PORTER BENTLEY

A Guide to the World's Rifles and Shotguns Regnery Publishing
Lincoln's Trident is the definitive account of the US Navy's West Gulf Blockading Squadron's quarantine of the Confederacy in the central and western Gulf of Mexico and adjacent river systems.

The Lion's Game Dbi Books

NEW YORK TIMES BESTSELLER "A master at keeping the reader hanging on to see what happens next " - Associated Press "The Lion" will be landing. . . And at New York's JFK Airport, an elite American task force waits as the notorious Libyan terrorist prepares to defect to the West. Then, aboard Flight 175, something goes eerily, horribly wrong -- a mere prelude to the terror that is to come. Ex-NYPD cop, now Federal Task Force agent John Corey -- together with his formidable and beautiful new partner, Kate Mayfield -- will follow a trail of smoke and blood across the country. His quarry: a foe with the cunning of a lion and all the bloodlust of a man. To win a desperate game with no rules at all, Corey must invent a strategy that leaves no room for mistakes.

From Perfumer to Consumer Wilderness Adventures Press

Food, water, and shelter are very important to survival. But you must also be ready to protect what is yours, because if somebody stronger, better prepared, and better equipped takes it all away, you will die. Your family will die. The only way to protect them is with firearms. Written with the law-abiding civilian in mind, Prepper Guns covers the firearms and tools needed to survive, not only for defense, but also for foraging. It is a comprehensive look at the realities of the firearms a prepper should have. Written by Bryce M. Towsley, a firearms expert and a full-time gun writer with thirty years of experience, it steps away from the "conventional wisdom" that is often spouted by prepper publishing and takes a hard, honest, look at the reality of the firearms, ammo, tools and training needed to survive at home and on the road. Prepper Guns takes a careful look at each category of firearms, ammo, sights, and accessories. Other topics include gun care and maintenance, as well as some simple gunsmithing and reloading to keep firearms repaired and ammo on hand. Finally, Prepper Guns has training suggestions and drills, plus a look at the psychology of survival, using the expertise of some of the top people in the world in these fields. If you are worried that bad things are coming and are trying to prepare, this book is the most important piece of gear you can buy. Because if you can't protect your family, your food and your home, nothing else really matters.

Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

A Comprehensive Handbook on How to Protect Your Property from Intrusion and Invasion Macmillan

While the 20th century brought many technological advancements to the battlefield, a key weapon of warfare remains the soldier and his rifle. This volume chronicles the historical development of the modern service rifle after World War II and examines its resurgence in Afghanistan after generations of absence following the introduction of the assault rifle. Individual chapters survey the most combat-tested models--including the FN FAL, U.S. M14 and HK 417--in technical detail, emphasizing key points in the evolution of rifle technology and ammunition. Also explored is the development of the current M16 series rifle, and how recent difficulties in Afghanistan have led to an increasing reliance on the venerable M14. Providing a strong knowledge base of the various weapons now in service throughout the world, this instructive work demonstrates that the battle rifle has not outlived its usefulness.

Gun Digest, 1984 DBI Books

A complete resource manual for gun enthusiasts, the 1990 edition of Gun Digest features even more information than ever before.

LINCOLN'S TRIDENT

Periscope Film LLC

The Browning Automatic Rifle (known as the "BAR") M1918 was designed in 1917 by John Browning for the U.S. Expeditionary Corps in Europe. The M1918 is a selective fire, air-cooled automatic rifle chambered for the .30-06 Springfield rifle cartridge. It uses a gas-operated long-stroke piston rod actuated by propellant gases bled through a vent in the barrel. The bolt is locked by a rising bolt lock and the gun fires from an open bolt. The spring-powered cartridge casing extractor is contained in the bolt and a fixed ejector is installed in the trigger group. As a heavy automatic rifle designed for support fire, the M1918 was not fitted with a bayonet mount and no bayonet was ever issued. Although the weapon did see some action in World War I, the BAR did not become standard issue in the U.S. Army until 1938 when it was issued to squads as a portable light machine gun. The Browning saw extensive service in both World War II and the Korean War and saw some service early in the Vietnam War. The U.S. Army began phasing out the M1918 in the late 1950s and was without a portable light machine gun until the introduction of the M249 Squad Automatic Weapon in the mid-1980s. Created in 1940, this field manual reveals a great deal about the M1918's design and capabilities. Intended as a field manual for operation and maintenance, it details gun assembly, accessories and much more. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.

Shooter's Bible, 109th Edition Simon and Schuster

The bond strength of four sets of reinforcing bars is evaluated, two each with No. 5 and No. 10 (No. 16 and No. 32) bars, which have, respectively, nominal diameters of 0.625 and 1.27 in. (15.9 and 32.3 mm). One bar of each size satisfies the criterion for maximum deformation spacing in ASTM reinforcing bar specifications, while the other has deformations that exceed the maximum spacing. All bars exceed the requirements for minimum deformation height. Research related to the effect of deformation properties on bond strength, including the research used to establish the requirements for deformations in ASTM reinforcing bar specifications, is also reviewed. The test results match earlier research and demonstrate that (1) bond strength is not governed by the specific value of deformation height or spacing, but by the combination of the two as represented by the relative rib area of the bars and (2) the bond strength of the bars with deformation spacings that exceed those in ASTM reinforcing bar specifications is similar to the bond strength of the bars that meet the specification. Based on this and prior research, it is recommended that ASTM reinforcing bar specifications be modified to allow for deformation spacing up to 90 % (currently a maximum of 70 %) of the bar diameter provided the ratio of deformation height to deformation spacing is greater than or equal to the minimum ratio for bar deformations meeting the current requirements in ASTM reinforcing bar specifications.

Collected articles survey developments in gun technology and ballistics as well as providing information on antique guns and collector's items

The Gift DBI Books

A "winning and expansive novel" that "describes one woman's intimacies with lovers, strangers, culture and ideas, and family and friends" (Chris Kraus, author of *I Love Dick*). In the midst of the Occupy Wall Street movement, a writer and academic from New York named Barbara Andersen begins spamming people indiscriminately with ukulele covers of sentimental songs. A series of inappropriate intimacies ensues, including an erotically charged correspondence and then collaboration with an extraordinarily gifted and troubled musician living in Germany. "All this might seem like so much postmodern hot air, but the narrator has an exceptionally graceful page presence: loony and profound, vulnerable and ingenuous, Barbara acts to unify the book's central concerns, giving its intellectual flights of fancy a palpable human pulse. Maybe nothing in this book is exactly what it seems. But the sadness, at least, is real" (Publishers Weekly, starred review).

THE ULTIMATE MAN'S SURVIVAL GUIDE

Paul Feist

For nearly fifty years the hard-hitting, mobile Browning Automatic Rifle, or BAR, served in US infantry units as a light squad automatic "base of fire" weapon, providing quick bursts of concentrated fire. Designed in World War One, it didn't reach the front until September 1918. In the interwar years US forces used the BAR across the world, from China to Nicaragua. It also became a favorite of notorious gangsters like Clyde Barrow and Bonnie Parker, who prized its ability to punch through police armored cars. At the outset of World War II the US armed forces decided to adapt the BAR for a light machine gun role. The BAR was not without its flaws; it was heavy and difficult to dismantle and reassemble, and it didn't cope well with sustained fire. Nevertheless, the BAR saw action in every major theater of World War II and went on to be used in Korea and in the opening stages of the Vietnam War. Featuring arresting first-hand accounts, specially drawn full-color artwork and close-up photographs, many in color, this lively study offers a vivid portrait of this powerful, long-lived and innovative weapon that saw service with US and other forces across the world for much of the 20th century.
