**THOMAS HOWE**

## ADVANCES IN COMPUTER, INFORMATION, AND SYSTEMS SCIENCES, AND ENGINEERING

Springer Science & Business Media

The conference proceedings of: International Conference on Industrial Electronics, Technology & Automation (IETA 05) International Conference on Telecommunications and Networking (TeNe 05) International Conference on Engineering Education, Instructional Technology, Assessment, and E-learning (EIAE 05) include a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of: Industrial Electronics, Technology and Automation, Telecommunications, Networking, Engineering Education, Instructional Technology and e-Learning. The three conferences, (IETA 05, TENE 05 and EIAE 05) were part of the International Joint Conference on Computer, Information, and System Sciences, and Engineering (CISSE 2005). CISSE 2005, the World's first Engineering/Computing and Systems Research E-Conference was the first high-caliber Research Conference in the world to be completely conducted online in real-time via the internet. CISSE received 255 research paper submissions and the final program included 140 accepted papers, from more than 45 countries. The

whole concept and format of CISSE 2005 was very exciting and ground-breaking. The powerpoint presentations, final paper manuscripts and time schedule for live presentations over the web had been available for 3 weeks prior to the start of the conference for all registrants, so they could pick and choose the presentations they want to attend and think about questions that they might want to ask. The live audio presentations were also recorded and are part of the permanent CISSE archive, which includes all power point presentations, papers and recorded presentations. All aspects of the conference were managed on-line; not only the reviewing, submissions and registration processes; but also the actual conference. Conference participants - authors, presenters and attendees - only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground-breaking conference. The on-line structure of this high-quality event allowed academic professionals and industry participants to contribute work and attend world-class technical presentations based on rigorously refereed submissions, live, without the need for investing significant travel funds or time out of the office. Suffice to say that CISSE received submissions from more than 50 countries, for whose researchers, this opportunity presented a much more affordable, dynamic and well-planned event to attend and submit their work to, versus a classic, on-the-ground conference. The CISSE conference audio room provided superb audio even over low speed internet connections, the

ability to display PowerPoint presentations, and cross-platform compatibility (the conferencing software runs on Windows, Mac, and any other operating system that supports Java). In addition, the conferencing system allowed for an unlimited number of participants, which in turn granted CISSE the opportunity to allow all participants to attend all presentations, as opposed to limiting the number of available seats for each session. The implemented conferencing technology, starting with the submission & review system and ending with the online conferencing capability, allowed CISSE to conduct a very high quality, fulfilling event for all participants. See: [www.cissee2005.org](http://www.cissee2005.org), sections: IETA, TENE, EIAE

#### Worldmaking TUTOR FORMACIÓN

This book constitutes the refereed post-conference proceedings of the First International Conference on Innovation and Interdisciplinary Solutions for Underserved Areas, InterSol 2017, and the 6th Colloque National sur la Recherche en Informatique et ses Applications (CNRIA), held in Dakar, Senegal, in April 2017. The 15 papers presented at InterSol were selected from 76 submissions and are grouped thematically in science, energy and environment, education, innovation, and healthcare. The proceedings also contain 13 papers from the co-located 6th CNRIA (Colloque National sur la Recherche en Informatique et ses Applications) focusing on network architecture and security, software engineering, data management, and signal processing. *Curso de Consultoría TIC. Gestión, Software ERP y CRM* Packt Publishing Ltd

Miguel-Ángel Galindo Martín, Joaquín Guzman Cuevas and Domingo Ribeiro Soriano University of Castilla-La Mancha, Albacete, Spain University of Sevilla, Sevilla, Spain University of Valencia, Valencia, Spain The economic growth and the progress of the nations have been two issues that have worried the economists during centuries. The classical economic books have developed different theories and considered several factors that could explain those processes. Unfortunately, a single answer has not been obtained and nowadays economists try also to achieve a response to the mechanism of economic growth. Economic growth has been considered as one of the most relevant economic policy. As it is well known, the validity of an economic policy is measured in terms of economic growth rate. It is supposed that those countries that obtain a higher economic growth rate are designing more efficient economic policies than those that show lower rates. The main corollary to this hypothesis is that the developing countries must follow and copy the economic policies designed by the developed countries.

*UF1889 - Desarrollo de componente software en sistemas ERP-CRM* Springer

Microsoft Dynamics AX es un sistema integral de gestión empresarial (ERP) orientado a empresas medianas y grandes que permite ser ampliado y personalizado utilizando su propio sistema de desarrollo, llamado MorphX, y su propio lenguaje, X++. Se sostiene a su vez en el conjunto de productos que forman la plataforma de servidores y desarrollo de Microsoft. La versión AX 2012 supuso, tras su lanzamiento, una pequeña revolución desde el punto de vista técnico, la cual ha continuado con los abundantes cambios publicados en las sucesivas revisiones. Incluyendo novedades tan interesantes como el soporte para despliegue en la nube, en la reciente revisión R3. Este libro recorre, de una manera ordenada, progresiva y muy documentada, todos los aspectos relevantes para la modificación de la aplicación y el desarrollo de nuevas funcionalidades. Desde aspectos básicos como la arquitectura necesaria para su instalación y configuración, pasando por funcionalidades presentes en todas sus versiones anteriores, hasta las novedades más recientes publicadas en las últimas revisiones. Todo ello

redactado de manera homogénea incluyendo trucos, consejos y buenas prácticas. Esta forma de organizar el contenido facilita que la obra sea apropiada tanto para desarrolladores que comienzan su carrera profesional y deciden orientarse a esta plataforma, como a técnicos y consultores experimentados en versiones anteriores que busquen aprender o refrescar las últimas novedades, ya sea para utilizarlas ellos mismos, o para estimar las tareas de sus equipos de trabajo. Por supuesto, resultará interesante para perfiles situados entre estos dos extremos. Como programadores con experiencia en otros entornos, especialmente los de Microsoft; equipos de desarrollo que se ven en la necesidad de asumir proyectos basados en esta tecnología o que deban integrarse con ella desde sistemas externos, etc. Reune las ventajas de un manual de aprendizaje para conceptos que ya se conocen, junto a las de un libro de referencia donde consultar detalles sobre cuestiones particulares. En resumen, esta obra resulta imprescindible para todas las audiencias que trabajen o necesiten trabajar como desarrolladores o consultores con responsabilidades técnicas en Microsoft Dynamics AX.

#### **The Necessity and Advisability of Creating the Office of Public Defender** Unesco

The ever-increasing need for higher efficiency, smaller size, and lower cost make the analysis, understanding, and design of energy conversion systems extremely important, interesting, and even imperative. One of the most neglected features in the study of such systems is the effect of the inherent nonlinearities on the stability of the system. Due to these nonlinearities, these devices may exhibit undesirable and complex dynamics, which are the focus of many researchers. Even though a lot of research has taken place in this area during the last 20 years, it is still an active research topic for mainstream power engineers. This research has demonstrated that these systems can become unstable with a direct result in increased losses, extra subharmonics, and even uncontrollability/unobservability. The detailed study of these systems can help in the design of smaller, lighter, and less expensive converters that are particularly important in emerging areas of research like electric vehicles, smart grids, renewable energy sources, and others. The aim of this Special Issue is to cover control and nonlinear aspects of instabilities in different energy conversion systems: theoretical, analysis modelling, and practical solutions for such emerging applications. In this Special Issue, we present novel research works in different areas of the control and nonlinear dynamics of energy conversion systems.

#### **Control and Nonlinear Dynamics on Energy Conversion Systems** Springer Nature

In recent years, emerging markets have come to represent the largest share of global GDP and have made gains in economic development and political influence. In turn, emerging market companies have taken on a new level of importance in driving innovation, local development and global competition. Advancing an integrative view that captures the diversity of innovation among companies in emerging markets, this book highlights the rapid evolution of emerging markets from imitators to innovation leaders. Building upon research conducted by the Emerging Multinational Research Network (EMRN) in collaboration with several universities in North and South America, Europe and China, this rich and expansive collection includes studies of innovation in regions yet to receive focused analysis in the field. The authors also re-examine dominant theories of innovation and capability creation based on a broad range of case studies and research insights. Offering a taxonomy of emerging market innovations, this collection reveals the unique drivers, types, and outcomes of innovation in emerging markets.

*Advances in Emerging Trends and Technologies* John Benjamins Publishing Company

Why economists' attempts to help poorer countries improve their economic well-being have failed. Since the end of World War II, economists have tried to figure out how poor countries in the tropics could attain standards of living approaching those of countries in Europe and North America. Attempted remedies have included providing foreign aid, investing in machines, fostering education, controlling population growth, and making aid loans as well as forgiving those loans on condition of reforms. None of these solutions has delivered as promised. The problem is not the failure of economics, William Easterly argues, but the failure to apply economic principles to practical policy work. In this book Easterly shows how these solutions all violate the basic principle of economics, that people—private individuals and businesses, government officials, even aid donors—respond to incentives. Easterly first discusses the importance of growth. He then analyzes the development solutions that have failed. Finally, he suggests alternative approaches to the problem. Written in an accessible, at times irreverent, style, Easterly's book combines modern growth theory with anecdotes from his fieldwork for the World Bank.

### **USING MICROSOFT DYNAMICS 365 FOR FINANCE AND OPERATIONS**

Editorial Elearning, S.L.

This book constitutes the proceedings of the 1st International Conference on Advances in Emerging Trends and Technologies (ICAETT 2019), held in Quito, Ecuador, on 29–31 May 2019, jointly organized by Universidad Tecnológica Israel, Universidad Técnica del Norte, and Instituto Tecnológico Superior Rumiñahui, and supported by SNOTRA. ICAETT 2019 brought together top researchers and practitioners working in different domains of computer science to share their expertise and to discuss future developments and potential collaborations. Presenting high-quality, peer-reviewed papers, the book discusses the following topics: Technology Trends Electronics Intelligent Systems Machine Vision Communication Security e-Learning e-Business e-Government and e-Participation

**Microsoft Dynamics Sure Step 2010** Springer

This book describes the latest advances in fuzzy logic, neural networks, and optimization algorithms, as well as their hybrid intelligent combinations, and their applications in the areas such as intelligent control, robotics, pattern recognition, medical diagnosis, time series prediction, and optimization. The topic is highly relevant as most current intelligent systems and devices use some form of intelligent feature to enhance their performance. The book also presents new and advanced models and algorithms of type-2 fuzzy logic and intuitionistic fuzzy systems, which are of great interest to researchers in these areas. Further, it proposes novel, nature-inspired optimization algorithms and innovative neural models. Featuring contributions on theoretical aspects as well as applications, the book appeals to a wide audience.

### **Intuitionistic and Type-2 Fuzzy Logic Enhancements in Neural and Optimization Algorithms: Theory and Applications** Springer Science & Business Media

El mundo actual se encuentra bajo constante cambio, de grandes avances y descubrimientos, apalancado principalmente por la globalización y por las nuevas tecnologías, acarreado una fuerte competitividad, que ha forzado las personas y organizaciones a asumir nuevos caminos ante tales innovaciones. Uno de los cambios más importantes y significativos para las organizaciones fue la transición de una economía industrial hacia una economía basada en la información. Finalmente, estamos en la “era de la

información”. Actualmente, la importancia que se le da a la información no sorprende a nadie. Se trata de uno de los recursos cuya gestión y aprovechamiento influencia más en el éxito de las organizaciones y sociedades.

En resumen, esta obra resulta imprescindible para todas las audiencias que trabajen o necesiten trabajar como desarrolladores o consultores con responsabilidades técnicas en Microsoft Dynamics AX. UF1889 - Desarrollo de componente software en sistemas ERP-CRM Science, engineering, and technology permeate nearly every facet of modern life and hold the key to solving many of humanity's most pressing current and future challenges. The United States' position in the global economy is declining, in part because U.S. workers lack fundamental knowledge in these fields. To address the critical issues of U.S. competitiveness and to better prepare the workforce, A Framework for K-12 Science Education proposes a new approach to K-12 science education that will capture students' interest and provide them with the necessary foundational knowledge in the field. A Framework for K-12 Science Education outlines a broad set of expectations for students in science and engineering in grades K-12. These expectations will inform the development of new standards for K-12 science education and, subsequently, revisions to curriculum, instruction, assessment, and professional development for educators. This book identifies three dimensions that convey the core ideas and practices around which science and engineering education in these grades should be built. These three dimensions are: crosscutting concepts that unify the study of science through their common application across science and engineering; scientific and engineering practices; and disciplinary

core ideas in the physical sciences, life sciences, and earth and space sciences and for engineering, technology, and the applications of science. The overarching goal is for all high school graduates to have sufficient knowledge of science and engineering to engage in public discussions on science-related issues, be careful consumers of scientific and technical information, and enter the careers of their choice. A Framework for K-12 Science Education is the first step in a process that can inform state-level decisions and achieve a research-grounded basis for improving science instruction and learning across the country. The book will guide standards developers, teachers, curriculum designers, assessment developers, state and district science administrators, and educators who teach science in informal environments.

*Foreign Direct Investment in Latin America and the Caribbean 2010* Trafford Publishing

The Second Conference on Mechanisms, Transmissions and Applications - MeTrApp 2013 was organised by the Mechanical Engineering Department of the University of the Basque Country (Spain) under the patronage of the IFToMM Technical Committees Linkages and Mechanical Controls and Micromachines and the Spanish Association of Mechanical Engineering. The aim of the workshop was to bring together researchers, scientists, industry experts and students to provide, in a friendly and stimulating environment, the opportunity to exchange know-how and promote collaboration in the field of Mechanism and Machine Science. The topics treated in this volume are mechanism and machine design, biomechanics, mechanical transmissions, mechatronics, computational and experimental methods, dynamics of mechanisms and micromechanisms and microactuators.

Springer Science & Business Media

This book describes new methods for building intelligent systems using type-2 fuzzy logic and soft computing (SC) techniques. The authors extend the use of fuzzy logic to a higher order, which is called type-2 fuzzy logic. Combining type-2 fuzzy logic with traditional SC techniques, we can build powerful hybrid intelligent systems that can use the advantages that each technique offers. This book is intended to be a major reference tool and can be used as a textbook.

New Advances in Mechanisms, Transmissions and Applications  
Springer Science & Business Media

This volume contains the Proceedings of MUSME 2014, held at Huatulco in Oaxaca, Mexico, October 2014. Topics include analysis and synthesis of mechanisms; dynamics of multibody systems; design algorithms for mechatronic systems; simulation procedures and results; prototypes and their performance; robots and micromachines; experimental validations; theory of mechatronic simulation; mechatronic systems; and control of mechatronic systems. The MUSME symposium on Multibody Systems and Mechatronics was held under the auspices of IFToMM, the International Federation for Promotion of Mechanism and Machine Science, and FelBIM, the Iberoamerican Federation of Mechanical Engineering. Since the first symposium in 2002, MUSME events have been characterised by the way they stimulate the integration between the various mechatronics and multibody systems dynamics disciplines, present a forum for facilitating contacts among researchers and students mainly in South American countries, and serve as a joint conference for the IFToMM and FelBIM communities.

#### **UF1885 - Administración del sistema operativo en sistemas ERP-CRM MDPI**

Este Manual es el más adecuado para impartir el MF1005 "Optimización de la cadena logística" de los Certificados de Profesionalidad, y cumple fielmente con los contenidos del Real

Decreto. Puede solicitar gratuitamente las soluciones a todas las actividades en el email tutor@tutorformacion.es Capacidades que se adquieren con este Manual: - Definir las fases y operaciones a realizar dentro de la cadena logística de acuerdo con los niveles de servicio y la calidad establecidos para realizar el seguimiento de las mercancías. - Calcular costes logísticos en función de las variables que intervienen en la ejecución del servicio de distribución, para elaborar un presupuesto del servicio logístico. - Analizar las incidencias más habituales en la cadena logística proponiendo procedimientos oportunos para resolverlas. - Utilizar los sistemas de información y comunicación adecuados para la gestión y atención de las relaciones con el cliente/proveedor de una cadena logística. Índice: Fases y operaciones en la cadena logística 8 1. Introducción. 9 2. La cadena de suministro: fases y actividades asociadas. 10 2.1. Actores: proveedores, empresa, clientes, empresas de transporte, almacenes en tránsito, centrales de compra y distribución. 12 2.2. Relaciones y sinergias. 15 2.3. Elementos organizativos, materiales, tecnológicos e informáticos. 16 3. Flujos en la cadena de suministro: flujo físico de materiales y flujo de información. Características de estos. Cómo se articulan. Ejemplo concreto de un proceso de aprovisionamiento desde que se lanza la orden de pedido hasta su recepción en almacén. 18 4. El flujo de información: en tiempo real, fiable, seguro, fácil de interpretar y manejar. 22 5. Flujo de materiales: seguro, eficaz y con calidad. Diagrama de flujos interconexiónados. 24 6. Cadena logística: objetivos. Cómo lograrlos. Integración de actores y sinergias a conseguir. 27 6.1. Ventajas de la integración logística frente a tratamientos aislados. 29 6.2. El lead-time y su control. 29 6.3. La cadena de valor añadido. 31 6.4. El servicio al cliente. 33 7. Logística y calidad. 36 7.1. Factores y puntos críticos en el proceso logístico desde el punto de vista de la calidad. 36 7.2. Medición de la no-calidad logística. 37 7.3. Calidad preventiva. 38 7.4. Medición del costo de la no calidad. 38 8. Gestión de la cadena logística. 41 8.1. Aprovisionamiento y compras. 41 8.2. Producción, almacenaje y distribución. 42 8.3. Las mejores prácticas. 46 8.4. Conexión y sinergias a establecer con clientes y proveedores. 48 9. El flujo de información. 50 9.1. Elementos que contiene. 50 9.2. Trazabilidad. 51 9.3. Tecnología e informática de apoyo. Información al cliente. 53 10. Resumen. 54 11. Autoevaluación. 55 Logística inversa 56 1. Introducción. 57 2. Devoluciones y logística inversa. 58 2.1. Medio ambiente y logística inversa. 58 2.2. Alternativas posibles en la recuperación de productos. 59 2.3. Modificación de los patrones logísticos tradicionales. 60 3. Posibles límites a la logística inversa. 61 3.1. Diseño para el reciclaje. 61 3.2. Logística inversa del envase y el embalaje. 61 3.3. Pools de paletas y KLT's. 62 3.4. Las 3 R: reutilización, reciclaje, reducción. 63 4. Causas de la aparición de la logística inversa. 64 4.1. El ciclo de vida de los productos, la obsolescencia y la logística inversa. 64 4.2. La logística inversa como fuente de negocio. 65 4.3. Puntos críticos en la logística inversa. 65 4.4. Ventajas de incorporar los procesos de logística inversa en la logística directa. 66 5. Política de devolución de productos. 68 5.1. El consumo: estacionalidad, variación de la demanda, caducidad del producto, gestión de stock y su correlación con la logística inversa. 68 5.2. Acuerdos con los clientes y proveedores para devoluciones y retornos. 69 6. Logística inversa y legislación. 72 6.1. Envases y residuos. 72 6.2. Pilas y baterías. 74 6.3. Vehículos fuera de uso (VFU). 75 6.4. Residuos de aparatos electrónicos y eléctricos. 76 6.5. Aceites y vertidos industriales líquidos. 77 7. Resumen. 79 8. Autoevaluación 80 Optimización y costos logísticos 82 1. Introducción. 83 2. Características del costo logístico: variabilidad. 84 2.1. Componentes del costo logístico; stock, almacenaje, picking, envase, embalaje, transporte. 84 2.2. Costos

directos e indirectos. 85 2.3. Cadena de suministro y costos logísticos asociados. 86 2.4. El despilfarro. 86 3. Sistema tradicional y sistema ABC de costos. 90 3.1. El costo logístico de oportunidad. 90 3.2. Costos totales y costos unitarios. 91 3.3. Costos medios y costos individualizados a nivel de producto y de cliente. 91 3.4. Utilidad y forma de cálculo. 91 3.5. Estrategias operativas que se deducen de los costos individuales. 93 4. Medición del costo logístico y su impacto en la cuenta de resultados. Costos totales, costos unitarios y costos porcentuales. 95 5. Estrategia y costos logísticos. 97 5.1. Principios básicos al diseñar una estrategia de costos. 97 5.2. Urgencias e imprevistos: como detectarlos, analizarlos y minimizar su impacto. 97 5.3. Puntos críticos de la cadena logística donde pueden producirse imprevistos y desviaciones. 98 6. Medidas para optimizar el costo logístico en las diversas áreas: stock, almacenaje, picking, transporte. 101 7. Cuadro de control de costos. Pirámide de información del costo logístico. 105 8. Ejemplo práctico de cálculo del costo logístico en una operación de comercialización, teniendo en cuenta el costo de compra, los costos de stock, almacenaje y manipulación, el costo de transporte de distribución y los costos administrativos e indirectos. 107 9. Resumen. 112 10. Autoevaluación. 113

Redes de distribución 115 1. Introducción. 116 2. Diferentes modelos de redes de distribución. 117 2.1. Directa desde fábrica a cliente. 117 2.2. Directa a través de un almacén regulador. 117 2.3. Distribución escalonada. 118 2.4. Outsourcing en la distribución. 118 3. Cálculo del costo logístico de distribución en los diferentes modelos. 122 3.1. Costo financiero del costo. 122 3.2. Costo de almacenaje. 124 3.3. Costo de preparación de pedidos. 124 3.4. Costo de transporte tanto de larga distancia como de reparto final. 125 3.5. El costo del outsourcing. 127 4. Resumen. 129 5. Autoevaluación. 130

Gestión de imprevistos e incidencias en la cadena logística 132 1. Introducción. 133 2. Incidencias, imprevistos y errores humanos en el proceso de distribución. 134 3. Puntos críticos del proceso. Importancia cualitativa y monetaria de las mismas. 136 4. Análisis de determinados procesos críticos. 137 4.1. Carga y descarga de mercancía. 137 4.2. Transporte y entrega. 137 4.3. Incidencias más frecuentes. 138 4.4. Estrategias de detección, seguimiento y corrección. 140 4.5. Indicadores de gestión (KPI). 140 5. Seguimiento y localización física de la mercancía en el proceso de distribución. 145 6. Sistemas informáticos y tecnología aplicada: GPS, satélite, radiofrecuencia. 146 7. Acceso del cliente a la información. 151 8. Determinación de responsabilidades en una incidencia. 152 8.1. Detección del punto físico y momento temporal en que se produce (fase del proceso logístico). 152 8.2. Solución. 154 8.3. Actitud proactiva ante incidencias por parte de los actores de la cadena de suministro. 155 9. En diversos supuestos prácticos, cómo actuar en una incidencia. 156 9.1. Actuaciones diferentes según el tipo y el momento de esta: en el control de recepción, en la manipulación, en la preparación de pedidos, en el transporte. 156 9.2. A quiénes se debe informar y contenido de la información. 158 9.3. Incidencias y su tratamiento informático. Sistema de documentación: grabación de datos, información mínima, clasificación según tipos, seguimiento y solución dada a la misma, costo real o estimado, cliente afectado o proveedor involucrado, punto de la cadena en que se produjo. 159 10. Resumen. 164 11. Autoevaluación. 165

Información, comunicación y cadena de suministro. 167 1. Introducción. 168 2. Tecnología y sistemas de información en logística. 169 3. La pirámide de información. 174 4. Ventajas y posibles inconvenientes: costo y complejidad del sistema. 176 5. La comunicación formal e informal. 177 5.1. Comunicación oral y comunicación en soporte comprobable. 177 5.2. Metodología en la generación y transmisión de la información. 178

Sistemas de

utilización tradicional y de vanguardia: la informática, satélites, GPS, EDI, transmisión de ficheros, email, teléfono, fax. Características. Pros y contras de los diferentes sistemas. 180 6. Información habitual en el almacén. 181 6.1. Picking list, packing list, reportes de actividad e incidencias. 181 6.2. Pedidos de clientes y pedidos a proveedores. 184 6.3. Información sobre flujos internos y flujos con terceros (entradas y salidas al y del almacén). 186 6.4. Documentos de transporte nacional, de exportación y de importación. 187 6.5. Terminología y simbología utilizadas en la gestión del almacén. 195 7. Resumen. 202 8. Autoevaluación. 203 Bibliografía 205

## INNOVATION AND INTERDISCIPLINARY SOLUTIONS FOR UNDERSERVED AREAS

Springer Nature

This book provides precise descriptions and instructions which enable users, students and consultants to understand Microsoft Dynamics 365 for Finance and Operations rapidly. Microsoft offers Dynamics 365 as its premium ERP solution, supporting large and mid-sized organizations with a complete business management solution which is easy to use. Going through a simple but comprehensive case study, this book provides the required knowledge to handle all basic business processes in Microsoft Dynamics 365 for Finance and Operations. Exercises are there to train the processes and functionality, also making this book a good choice for self-study.

[A Framework for K-12 Science Education](#) MIT Press

This book addresses various aspects of in vitro digestibility: • Application of meta-analyses and machine learning methods to predict methane production; • Methane production of sainfoin and alfalfa; • In vitro evaluation of different dietary methane mitigation strategies; • Rumen methanogenesis, rumen fermentation, and microbial community response; • The role of condensed tannins in the in vitro rumen fermentation kinetics; • Fermentation pattern of several carbohydrate sources; • Additive, synergistic, or antagonistic effects of plant extracts; • In vitro rumen degradation and fermentation characteristics of silage and hay; • In vitro digestibility, in situ degradability, and rumen fermentation of camelina co-products; • Ruminal fermentation parameters and microbial matters to odd- and branched-chain fatty acids; • Comparison of fecal versus rumen inocula for the estimation of NDF digestibility; • Rumen inoculum collected from cows at slaughter or from a continuous fermenter; • Seaweeds as ingredients of ruminant diets; • Rumen in vitro fermentation and in situ degradation kinetics of forage Brassica crops; • In vitro digestibility and rumen degradability of vetch varieties; • Intestinal digestibility in vitro of Vicia sativa varieties; • Ruminal in vitro protein degradation and apparent digestibility of Pisum sativum; • In vitro digestibility studies using equine fecal inoculum; • Effects of gas production recording system and pig fecal inoculum volume on kinetics; • In vitro methods of assessing protein quality for poultry; and • In vitro techniques using the DaisyII incubator.

Balbino, "a boy from a village", a "nobody" who writes a notebook about everything that happens to him within the repressed and stifling society of Galicia in the thirties and forties. He tells of the moral and social atmosphere that prevails asking and answering questions and details the most elemental social struggle. There is also however the story of a true but impossible love. This book was first printed in Argentina in 1961 and became one of the most successful Galician books published. It has a lyrical style that immediately evokes sights and sounds of this part of Spain. The author Xos Neira Vilas writes from his experiences of the era and the lifestyle of boys growing up in that society and provides a

rich insight to life of the peasant boy "Balbino".

### **INNOVATION FROM EMERGING MARKETS**

Springer Nature

This book constitutes the proceedings of the 1st International Conference on Advances in Emerging Trends and Technologies (ICAETT 2019), held in Quito, Ecuador, on 29–31 May 2019, jointly organized by Universidad Tecnológica Israel, Universidad Técnica del Norte, and Instituto Tecnológico Superior Rumiñahui, and supported by SNOTRA. Presenting high-quality, peer-reviewed papers, the book discusses the following topics: Technology Trends Electronics Intelligent Systems Machine Vision Communication Security e-Learning e-Business e-Government and e-Participation

### **COPING WITH FLASH FLOODS**

Springer Science & Business Media

Accelerate your digital transformation and break down silos with Microsoft Dynamics 365. It's no secret that running a business involves several complex parts like managing staff, financials, marketing, and operations—just to name a few. That's where Microsoft Dynamics 365, the most profitable business management tool, comes in. In Microsoft Dynamics 365 For Dummies, you'll learn the aspects of the program and each of its applications from Customer Service to Financial Management. With expert author Renato Bellu's clear instructions and helpful tips, you'll be managing to your fullest advantage before you know it. Let's get started! Digitally transform your business by connecting CRM and ERP. Use data to make decisions across all business functions. Integrate Dynamics 365 with Office 365 and LinkedIn. Manage financials and operations. Are you running a dynamic business? This book shows you how!
