Erste Hilfe For the German Medical License Exam Simon and Schuster

The only official Kaplan Lecture Notes for USMLE Step 3 cover the comprehensive information you need to ace the exam. This 2-volume set is the perfect companion for Kaplan's USMLE courses. Up-to-date. Updated biannually by Kaplan's all-star faculty. This updated edition reflects the 2014 test change and includes more foundational medicine and systems-based practice/patient safety. Complete. Includes basic science correlates likely to be tested on the exam, patient management from the experts, patient safety, and population health. Learner-efficient. Case-based content

(250+ in-depth cases) organized in outline format presents material for both the Foundations of Independent Practice (FIP) and Advanced Clinical Medicine (ACM) components of the exam Trusted. Used by thousands of students each year to succeed on the USMLE Step 3. This book and USMLE Step 3 Lecture Notes 2021-2022: Pediatrics, Obstetrics/Gynecology, Surgery, Epidemiology, Patient Safety assume mastery of both Step 1 pre-clinical discipline-based and Step 2 CK clinical sciences content, both of which are covered in Kaplan's other Lecture Notes bundles.

Physics notes : Preparation for the Medical College Admission Test John Wiley & Sons

Remediation in medical education is the act of facilitating a correction for trainees who started out on the journey toward becoming excellent physicians but have moved off course. This

book offers an evidence-based and practical approach to the identification and remediation of medical trainees who are unable to perform to standards. As assessment of clinical competence and professionalism has become more sophisticated and ubiquitous, medical educators increasingly face the challenge of implementing effective and respectful means to work with trainees who do not yet meet expectations of the profession and society. *Remediation in Medical Education: A Mid-Course Correction* describes practical stepwise approaches to remediate struggling learners in fundamental medical competencies; discusses methods used to define competencies and the science underlying the fundamental shift in the delivery and assessment of medical education; explores themes that provide context for remediation, including professional identity formation and moral reasoning, verbal and nonverbal learning disabilities, attention deficit disorders in high-functioning individuals, diversity, and educational and psychiatric topics; and reviews system issues involved in remediation, including policy and leadership challenges and faculty development.

English Language and the Medical Profession: Instructing and Assessing the Communication Skills of International Physicians
McGraw Hill Professional

A MUST READ for international medical graduates thinking of pursuing a medical residency in Germany. It provides valuable information about the German Medical License Examination Test in English. It answers frequently asked questions by international medical graduates about the medical license examination in Germany. The book provides a time plan, a detailed study plan, and suggests top-rated study resources necessary for successful test preparation.

STUDY SKILLS AND TEST-TAKING STRATEGIES FOR MEDICAL STUDENTS

Springer Science & Business Media

The book and software complement each other. This test preparation book includes six full-length exams based on actual MCATs released by the test administrators. Detailed explanations to every test question are included. Also contained are five comprehensive reviews designed to familiarize the examinee with

the material tested on the MCAT: mathematics, physics, chemistry, biology, and a writing sample review. Key scientific topics, reading comprehension passages, writing skills, and quantitative skills are both reviewed and tested. Includes the complete MCAT Test Prep book plus interactive software. The software offers two complete exams under actual exam conditions with controlled timing and question order. It automatically scores test performance, provides analysis, and directions for further study. Includes Windows and Macintosh disks. Suitable for any PC with 4 MB of RAM minimum, Windows 3.1, or 95, or 98. Any Macintosh with a 68020 or higher processor, 4 MB of RAM minimum, System 7.1 or later. Designed for the undergraduate student bound for medical school.
