The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

This small book is exactly what the title says it is: an outline. It is meant as a convenient handbook for the student. A more detailed ``code" is being written to meet the needs of lawyers and researchers, and will hopefully be published soon. The purpose of this small book is to lay down the traditional law of Islam first, especially the law of the Hanafi school, and then to identify the points on which this law has been altered by statute or by case law. The purpose is not to identify the law first and then to fill the gaps with traditional law, which is what is done for the common law. On a few occasions, this outline differs from the position taken by other publications, especially Mulla's Code. The reason is that the position taken by such works, in these cases, is not in conformity with the traditional Islamic law. The differences have been indicated along with the position stated in such codes. Nevertheless, these occasions are not too many and the reader will not feel that there is a major departure from the earlier literature in the field. The outline also indicates those points where a decision taken by the learned courts is totally contrary to the rulings of traditional law. Reasons for disagreement have been indicated very briefly as a small outline cannot be burdened with detailed discussions. Despite its concise nature, the book has been quoted by some courts, including the Supreme Court of Pakistan.

This book provides the latest and updated account of the principles and practices of family laws in Pakistan. It is primarily based on the latest case law and statutes. The authors not only present systemically organised case law but also critically evaluate the leading judicial precedents. Various chapters of the book cover general principles of family law, demonstrate their application based on the facts of each case, trace patterns of developments in case law, rationalise conflicting judicial authorities, and propose law reform, wherever required. This is the first book that takes into account personal laws of non-Muslims in Pakistan and covers the important issue of the conflict of personal laws.

Outlines of Islamic jurisprudence covers a number of topics of usul al-fiqh, sometimes in abridged form, that have been covered in the title on the subject of Islamic Jurisprudence by the same author. The significance of this book can only be understood through a comparison with that book. Islamic jurisprudence focuses on the discipline of usul al-fiqh and deals with it in an exhaustive way. It, thus, covers the different aspects of interpretation and theories of Islamic law. The present book includes some of the topics covered in that book. The bulk of Outlines of Islamic Jurisprudence, however, summarizes the entire law of Islam presenting it in a concise yet effective way. Property, contracts, evidence, procedure, constitutional matters and issues of Muslim personal law (family law) are dealt with efficiently. The last part of the book also includes information on the schools of law and their history. Due to the treatment of the entire Islamic law in a comprehensive way, the book is like a short encyclopedia. The book was first published in 1998 and is now in its sixth edition. It is very popular among law students, lawyers and even the general readers. Minor improvements to the book have been made over the years and it is constantly updated. Parts of the book dealing with property and contracts are taught independently as a one semester course on contracts, in particular for Islamic banking. The section on the history of the schools serves as a brief introduction to the law of Islam.

Featuring 15 explosive new chapters, this new edition of the New York Times bestseller brings the story of Economic Hit Men up-to-date and, chillingly, home to the U.S.—but it also gives us hope and the tools to fight back. Former economic hit man John Perkins shares new details about the ways he and others cheated countries around the globe out of trillions of dollars. Then he reveals how the deadly EHM cancer he helped create has spread far more widely and deeply than ever in the US and everywhere else—to become the dominant system of business, government, and society today. Finally, he gives an insider view of what we each can do to change it. Economic hit men are the

shock troops of what Perkins calls the corporatocracy, a vast network of corporations, banks, colluding governments, and the rich and powerful people tied to them. If the EHMs can't maintain the corrupt status quo through nonviolent coercion, the jackal assassins swoop in. The heart of this book is a completely new section, over 100 pages long, that exposes the fact that all the EHM and jackal tools—false economics, false promises, threats, bribes, extortion, debt, deception, coups, assassinations, unbridled military power—are used around the world today exponentially more than during the era Perkins exposed over a decade ago. As dark as the story gets, this reformed EHM also provides hope. Perkins offers specific actions each of us can take to transform what he calls a failing Death Economy into a Life Economy that provides sustainable abundance for all.

PRINCIPLES OF MANAGEMENT AND ADMINISTRATION Mercury Learning and Information

The tax system of Pakistan continues to under-perform, in particular, in its ability to raise adequate revenues. The bases of the most important taxes, such as Personal and Corporate Income Tax and the General Sales Tax (GST), continue to be narrow and the level of tax evasion remains high. Moreover, in recent years, the Tax-to-GDP (Gross Domestic Product) ratio has seen a substantial decline. On the other hand, most of the macroeconomic fiscal adjustment in recent years has been on the expenditure side of the budget. The country's need for spending on social services such as education, health, and capital infrastructure are likely to increase in the near future as governments pursue a strategy of sustained economic growth. Most political manifestoes brought forward by political parties spell out major expenditure programmes while expressing a desire to increase tax collection. To reach the desired taxation level in Pakistan, an in-depth policy reforms programme needs to be formulated by policymakers. This will require a detailed analysis of tax structures and tax administration. An attempt has been made in this book to provide the necessary analysis.
