Now your students can become intelligent consumers of scientific research, without being overwhelmed by the statistics! Jaccard and Becker's text teaches students the basic skills for analyzing data and helps them become intelligent consumers of scientific information. Praised for its real-life applications, the text tells students when to use a particular statistic, why they should use it, and how the statistic should be computed and interpreted. Because many students, given a set of data, cannot determine where to begin in answering relevant research questions, the authors explicate the issues involved in selecting a statistical test. Each statistical technique is introduced by giving instances where the test is most typically applied followed by an interesting research example (each example is taken from psychology literature).

Author of *Honda Mini Trail: Enthusiast's Guide*, Jeremy Polson has put together another vintage Honda guide. It covers the third-best-selling Honda in American Honda history, the long-running Mini Trail CT-70, along with the CL, SL, and XL 72-cc motorcycles manufactured from 1969 to 1994. Polson begins with a brief introduction of the models that led to the first CL-70, and then jumps into a thorough analysis of the many models and iterations that Honda offered through the years. With more than 25 years of experience collecting, restoring, and selling more than 200 small-displacement Hondas, Polson is the ideal author for this must-have look at a group of Honda's most popular motorcycles. Despite the worldwide popularity of American Honda's 72-cc motorcycles, no other book on these models has been published, and the accuracy of information found on the Internet is suspect at best. It could be called the "Bible for Honda 72-cc collectors and enthusiasts," because this book presents facts and figures backed up by production dates, serial numbers, and dealer information found nowhere else. In addition to the hard facts, this book is filled with many rare photos that track the evolution of Honda's 72-cc motorcycles and unravels their mystery. Rare models covered include the first CT-70 "Silver Tags" with more than 30 features not found on the majority of later-model CT-70s, as well as many other low-production 72-cc motorcycles.

Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response.
