Explaining the basics of economics by demonstrating how real businesses use economics to make real decisions everyday, this text examines the factors that drive many of today's key financial decisions.

An Oona and Baba Adventure John Wiley & Sons
For one semester MBA Managerial Economics courses Economics for Managers presents the fundamental ideas of microeconomics and macroeconomics and integrates them from a managerial decision-making perspective in a framework that can be used in a single-semester course. To be competitive in today's business environment, managers must understand how economic forces affect their business and the factors that must be considered when making business decisions. This is the only book that provides business students and MBAs with a thorough and applied understanding of

both micro- and macroeconomic concepts in a way non-economics majors can understand. The third edition retains all the same core concepts and straightforward material on micro- and macroeconomics while incorporating new case material and real-world examples that relate to today's managerial student.

This is a book about everything. Or, to be precise, it explores how everything is connected from code to culture. We think we're designing software, services, and experiences, but we're not. We are intervening in ecosystems. Until we open our minds, we will forever repeat our mistakes. In this spirited tour of information architecture and systems thinking, Peter Morville connects the dots between authority, Buddhism, classification, synesthesia, quantum entanglement, and volleyball. In 1974 when Ted Nelson wrote "everything is deeply intertwined," he hoped we might realize the true potential of hypertext and cognition. This book follows naturally from that.

During the 1692 witch trials, more than 150 people were arrested. An estimated

25 million Americans—including author Diane Foulds—are descended from the twenty individuals executed. What happened to our ancestors? *Death in Salem* is the first book to take a clear-eyed look at this complex time, by examining the lives of the witch trial participants from a personal perspective.

Massachusetts settlers led difficult lives; every player in the Salem drama endured hardships barely imaginable today. Mercy Short, one of the "bewitched" girls, watched as Indians butchered her parents; Puritan minister Cotton Mather outlived all but three of his fifteen children. Such tragedies shaped behavior and, as Foulds argues, ultimately played a part in the witch hunt's outcome. A compelling "who's who" to Salem witchcraft, *Death in Salem* profiles each of these historical personalities as it asks: Why was this person targeted?

"You're going to sell what? Empty Boxes?" Back in 1978, Kip Tindell (Chairman & CEO of The Container Store) and his partners had the vision that people were eager to find solutions to save both space and time - and they were definitely onto something. A new category of the retailing industry was born - storage and organization. Today, with stores nationwide and with more than 5,000 loyal employees, the company couldn't be stronger. Over the years, The Container Store has been lauded for its commitment to its employees and focus on its original concept and inventory mix as the formula for its success. But for Tindell, the goal never has been growth for growth's sake.

Rather, it is to adhere to the company's values-based business philosophies, which center on an employee-first culture, superior customer service and strict merchandising. The Container Store has been named on Fortune magazine's "100 Best Companies To Work For" list for 15 consecutive years. Even better, The Container Store has millions of loyal customers. In *Uncontainable*, Tindell reveals his approach for building a business where everyone associated with it thrives through embodying the tenets of Conscious Capitalism. Tindell's seven Foundation Principles are the roadmap that drives everyone at The Container Store to achieve the goals of the company. *Uncontainable* shows how other businesses can adapt this approach toward what Tindell calls the most profitable, sustainable and fun way of doing business. Tindell is that rare CEO who fully embraces the "Golden Rule" of business - where all stakeholders - employees, customers, vendors, shareholder, the community - are successful through a harmonic balance of win-wins.

"The actor will do, in public, what is considered impossible." When the renowned Polish director Jerzy Grotowski

began his 1967 American workshop with these words, his students were stunned. But within four weeks they themselves had experienced the "impossible." In *An Acrobat of the Heart*, teacher-director-playwright Stephen Wangh reveals how Jerzy Grotowski's physical exercises can open a pathway to the actor's inner creativity. Drawing on Grotowski's insights and on the work of Stanislavski, Uta Hagen, and others, Wangh bridges the gap between rigorous physical training and practical scene and character technique. Wangh's students give candid descriptions of their struggles and breakthroughs, demonstrating how to transform these remarkable lessons into a personal journey of artistic growth. Courageous and compelling, *An Acrobat of the Heart* is an invaluable resource for actors, directors, and teachers alike.
