Elsevier Health Sciences This book is to explores a variety of facets of online learning environments to understand how learning occurs and succeeds in digital contexts and what teaching strategies and technologies are most suited to this format. Business, health, government and education are some of the core sectors of society which have been experiencing deep

transformations due to a generalized digitalization. While these changes are not novel, the swift progress of technology and the rising complexity of digital environments place a focus on the need for further research and novel strategies. In the context of education, the promise of increased flexibility and broader access to educational resources is impelling much of higher education's course offerings to online environments. The 21st century learner requires

an education that can be pursued anytime and anywhere and that is more aligned with the demands of a digital society. Online education not only assists students to success-fully integrate a workforce that is increasingly digital, but it helps them to become more comfortable with the use of technology in general and, hence, more prepared to be prolific digital citizens. The variety of settings portrayed in this volume attest to the unlimited opportunities afforded by

online learning and serve as valuable evidence of its benefit for students' educational experience. Moreover, these research efforts assist a more comprehensive reflection about the delivery of higher education in the context of online settings.

Based on detailed multi-disciplinary analyses of more than 800 recorded handover interactions, audits of written handover documentation, interviews

and survey responses, the contributing authors identify features of effective and ineffective clinical handovers in diverse hospital contexts. The authors then translate their descriptive findings into practical protocols, communication strategies and checklists that clinicians, managers and policy makers can apply to improve the safety and quality of clinical handovers. All the contributors are affiliated with the International Research Centre for Communication in

All of us, as Canadians, are touched throughout our lives by some aspect of social welfare, either as recipients, donors, or taxpayers. But despite the importance of the social

network in our country, there has been no single source of information about this critical component of our society. Even professionals in the field of social work or social services have not had a comprehensive volume addressing the myriad features of this critical societal structure. The Encyclopedia of Canadian Social Work fills this need. Over five hundred topics important to Canadian social work are covered, written by a highly diverse group of social workers covering all

aspects of the field and all areas of the country. Practitioners, policy makers, academics, social advocates, researchers, students, and administrators present a rich overview of the complexity and diversity of social work and social welfare as it exists in Canada. The principal finding from this project underscores the long-held perception that there is a Canadian model of social work that is unique and stands as a useful model to other countries. The Encyclopedia of Canadian

Social Work will be an important source of information, both to Canadians and to interested groups around the world. The Encyclopedia of Canadian Social Work is available in e-book version by subscription or from university and college libraries through the following vendors: Canadian Electronic Library, Ebrary, MyiLibrary, and Netlibrary.

Communication is often an overlooked responsibility of community colleges, which is unfortunate because there is so much to talk about.
Understanding the factors

that contribute to successful communication is important if community colleges are to have success in the political arena, explaining their evolving mission to policymakers and the community, and informing potential students of new requirements. This study was conducted to learn what communication strategies are in place at selected California community colleges and to inform college leaders about strengths, weaknesses, opportunities and threats related to

current communication practices. It seeks to provide useful information about current practices, identify problems with existing forms of communication, and suggest improvements. This study used the data collected to attempt to predict what the future might look like in terms of communication needs and how the state's community colleges can meet them. Results of the study indicate that the messages and target audiences of community college communication

professionals have shifted substantially. "Welcome, come look around" has been replaced by "prepare and declare," a reflection of looming legislation to require California students to declare majors and have a Student Education Plan in order to receive financial aid. Opinion leaders are now the primary communication targets of the public information officers interviewed. Messages focus on financial stewardship and sound management during a challenging

financial time. Community colleges should develop strong and effective communication offices led by experienced communication professionals to reach out to prospective students, community leaders, potential partners and elected officials. Communication during times of competition for resources is particularly important, and community colleges should intensify their efforts to communicate and establish working relationships with local,

state and federal elected officials and administrators. Community colleges that fail to do this risk a diminished share of funding and influence in an increasingly competitive environment.
