Fiberoptic bronchoscopy is a procedure that allows a clinician to examine the airways by placing a thin tube-like instrument through the nose or mouth and down into the lungs. The tube sends pictures back to a video screen or camera. The procedure can be either diagnostic, to diagnose lung disease, or therapeutic to treat some lung conditions. This atlas is a practical guide to the

diagnosis and treatment of lung conditions using fiberoptic bronchoscopy. Beginning with an introduction to the history and application of the procedure, and discussion on normal and abnormal patterns of bronchial anatomy, the following sections present X-Ray, CT and bronchoscopic pictures of numerous cases encountered by the author. Each case is described in

detail, highlighting possible complications and contraindications. A separate chapter is dedicated to paediatric bronchoscopy. A set of case studies on bronchoscopic findings in benign and malignant pulmonary diseases has been included to help clinicians apply their knowledge. Key points Practical guide to diagnosis and treatment of lung diseases using fiberoptic bronchoscopy Presents numerous cases seen by the author Case studies of benign and malignant pulmonary diseases enhance learning Includes more than 450 X-Rays, CT images and bronchoscopic pictures *Atlas of Fiberoptic Bronchoscopy* Jaypee Brothers Medical Publishers The third edition of *Decision Making in Ophthalmology* has been fully updated to present ophthalmologists and trainees with the latest advances in the diagnosis and treatment of eye disorders. Presented in an algorithmic format using flow charts, the book covers all key topics in ophthalmology, with each algorithm outlining the decision making process that should be followed when diagnosing and treating a specific condition. Each flow chart is colour

coded to allow easy differentiation between surgical, pharmaceutical and other treatments. Written by an extensive author and editor team from throughout the USA, this highly useful new edition includes nearly 300 clinical photographs, illustrations and tables.
