Get a behind-the-scenes look at the making of Megadeth's iconic record, *Rust in Peace*, from the band's lead vocalist and guitarist. When *Rust in Peace* was released in 1990, the future of Megadeth was uncertain. Fresh off their performance at the record-breaking Monsters of Rock festival, and with knockout new albums from Slayer, Anthrax, and Metallica dominating the charts, the pressure to produce a standout statement record was higher than ever. In *Rust in Peace: The Inside Story of the Megadeth Masterpiece*, the band's lead vocalist and guitarist, Dave Mustaine, gives readers a never-before-seen glimpse into the artistry and insanity that went into making the band's most iconic record. He recounts the arduous task of hiring the band and supporting cast, of managing egos and extracurriculars during the album's ensuing success, and succumbing to the pressures of fame and fortune—which eventually forced the band to break up. And yet, Megadeth's demise was just the beginning; the birth pangs of the record were nothing compared to what came next. Alcohol, drugs, sex, money, power, property, prestige, the lies fed to the band by the industry—and the lies they told each other—threatened to eat away at the band's bond like rust, devouring it until only the music survived. Featuring a foreword by Slash

What does it take for women to succeed in a male-dominated world? *The Grit Factor*. At age nineteen, Shannon Huffman Polson became the youngest woman ever to climb Denali, the highest mountain in North America. She went on to reach the summits of Mt. Rainier and Mt. Kilimanjaro and spent more than a decade traveling the world. Yet it was during her experience serving as one of the Army's first female attack helicopter pilots, and eventually leading an Apache flight platoon on deployment to Bosnia-Herzegovina, that she learned the lessons of leadership that forever changed her life. Where did these insights come from? From her own crucibles of experience—and from other women. In writing *The Grit Factor*, Polson made it her mission to connect with an elite pack of tough, impressive female iconoclasts who shared with her their candid stories of combat and career. This slate of decorated leaders includes Heather Penney, one of the first female F-16 pilots, who was put on a suicide mission for 9/11; General Ann Dunwoody, the first female four-star general in the Army; Amy McGrath, the first female Marine to fly the F/A-18 in combat and a 2020 candidate for the US Senate—and dozens of other unstoppable women who got there first, including Polson herself. These women led at the highest levels in the most complicated, challenging, and male-dominated organization in the world. Now, in the post-#MeToo era, when positive role models of women leading are needed as never before, Polson brings these voices together, sharing her own life lessons and theirs with storytelling flair, keen insight, and incisive analysis of current research. With its gripping narrative and relatable takeaways, *The Grit Factor* is both inspiring and pragmatic, a book that will energize and enlighten current and aspiring leaders everywhere—whether male or female.

**ZAPPA'S GEAR: THE UNIQUE GUITARS AMPLIFIERS EFFECTS UNITS KEYBOARDS AND STUDIO EQUIPMENT** An inside look at the machinery behind the music of rock legend Frank Zappa. Frank Zappa was an unremitting musical innovator and experimenter, always looking for ways to exploit the latest advances in technology. His working life coincided with the explosive development of music technology that ran from the 1960s through the following three decades. Without such inventions as the Marshall amplifier, the Gibson SG, the wah-wah pedal, and the Synclavier—much of it modified to his requirements and used in ways for which they had never been designed—Zappa's "air sculptures," as his music has been described, would have had a significantly different shape and texture. Lavishly illustrated—including over 180 unique photographs of Frank Zappa's guitars and equipment taken by the author at his UMRK studio in LA and featuring a foreword by Dweezil Zappa—Zappa's Gear offers an unprecedented inside look at the machinery behind the legendary music. In addition to a detailed presentation of the equipment, Zappa's Gear also introduces some of the pioneering inventors, engineers, and entrepreneurs without whom the instruments would not exist. Zappa's Gear is an official Frank Zappa book produced and written with the full cooperation and endorsement of Gail Zappa and the Zappa Family Trust.

The Flaming Cow offers a rare insight into the brilliant but often fraught collaboration between Pink Floyd and composer Ron Geesin, the result of which became known as Atom Heart Mother - the Floyd's first UK number one album. From the time drummer Nick Mason visited Geesin's damp basement flat in Notting Hill, to the last game of golf between bassist Roger Waters and Geesin, this book is an unflinching account about how one of Pink Floyd's most celebrated compositions came to life. Alongside unpublished photographs from the Abbey Road recording sessions (the only ones taken) and the subsequent performances in London and Paris, Geesin goes on to describe how the title was chosen, why he was not credited on the record, how he left Hyde Park in tears, and why the group did not much like the work. The Flaming Cow rose again, firstly in France, then in London in 2008. After 40 years Atom Heart Mother remains a much-loved record, and The Flaming Cow explores its new-found cult status that has led to it being studied for the French Baccalauréat.

Dive into this no-holds-barred group autobiography of the critically acclaimed feminist punk-rock group, The Lunachicks—featuring never-before-seen materials from the band's private archive. *Fallopian Rhapsody: The Story of the Lunachicks* is a coming-of-age tale about a band of NYC teenagers who forged a sisterhood, found salvation, and fervently crashed the gates of punk rock during the '90s, accidentally becoming feminist icons along the way. More than that, this is a story about the enduring friendship among the book's three central voices: Theo Kogan, Sydney Silver, and Gina Volpe. They formed the Lunachicks at LaGuardia High School (of "Fame" fame) in the late '80s and had a record deal with Blast First Records as teenagers, whisked into the studio by Kim Gordon and Thurston Moore. Over the course of thirteen-ish years, the Lunachicks brought their brand of outrageous hard-rockin' rebelliousness around the world countless times, simultaneously scaring conservative onlookers and rescuing the souls of wayward freaks, queers, and outcasts. Their unforgettable costume-critiques of pop culture were as loud as their "Marsha[II]" amps, their ferocious tenacity as lasting as their pre-internet mythology. They toured with bands like the Go-Go's, Marilyn Manson, No Doubt, Rancid, and The Offspring; played the Reading Festival with Nirvana; and rocked the main stage at the Warped tour twice. Yet beneath all the makeup, wigs, and hilarious outfits were three women struggling to grow into adulthood under the most unorthodox of conditions. Together onstage they were invincible B-movie superheroes who kicked heaps of ass—but apart, not so much. Depression, addiction, and identity crises loomed overhead, not to mention the barrage of sexist nonsense they faced from the music industry. Filled with never-before-seen photos, illustrations, and ephemera from the band's private archive, and featuring contributions from Lunachicks drummer Chip English, founding member Sindi B., and former

bandmate Becky Wreck, *Fallopian Rhapsody* is a bawdy, gripping, warts-and-all account of how these city kids relied on their cosmic creative connection to overcome internal strife and external killjoys, all the while empowering legions of fans to shoot for the moon. For readers of Carrie Brownstein's *Hunger Makes Me a Modern Girl*, Kim Gordon's *Girl in a Band*, and Chrissie Hynde's *Reckless*, *Fallopian Rhapsody* is the literary equivalent of diving headfirst into a moshpit and slowly but surely venturing up to the front of the stage.

Peter Forbes, an intelligent and likeable but somewhat innocent and naïve young man, is twenty-three years old when he arrives in tropical Africa to join a field survey party of the Topographic Surveys directorate in the late 1950s. The life of surveyors in the bush is arduous and his task is a physically demanding one. For the next nine months his work will take him through dense equatorial rainforest to high mountains and grassy plateaux over 12,000 feet above sea level. Left on his own with the locally recruited Africans employed as lorry drivers, cooks and labourers, Forbes has to develop his strong latent qualities to survive and overcome problems, usually on his own, far from help. Jack Parker is in charge, a man older and more experienced than Forbes. They are of very different personalities and he takes great pleasure in introducing the impressionable Forbes to the local communities and the lively social scene between the Europeans stationed in the area, leading to the unworldly young surveyor becoming involved in casual affairs with two assertive women. The contrast between the dedication of the relatively few Europeans in the bush, working for Africa, and the others who enjoy the benefits of status and high salaries in the more developed centres could not have been more pronounced. Nine months later, his first tour at an end, Forbes leaves Africa, and in that time he has grown up, learned about the practice of surveying, and acquired a lasting love for the Dark Continent and its people.
