Entrepreneurship and Beyond Edward Elgar Publishing
 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Visual Tools for Developing Cross-Disciplinary Collaboration, Innovation and Entrepreneurship Capacity Pearson

As business schools expand their entrepreneurship programs and organizations seek people with entrepreneurial skills, it has become clear that the skills and mindset of an entrepreneur are highly valued in all business contexts. This latest edition of Entrepreneurial New Venture Skills continues to focus on helping students develop entrepreneurial skills, whether they seek to become entrepreneurs or employees. Focusing on the entrepreneurial start-up process, the third edition of Entrepreneurial New Venture Skills takes the reader through the steps of selecting, planning, financing, and controlling the new venture. The authors cover multiple forms of new ventures, as well as ways to utilize entrepreneurial skills in other contexts, encouraging students to engage with the material and apply it to

their lives in ways that make sense for them. Skill development features include: Entrepreneurial profiles of small business owners Personal applications for students to apply questions to their new venture or a current business Global and domestic cases Elevator pitch assignments, which put students in the venture capitalist position Application exercises and situations covering specific text concepts Business plan prompts to help students construct a business plan over the course of a semester Featuring pedagogical tools like review questions and learning outcomes, and a full companion website that expands upon skill development and offers instructor resources, the third edition of Entrepreneurial New Venture Skills is the perfect resource for instructors and students of entrepreneurship.

A Contemporary Approach CRC Press

"Visual Tools for Developing Cross-Disciplinary Collaboration, Innovation and Entrepreneurship Capacity will identify and document pedagogical and practice-based visual approaches to scaffold and develop capacity for cross-disciplinary collaboration, innovation and entrepreneurship. An introductory chapter will introduce and contextualise the key themes of the book. It outlines the value in supporting acquisition of cross-disciplinary collaboration, innovation and entrepreneurship skills in students and why visual tools are particularly useful in doing this. The main body of the book will be divided into four sections, each will include theory and case study based inquiries. - Visual Tools for Collaboration This first section would explore approaches to developing skills for cross-disciplinary collaboration in students leveraging visual tools and artefacts. - Visual tools for Innovation This second section would explore approaches to scaffolding the acquisition of innovation skills in students via use of visual tools and artefacts. - Visual tools for Entrepreneurship This third section would explore how students can be supported and encouraged to attain appropriate skills and knowledge for successful entrepreneurship through the use of visual tools and artefacts. - Integrated Approaches This fourth, and final, section will demonstrate integrated approaches with respect two or three of these. The chapter authors have been selected from across disciplinary specialisations from a global pool of educators and practitioners in order to provide a broad range of perspectives. A final summary chapter summaries and reflects on the key insights of the book"--

Value-creation in Middle Market Private Equity by John A. Lanier holistically examines the ecosystem relationships between middle market private equity firms and their portfolio companies. Small business is the job creating engine in the US economy, and consequently is a prime target market for private equity investment. Indeed, private equity backs over six of each 100 private sector jobs. Both the small businesses in which private equity firms invest, and the private equity firms making the investments, face inter- and intra-company fiduciary leadership challenges while implementing formulated strategy. The architecture of each private equity firm-portfolio company relationship must be uniquely crafted to capitalize on the projected return on investment that is memorialized in the investment thesis. Given the leveraged capital structure of portfolio companies, the cost of a misstep is problematic. Individual private equity professionals are typically members of multiple investment teams for the firm. Not only may each investment team have its own unique leadership style, but its diverse members have to assimilate styles for each team in which they participate relative to a specific portfolio company. Acquisitions and their subsequent integrations add exponential complexity for both private equity investment and portfolio company leadership teams; indeed, cultural integration ranks among the most chronic acquisition obstacles. Accordingly, the stakeholders of private equity transactions do well to embrace leadership best practices in applying value-creation toolbox best practices. The perspectives of both the private equity investment team and the portfolio company leadership team are within the scope of these chapters.

Enterprise, Entrepreneurship and Innovation: Concepts, Contexts and Commercialisation provides readers with an accessible and readable introduction to the various dimensions of entrepreneurship and market innovation. It has a clear structure that is easy for the reader to follow and it focuses on enterprising behaviour. The text contains: * case studies and 'pause and reflect' situations for the entrepreneur to deliberate on the information they have available before making their decision. This helps to emphasise the point that there are few simple and straightforward decisions closely reflecting decisions in 'real life'. * integrative personal development activities that provide a basis for readers to reflect on the learning of the chapters and develop a personal development strategy to increase their ability to become more entrepreneurial and improve their ability to manage market innovation. * an accompanying website giving students and lecturers access to additional resources in order to explore the subject further. A full set of powerpoint slides plus exercises is included, plus suggestions for the use in class of the case studies and other illustrations. Students can access further learning resources to build up their knowledge of innovation situations using the hotlinks to useful websites that will add further depth and bring up to date the case studies and illustrations. *Enterprise, Entrepreneurship and Innovation: Concepts, Contexts and Commercialisation* shows: * how to understand and acquire the entrepreneur's skills, attitudes and knowledge * the techniques needed to generate new business and create a new organisation * how to become more innovative, self reliant, and opportunistic. * the learning and decision-making processes of entrepreneurs

Introduction to Business Academic Conferences and publishing limited

The book represents a state of the art review of key research on small firms in tourism in relation to European integration. It is, therefore, an essential resource for those engaged in research relating to tourism SMEs in transitional economies throughout the world. In addition, it is an essential purchase for the increasing number of students studying modules on small businesses as part of their final year undergraduate and postgraduate degree programmes. One of the key features of this book is its clear focus on breaking new ground by reporting recent research and theorising on small firms in tourism. In many cases, the analysis provided by contributors will carefully relate small business behaviour to issues of wider concern to tourism academics and policy-makers. It is also distinctive for its overt emphasis on contrasting European experiences. These characteristics contrast with the existing literature on small firms in tourism and hospitality, particularly in Europe. Previous literature achieved their aims by providing valuable syntheses of existing literature. Now that such 'taking of stock' has been undertaken, there is a demand for more overtly research-based texts that are nevertheless accessible to a wide audience. This book does exactly that.

The world is in a constant state of flux, and this influences the operations of every business and organisation. *Business Management: A Contemporary Approach* deals with these changes by covering the functions of a business or an organisation and then addressing the contemporary issues that affect them. These issues include globalisation, corporate entrepreneurship and citizenship, credit, diversity and HIV/AIDS. Every student of business and business manager needs to understand the importance of these issues and their influence on the operations of a business. *Business Management: A Contemporary Approach* also highlights the interdependency between the various business functions. This interdependency is very important for a business or organisation to operate as a whole.
