Roses are red, Violets are blue... And they're only two of the flowers in this book of bright colors and delightful information. Young readers will be fascinated to find out what flower can be used to make a doll, which flower flavors tea, and which flower farmers feed to chickens. Author Jerry Pallotta and illustrator Leslie Evans have collaborated to produce a stunning bouquet of words and pictures about the world of flowers—one of nature's most beautiful gifts.

All versions of our picture books (Paperback and E-book) are discreetly made, to make sure there are no mention of Dementia, memory loss, Alzheimer, Parkinson, or any form of sicknesses, and saddening words, both in the titles on the books and the interiors. In addition, our books are kept as simple and with few number of pages as possible, base on medical professionals advice. This is to prevent the users from getting overwhelmed, which is the reason they lose interest in "normal books" Having conversations with seniors with dementia and other challenges (Alzheimer's, Parkinson's disease, memory loss, or those

rehabilitating after a stroke) can be challenging. So does finding something they show interest in. This title offers a solution to get our loved ones' attention, with the aid of colorful high resolution flower pictures. These are popular flowers (native and imported) carefully chosen from different regions of Canada. This title will help reduce anxiety, bring back memories, and ultimately make seniors happy; having a sense of accomplishment when they see the flowers they love. Also, you can be assured it will make them very happy, when they discover new flowers. They may even decide to get the flowers.

The Flower Power books follow the funny fifth-grade adventures of four girls with little in common but their flower names who, nevertheless, blossom into the greatest of friends. Katie-Rose, Milla, Yasaman, and Violet have confronted their share of challenges in fifth grade: a dead hamster, turtle theft, trapeze lessons, and pesky boys, just to name a few. Nothing can stop these four fabulous friends. Well, nothing except for their archnemesis, the evil Modessa (a.k.a. "Medusa"). Somehow, Modessa has recruited one of the sweetest girls in the class to be her new sidekick. The

flower friends are determined to save Elena, even if it means braving Modessa's wrath. But it will also mean getting Katie-Rose to focus—she's a bit too busy NOT flirting with cute-but-annoying Preston. And then there's Yasaman's little sister's birthday "bubblegum" party, which the four friends promised to organize . . . if it's possible to call anything involving 30 kindergartners organized. Luckily, Violet is back to herself and ready to lead the Flowers to their most glorious triumph. With mean girls, romance, and tons of fifth-grade drama, this critically acclaimed friendship series shows that author Lauren Myracle "has her finger firmly on the pulse of tween girlhood." (Booklist) Praise for *Awesome Blossom* "The girls' giggle-worthy antics and enough dangling plot threads will keep readers wanting more." --Kirkus Reviews "Shining example of themes and language (parts of the story are told in IMs, e-mails, and chat messages) that will cut straight to the heart of tween girls." --Booklist

Our fates lie in our genes and not in the stars, said James Watson, co-discoverer of the structure of DNA. But Watson could not have predicted the scale of the industry now dedicated to this new frontier. Since the launch of the multibillion-dollar Human Genome Project, the biosciences have promised miraculous cures and radical new ways of understanding who we are. But where is the new world we were promised? Now updated with a new afterword, *Genes, Cells and Brains* asks why the promised cornucopia of health benefits has failed to emerge and reveals the questionable enterprise that has grown out of bioethics. The authors, feminist sociologist Hilary Rose and neuroscientist Steven Rose, examine the establishment of biobanks, the rivalries between public and private gene sequencers, and the rise of stem cell research. The human body is becoming a commodity, and the unfulfilled promises of the science behind this revolution suggest profound failings in genomics itself.

This book is a practical, compact guide for the identification of common tropical and subtropical ornamental plants by flower colour. It is intended for anyone who is interested in plants and would like to get to know the attractive flowering plants of warm regions while travelling. Certainly everyone in a foreign country has at some point admired a particularly exotic flower and wished to know which plant it is. With appealing photos and comprehensible texts, this book provides the answer -

quickly and easily. The author is an experienced tour guide and is regularly asked for eye-catching, ornamental plants on the way. She photographed the frequently requested plants and arranged them according to colour in this nature guide. This book is also suitable for beginners without previous botanical knowledge due to its illustrations and simple sorting.

Published originally in 1910, this charming collection of flower poems and full-color illustrations animates the 82 flowers included in the book. From Crocus to Holly, the flowers are ordered in the book as each would appear throughout the year in a garden. Each illustration is half child and half flower, creating a wonderful way for children to see themselves in the natural world.
