Practice and Problem Solving Workbook : Teacher's Guide Arbor Center for Teaching

This product is a project-based curriculum, focusing on Algebra I content. The curriculum is aligned with the Common Core State Standards (CCSS) and consists of 15 projects that cover at least one CCSS. However, the curriculum allows for individualized and differentiated instruction, where the teacher can assign project(s) and/or part(s) of a project to individuals or groups of students as he or she sees fit. This is a curriculum, teachers can use, to support learning and behavioral concerns for students who need differentiation, individualized instruction, and group work, that consist of hands-on activities that will increase engagement, motivation, and retention. Within this Project-Based Curriculum, students will have the autonomy to work in groups, individually, or in pairs to complete each project, then will have to create and present a deliverable to demonstrate mastery of the intended standards. The overall purpose of this curriculum is to improve student academic achievement in Algebra I and to provide the foundation for future success by creating a student-centered culture. The curriculum is aligned with the CCSS, to ensure students are prepared and successful when taking the Partnership for Assessment of Readiness for College and Careers (PARCC) exam. If fact, to further help students prepare for the PARCC exam, there are seven formal tests, in the Test Booklet, to guarantee students are mastering the new content. The Test Booklet is sold separately, but will support preparing students for the PARCC exam, by providing formal test practice on all Algebra I CCSS. The assessment in the Test Booklet has open-ended questions which will evaluate the student's knowledge and evaluate their mastery of the Algebra I CCSS.

In this new edition of Precalculus, Seventh Edition, the authors encourage graphical, numerical, and algebraic modeling of functions as well as a focus on problem solving, conceptual understanding, and facility with technology. They responded to many helpful suggestions provided by students and teachers in order to create a book that is designed for instructors and written for students. As a result, we believe that the changes made in this edition make this the most effective precalculus text available today.

Help students raise their performance on the Regents Algebra I (Common Core) exam with NYS Finish Line Algebra I. Nearly 300 pages of practice can prepare them with CCLS instruction that follows the curriculum sequence outlined by New York State. Content and organization are developed especially for New York. Topics that are often stumbling blocks for students are covered in detail, starting with the fundamentals. The progression of skills goes from recognizing and understanding forms and processes, to solving equations and inequalities, to modeling equations and graphs to represent real-life situations. Rigorous multiple-choice and constructed-response items give students test-like practice.
