Just like a normal

kid, he played with his friends, did crazy things, went to school and moved to Manila, for his college education. He got married while in fifth year college, but still graduated on time. This book relates his struggles, failures, as well as successes, including his coming to America. Searching for the American Dream was no picnic either, but with perseverance, he achieved some of them in modest ways. Foreigners planning to immigrate to the great ol' USA could get glimpses, on what it takes, to come and live in America.

 There have been several scientific books and lecture papers written on the

subject of our holographic universe but none have gone far enough as to expand peoples thinking and explain the true nature of reality. Music is a natural consequence of the pure mathematics within nature. Music is a true universal language as Music is vibrational physics and mathematics that is a language understood by the human mind. The silent music of the universe or Aether Physics from the RG Veda is the only ONE science that explains the true perfection of creation and our connection to the holographic universe. Quantum Metrics are from the RG Veda: Quantum Physicist already knowing the answer as they have taken it the RG Veda then creates complicated elongated mathematical equations to derive at their Metric, which they name

after themselves. I explain how to calculate all 90 metrics contained in RG Veda using a dividend and divisor and how to apply this system of harmony to devices you can manufacture such as electric motors. I would not dare name any of the yet “undiscovered” Metrics after myself, as no man should claim Gods work as his own. Although I have examples of the RG Vedas and other sources mentioning the Vedic Meter no one to my knowledge as given a full interpretation of them and what they relate to as I have done. I have deciphered and attempted to simplify one of the most ancient of mysteries and show how to apply it. My intention in releasing this information is to enlighten

humanity as to assist in the rebuilding of the foundations of science for the advancement of all. We all must aspire to a brighter future and not allow this information to remain the industrial secret of occult societies. These societies have handicapped humanity for long enough and it is time to enter into the light from the darkness and advance our civilization. The zenith is the point in the sky or celestial sphere directly above an observer. God, sees all life in all dimensions and knows all of us, we should all strive for Krsna Consciousness and free ourselves from the illusion of our material world. When there is harmony between the mind, heart and resolution then nothing is impossible.
