Verhandelingen over de drijfveren van mensen in het dagelijkse leven en de vaak verrassende economische gevolgen daarvan.
Confessions of a Hero-Worshiper Penguin

A behavioral economist and a veteran Sports Illustrated writer analyze hidden influences and subtle biases that shape sports plays, covering such topics as performance pressures, the "home field advantage" and the overpayment of athletic talent. Reprint. *When to Rob a Bank* Harper Perennial
Based on the series produced for the BBC World Service Who thought up paper money? How did the contraceptive pill change the face of the legal profession? Why was the horse collar as important for human progress as the steam engine? How did the

humble spreadsheet turn the world of finance upside-down? The world economy defies comprehension. A continuously-changing system of immense complexity, it offers over ten billion distinct products and services, doubles in size every fifteen years, and links almost every one of the planet's seven billion people. It delivers astonishing luxury to hundreds of millions. It also leaves hundreds of millions behind, puts tremendous strains on the ecosystem, and has an alarming habit of stalling. Nobody is in charge of it. Indeed, no individual understands more than a

fraction of what's going on. How can we make sense of this bewildering system on which our lives depend? From the tally-stick to Bitcoin, the canal lock to the jumbo jet, each invention in Tim Harford's fascinating new book has its own curious, surprising and memorable story, a vignette against a grand backdrop. Step by step, readers will start to understand where we are, how we got here, and where we might be going next. Hidden connections will be laid bare: how the barcode undermined family corner shops; why the gramophone widened inequality; how barbed wire shaped America. We'll meet the characters who developed some of these inventions, profited from them, or were ruined by them. We'll trace the economic principles that help to explain their transformative effects. And we'll ask what lessons we can learn to make wise use of future inventions, in a world where the pace of innovation will only accelerate.

A new generation of MacGregor women discovers their grandfather's matchmaking talent in this charming collection from #1 New York Times bestselling author Nora Roberts. There is nothing Daniel MacGregor would rather see than his three eldest granddaughters—Laura, Gwendolyn and Julia—married. But the three cousins have one-track minds, and love is taking a back seat to career success. Until Daniel handpicks three unsuspecting candidates for grooms—and throws them in their paths... “You can't bottle wish fulfillment, but Nora Roberts certainly knows how to put it on the page.”—New York Times A NORA ROBERTS CLASSIC AVAILABLE DIGITALLY FOR THE FIRST TIME

Why Americans Don't Think for Themselves FaithWords

In Paris for a weekend visit, Elizabeth Bard sat down to lunch with a handsome Frenchman -- and never went home again. Was it love at first sight? Or was it the way her knife slid effortlessly through her pavé au poivre, the steak's pink juices puddling into the buttery pepper sauce? Lunch in Paris is a memoir about a young American woman caught up in two passionate love affairs - one with her new beau, Gwendal, the other with French cuisine. Packing her bags for a new life in the world's most romantic city, Elizabeth is plunged into a world of bustling open-air markets, hipster bistros, and size 2 femmes fatales. She learns to gut her first fish (with a little help from Jane Austen), soothe pangs of homesickness (with the rise of a chocolate soufflé), and develops

a crush on her local butcher (who bears a striking resemblance to Matt Dillon). Elizabeth finds that the deeper she immerses herself in the world of French cuisine, the more Paris itself begins to translate. French culture, she discovers, is not unlike a well-ripened cheese -- there may be a crusty exterior, until you cut through to the melting, piquant heart. Peppered with mouth-watering recipes for summer ratatouille, swordfish tartare and molten chocolate cakes, Lunch in Paris is a story of falling in love, redefining success and discovering what it truly means to be at home. In the delicious tradition of memoirs like *A Year in Provence* and *Under the Tuscan Sun*, this book is the perfect treat for anyone who has dreamed that lunch in Paris could change their life.

Dr. Smil is the world's authority on nitrogenous fertilizer. The industrial synthesis of ammonia from nitrogen and hydrogen has been of greater fundamental importance to the modern world than the invention of the airplane, nuclear energy, space flight, or television. The expansion of the world's population from 1.6 billion people in 1900 to today's six billion would not have been possible without the synthesis of ammonia. In *Enriching the Earth*, Vaclav Smil begins with a discussion of nitrogen's unique status in the biosphere, its role in crop production, and traditional means of supplying the nutrient. He then looks at various attempts to expand natural nitrogen flows through mineral and synthetic fertilizers. The core of the book is a detailed narrative of the discovery of ammonia synthesis by Fritz Haber—a discovery scientists had sought for over one hundred years—and its commercialization by Carl Bosch and the chemical company

BASF. Smil also examines the emergence of the large-scale nitrogen fertilizer industry and analyzes the extent of global dependence on the Haber-Bosch process and its biospheric consequences. Finally, it looks at the role of nitrogen in civilization and, in a sad coda, describes the lives of Fritz Haber and Carl Bosch after the discovery of ammonia synthesis.

Acclaimed social critic Curtis White describes an all-encompassing and little-noticed force taking over our culture and our lives that he calls the Middle Mind: the current failure of the American imagination in the media, politics, education, art, technology, and religion. Irreverent, provocative, and far-reaching, White presents a clear vision of this dangerous mindset that threatens America's intellectual and cultural freedoms, concluding with an imperative to reawaken and unleash the once powerful American imagination. The Middle Mind is pragmatic, plainspoken, populist, contemptuous of the Right's narrowness, and incredulous before the Left's convolutions. It wants to protect the Arctic National Wildlife Refuge, and has bought an SUV with the intent of visiting it. It even understands in some indistinct way how that very SUV spells the Arctic's doom.

Global Warming Facts for Faith-Based Decisions Penguin UK

Most Christian lifestyle or environmental books focus on how to live in a sustainable and conservational manner. A CLIMATE FOR CHANGE shows why Christians should be living that way, and the consequences of doing so. Drawing on the two authors' experiences, one as an internationally recognized climate scientist and the other as an evangelical leader of a growing church, this book explains the science underlying global warming,

How I Learned to Pay Attention, Master Myself, and Win DEBOLSILLO

Steven Levitt and Stephen Dubner single-handedly showed the world that applying counter-intuitive approaches to everyday problems can bear surprising results. Think Like a Freak will take readers further inside this special thought process, revealing a new way of approaching the decisions we make, the plans we create and the morals we choose. It answers the question on the lips of everyone who's read the previous books: How can I apply these ideas to my life? How do I make smarter, harder and better decisions? How can I truly think like a freak? With short, highly entertaining insights running the gamut from "The Upside of Quitting" to "How to Succeed with No Talent," Think Like a Freak is poised to radically alter the way we think about all aspects of life on this planet.

John Lithgow sings one of his most popular songs, "I Got Two Dogs," in this e-book edition. The clever rhyming text tells of the narrator's two dogs who could not be more different—one is big, one is small, one barks quietly, while one has a loud and enthusiastic bark—but he loves them both the same. The bold graphic art style adds humor by revealing that the narrator's view of the dogs isn't exactly the way others might see them.

THE FOREVER PORTFOLIO

MIT Press

Avec Freakonomics, leur premier livre (Folio actuel numéro 132), Levitt et Dubner ont transformé notre regard sur le monde en appliquant les méthodes de l'économie aux petites bizarreries de la vie quotidienne. SuperFreakonomics aborde une nouvelle série de questions aussi insolites les unes que les autres. La méthode économique n'est ici ni une simple discipline universitaire ni une stricte explication mathématique de l'"économie", mais un instrument dont il faut se servir pour décrire comment nous prenons des décisions : c'est le mariage de la méthode économique et de la curiosité iconoclaste. Finalement, il ressort de toutes ces démonstrations une redoutable évidence : les êtres humains, que l'économie traite en sujets rationnels et calculateurs, ne font qu'obéir aux incitations.
