The Dreams of Dragons  
Harper Collins  
A product of Jaime  
Licauco's knowledge  
about psychic and  
paranormal matters —  
a summary of the most  
significant lessons he  
had learned from years  
of reading and  
research, as well as  
true-to-life experiences  
of people who shared  
their psychic stories  
with him. It is the first

book of its kind written  
by a Filipino author and  
has become a classic in  
the field since it first  
came out in  
commercial book form  
in 1978. Although the  
flavor of the original  
edition was retained,  
the new edition  
contains a great deal of  
new theories and  
findings on  
neuroscience and  
parapsychology.  
**A Natural History of  
the Wind** UNM Press  
Shakespeare wrote  
that a rose by any

other name would smell as sweet. But if you cannot smell, does the rose lose its sweetness? The first and definitive book on the psychology of smell, *The Scent of Desire* traces the importance of smell in our lives, from nourishment to procreation to our relationships with the people closest to us and the world at large. Smell was the very first sense to evolve and is located in the same part of the brain that processes emotion, memory, and motivation. To our ancestors, the sense of smell wasn't just important, it was crucial to existence and it remains so today. Our emotional, physical, even sexual lives are profoundly shaped by both our

reactions to and interpretations of different smells. Why do some people like a certain smell and others hate it? Is smell personal or cultural? How does smell affect our choices and our daily lives? Rachel Herz explores these questions and examines the role smell plays in our lives, and how this most essential of senses is imperative to our physical and emotional well-being. Herz investigates how our sense of smell functions, examines what purpose it serves, and shows how inextricably it is linked to our survival. She introduces us to people who have lost their ability to smell and shows how their experiences confirm this sense's importance

by illuminating the traumatic effect its loss has on the quality of day-to-day living. Herz illustrates how profoundly scent and the sense of smell affect our daily lives with numerous examples and personal accounts based on her years of research. The wonders of our sense of smell are all explored in a compelling and engaging manner, from emotions and memory to aromatherapy and pheromones. For anyone who has ever wondered about human nature or been curious about the secrets of both the body and the mind, *The Scent of Desire* is a fascinating, down-to-earth tour of the psychology and biology of our most neglected sense, the sense of

smell.

**The Persephone Book of Short Stories**

Cavendish Publishing

Narrates how a lone Englishman survived unarmed in the African jungle and was instructed in the secrets of a witch doctor

**Lifetide** Princeton Architectural Press

Gustavus Myers Outstanding Book Award from the Gustavus Myers Center for the Study of Bigotry and Human Rights This new edition of an immensely influential book gives voice to Mexic Amerindian women silenced for hundreds of years by the dual censorship of being female and indigenous. Castillo replaced the term “Chicana feminism” with “Xicanisma” to

include mestiza women on both sides of the border. In history, myth, interviews, and ethnography Castillo revisits her reflections on Chicana activism, spiritual practices, sexual attitudes, artistic ideology, labor struggles, and education-related battles. Her book remains a compelling document, enhanced here with a new afterword that reexamines the significance of Our Lady of Guadalupe. [A Matter of Life and Death](#) Cambridge Scholars Publishing

The striking colour photos of the land and people of the many Indonesian islands are complemented by a first-person travelogue which invites readers to explore the variety Indonesia has to offer.

### **The Freedom**

**Handbook** New York Review of Books

The result of 20 years of work by a research group whose members have been communicating, through psychic transceiver Phyllis Schlemmer, with an enlightened circle of universal beings known as the Council of Nine, this book contains fresh and pressing information of particular relevance to our troubled world.

### **THE DANCE OF INTUITION AND INTELLECT.**

Destiny Books

What is consciousness? Conventional thinking tells us it is the images, sensations, thoughts, and feelings produced by the brain. When the neurons in the brain stop firing,

consciousness ceases to be. But does it? [The Secret Life of Inanimate Objects](#) Anvil Publishing, Inc. Girl meets boy. It's a story as old as time. But what happens when an old story meets a brand new set of circumstances? Ali Smith's remix of Ovid's most joyful metamorphosis is a story about the kind of fluidity that can't be bottled and sold. It is about girls and boys, girls and girls, love and transformation, a story of puns and doubles, reversals and revelations. Funny and fresh, poetic and political, here is a tale of change for the modern world.

**ESSENTIAL  
BRIEFINGS FROM  
DEEP SPACE**

The Hundredth Monkey takes its title from philosopher Ron Amundson's expose of the Hundredth Monkey Phenomenon, a claim about collective consciousness. Forty-three essays by thirty-nine authors, including Isaac Asmov, Martin Gardner, Carl Sagan, Ray Hyman, Paul Kurtz, and James Randi, examine aspects of paranormal and fringe-science beliefs from an

authoritative, scientific point of view. The penetrating and entertaining essays, many with timely postscripts, are grouped into nine categories:-

Canongate Books

A cutting-edge

examination of

feelings, not thoughts,

as the gateway to

understanding

consciousness •

Contends that emotion

is the greatest

influence on

personality development • Offers a new perspective on immunity, stress, and psychosomatic conditions • Explains how emotion is key to understanding out-of-body experience, apparitions, and other anomalous perceptions Contemporary science holds that the brain rules the body and generates all our feelings and perceptions. Michael Jawer and Dr. Marc Micozzi disagree. They contend that it is our feelings that underlie our conscious selves and determine what we think and how we conduct our lives. The less consciousness we have of our emotional being, the more physical disturbances we are likely to have--from ailments such as migraines,

fibromyalgia, chronic fatigue, and post-traumatic stress to anomalous perceptions such as apparitions and involuntary out-of-body experiences. Using the latest scientific research on immunity, sensation, stress, cognition, and emotional expression, the authors demonstrate that the way we process our feelings provides a key to who is most likely to experience these phenomena and why. They explain that emotion is a portal into the world of extraordinary perception, and they provide the studies that validate the science behind telepathic dreams, poltergeists, and ESP. The Spiritual Anatomy of Emotion challenges the prevailing belief

that the brain must necessarily rule the body. Far from being by-products of neurochemistry, the authors show that emotions are the key vehicle by which we can understand ourselves and our interactions with the world around us as well as our most intriguing--and perennially baffling--experiences.

### **A TOOLBOX FOR REVOLUTION (POCKET EDITION)**

Univ of California Press  
This book presents the life stories of three women of the German-speaking realm whose lives inspired the author directly: mathematician Maria Weber Steinberg (1919-2013); journalist Irmgard Rexroth-Kern (1907-1983); and Viennese art historian

Fr. Dr. Anna von Spitzmüller (1903-2001). The lives of these three women serve as emotional mirrors to the cultural transformations and tumultuous history of the 20th century. Their stories tell of the hardships, struggles, and victories of intellectual European women in this era. Each woman was related to men who played a prominent role in European cultural life, men who received some recognition in history books. As intellectual professionals, these women, in contrast, received very few public accolades for their important achievements. Placing them in the cultural context of the times in Germany and Austria, the book highlights the

traumatic choices imposed on ordinary people by political and social circumstances over which they had no control. Along with the women's individual stories, the chapters focus on overarching themes, including educated women's roles in European society, narratives of perseverance in confronting Nazism, and specific historical background describing the incidents affecting their life trajectories.

*Or, The Modern Changes of the Earth and Its Inhabitants*

*Considered as Illustrative of Geology*

AuthorHouse

The Hundredth Monkey portrays a scientific postulate claiming that a single individual in a group often effectuates changes, as the others copy the behavior. The

lesson here is that we are at risk of being engaged in the first nuclear conflict in history.

*Discovering Our Enigmatic Sense of Smell* Penguin Random House South Africa

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on

causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

### *Ring of Fire* Inner Traditions

Who Were the Original Foodies? Beyond their legacy as revolutionaries and politicians, the Founding Fathers of America were first and foremost a group of

farmers. Passionate about the land and the bounty it produced, their love of food and the art of eating created what would ultimately become America's diverse food culture. Like many of today's foodies, the Founding Fathers were ardent supporters of sustainable farming and ranching, exotic imported foods, brewing, distilling, and wine appreciation. Washington, Jefferson, and Franklin penned original recipes, encouraged local production of beer and wine, and shared their delight in food with friends and fellow politicians. In *The Founding Foodies*, food writer Dave DeWitt entertainingly describes how some of America's most famous colonial leaders not

only established America's political destiny, but also revolutionized the very foods we eat. Features over thirty authentic colonial recipes, including: Thomas Jefferson's ice cream A recipe for beer by George Washington Martha Washington's fruitcake Medford rum punch Terrapin soup

**Personal Histories from the Twentieth Century** Sourcebooks, Inc.

Law for Non-Law Students is written in a clear and readable style and aims to make the law understandable for readers at

undergraduate or comparable level. It explains the practical influences under which the law has been formed, so that the student will be better able to understand why the law has developed in the way that it has. It gives lots of straightforward examples as to how the law works in practice and aims to equip students with the ability to appraise the effectiveness of the law in a particular circumstance rather than simply providing a list of rules for the student to regurgitate at exam time. The facts of the more important cases are given in some detail to enable the student to appreciate the range of factors which the court may have taken into account in reaching its

decision. The new edition has been updated to take account of all recent developments, both in relation to statute and to case law. Certain chapters, particularly in the area of sale of goods, have been substantially rewritten and expanded in an attempt to give more detail, while at the same time remaining student-friendly. New chapters on Agency and Negligence have been added. This new edition should be suitable for most courses which have a law element.

### **What is**

**Consciousness?** Light  
Technology  
Publications

In the beginning, the World Wide Web was exciting and open to the point of anarchy, a vast and intimidating

repository of unindexed confusion. Into this creative chaos came Google with its dazzling mission—"To organize the world's information and make it universally accessible"—and its much-quoted motto, "Don't be evil." In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google—and the growing resistance to its expansion across the globe. He exposes the dark side of our Google fantasies, raising red flags about issues of intellectual property and the much-touted Google Book Search. He assesses Google's global impact, particularly in China, and explains the insidious effect of Googlization on the

way we think. Finally, Vaidhyathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the "evil" it pledged to avoid.

[Essays on Xicanisma. 20th Anniversary Updated Edition.](#) Xlibris Corporation  
In a house in London a woman starts a new life, trying to put tragedy behind her.

Then a pretty blonde child runs into view, bringing with her an inexplicable suggestion of evil. Once Julia Lofting had a husband and a daughter. But everything has changed since she bolted from her marriage, in flight from the unbearable truth of her daughter's death. For Julia, there is no escape. Another child awaits, another mother suffers, and a circle of the damned gathers around her. The haunting has begun . .
