In a science fiction thriller set in modern America, a male alcoholic stoner obsessed with faster than light travel must evade and outsmart the near omniscient Project Luddite and It's All Seeing Eye to see his dream come true. Sample Chapter - Debunking the Debunkers! made my way from my bedroom where I had just steamrolled several hits of cannabis off of my bong, getting nice and high, to my home office. I went to Google first, I found an article called How I Control Gravitation by Thomas Townsend Brown. It discusses an experiment of his using two 44lb lead spheres suspended by a wire, positive for one sphere, negative for the other sphere with a glass rod in between the spheres. When 120kV of steady DC electricity was turned on Brown claims the apparatus moved in the direction from negative sphere to positive sphere. Now there are lifter builders out there who will claim the Biefeld-Brown effect is nothing more than ion wind, electrically charged air, and that air flow is what lifts the craft into the air. They have even put lifters in a vacuum to show the propulsion effect will not work without air and would therefore be useless in the vacuum of space. Lifters are missing what appears to be a critical component, the dielectric between the positive and negative plates, in this example the glass rod or in the ARV the plastic, G10, or epoxy resin. Otherwise, for there to be movement of the 44lb spheres, Brown's lab would had to have a hurricane blowing through it. That does not seem likely. Occam's Razor says the simplest reason is the most likely one, even if that reason defies the known laws of physics. The experimental data trumps theory. Further research was required though. I found one paper, Twenty First Century Propulsion Concept: <http://www.otherhand.org/wp-content/uploads/2012/04/Talley-paper-propulsion-concept.pdf>, in the Anomalies section, a series of experiments with pulsed voltages was done. Generally, no motion of the test devices was observed, except in Test No. 69 (the last test) where a very small but detectable motion was seen. The only experiment producing a result was when the 19kV was applied to the positive plate at a pulse rate frequency of 600 Hz with a solid dielectric between the capacitor plates that caused the torsion pendulum to twist ever so slightly, applying a small but consistent pressure. I took another break to smoke some more cannabis from my bowl. I calmly watched the smoke fill the room as I exhaled. Euphoria and certainty that I was onto something filled my mind like the smoke in the room. Another paper, Asymmetrical Capacitors for Propulsion: <http://www.forbiddentechnology.org/pdfs/AsymmetricalCapacitorsforPropulsion.pdf>, in the Observations section detailed one of the experiments where movement was seen in a vacuum. Only the capacitor with a solid dielectric between the positive and negative capacitor plates moved in a vacuum when the 50kV steady DC was first applied to the positive capacitor plate. A rotation of about 1/8th was seen through the viewing port of the vacuum chamber. A spark accompanied the movement which stopped just after it started. The conductors of the experiment speculated that material had been ejected when the spark

occurred and that that was why the capacitor moved. That seems unlikely to me, after all, why weren't there sparks and material ejected when the other capacitors were tested? Furthermore, if they had encased the Brown capacitor with epoxy that would have eliminated the spark and they would have been able to tell if the Brown capacitor would have still moved. The key appears to be high voltage, the higher the better, those last two experiments used 19kV and 50kV, Brown used 120kV steady DC, and the ARV supposedly used between 500kV - 1,000kV DC, pulsed into the capacitors.

Electrogravitics II Sterling Gate Books

Author David Thomson and Jim Bourassa have founded the Quantum AetherDynamics Institute, an organization dedicated to understanding the Aether. For the first time in human history, the Aether is fully quantified based upon empirical data. Through a very simple observation noted nearly 200 years ago by Charles Coulomb, the electromagnetic units have been corrected of an error that has led physics astray for so long. Now, electrodynamics expresses in simple dimensional equations, the neurosciences unite with quantum and classical physics, and we can precisely model the geometry of subatomic particles.

THE ALCHEMY OF CREATION

Adventures Unlimited Press

Paul LaViolette reveals astonishing parallels between cutting edge scientific thought and early creation myths, and how these myths encode a theory of cosmology in which matter is continually growing from seeds of order that emerge spontaneously from chaos. Exposing the contradictions of the Big Bang theory, LaViolette leads us beyond the restrictive metaphors of modern science and into a new science for the 21st century.

WWII'S SECRET LEGACY

Simon and Schuster

In the tradition of The Anti-Gravity Handbook and the Time-Travel Handbook comes this all-new compilation of material on anti-gravity, free energy, flying saucers and Tesla technology. With plenty of technical drawings and explanations, this suppressed technology will change the world in ways we can only dream of. Chapters on anti-gravity mercury gyros, the motionless electromagnet generator patent, the Tesla pyramid engine, anti-gravity patents, rare photos of the machines in flight, and tons more. The book that finally blows the lid on suppressed technology and anti-gravity! Heavily illustrated.

THEORY OF AEROSPACE PROPULSION

Createspace Independent Publishing Platform

A companion volume to 'Electrogravitics Systems: Reports on a New Propulsion Methodology', this book delivers: (1) the scientific validation from three different authorities; (2) the compelling public history of gravity research conducted by the aviation industry before it became 'unacknowledged' and (3) testimonials which eye-witnesses have provided. In total, this anthology attests to the validity of the Biefeld-Brown high voltage force effect. The book's Science Section includes a well-known 'electrokinetic force' and how it works; the proposed ion mobility explanation; and how electricity and gravity may couple. The Historical Section contains seven articles about T T Brown, gravity

research, etc. Also included are a Testimonial Section and Patent Section.

This riveting work of investigative reporting and history exposes classified government projects to build gravity-defying aircraft-- which have an uncanny resemblance to flying saucers. The atomic bomb was not the only project to occupy government scientists in the 1940s. Antigravity technology, originally spearheaded by scientists in Nazi Germany, was another high priority, one that still may be in effect today. Now for the first time, a reporter with an unprecedented access to key sources in the intelligence and military communities reveals suppressed evidence that tells the story of a discovery that could prove as powerful as the A-bomb. The Hunt for Zero Point explores the scientific speculation that a "zero point" of gravity exists in the universe and can be replicated here on Earth. The pressure to be the first nation to harness gravity is immense, as it means having the ability to build military planes of unlimited speed and range, along with the most deadly weaponry the world has ever seen. The ideal shape for a gravity-defying vehicle happens to be a perfect disk, making antigravity tests a possible explanation for the numerous UFO sightings of the past 50 years. Chronicling the origins of antigravity research in the world's most advanced research facility, which was operated by the Third Reich during World War II, The Hunt for Zero Point traces U.S. involvement in the project, beginning with the recruitment of former Nazi scientists after the war. Drawn from interviews with those involved with the research and who visited labs in Europe and the United States, The Hunt for Zero Point journeys to the heart of the twentieth century's most puzzling unexplained phenomena.

This book demonstrates the exciting promise that zero point energy, which supports every atom and molecule, will soon be used directly to power a car, house, or spaceship. With a clear, simple-to-understand style, a former community college teacher provides the only book with the history and science of zero point energy that emphasizes its usage. Here is the only uninterruptible fuel supply for the near future that will be here sooner than you think. Business entrepreneur? You need to learn about this before your competition does.

Theory of Aerospace Propulsion, Second Edition, teaches engineering students how to utilize the fundamental principles of fluid mechanics and thermodynamics to analyze aircraft engines, understand the common gas turbine aircraft propulsion systems, be able to determine the applicability of each, perform system studies of aircraft engine systems for specified flight conditions and preliminary aerothermal design of turbomachinery components, and conceive, analyze, and optimize competing preliminary designs for conventional and unconventional missions. This updated edition has been fully revised, with new content, new examples and problems, and improved illustrations to better facilitate learning of key concepts. Includes broader coverage than that found in most other books, including coverage of propellers, nuclear rockets, and space propulsion to allows

analysis and design of more types of propulsion systems Provides in-depth, quantitative treatments of the components of jet propulsion engines, including the tools for evaluation and component matching for optimal system performance Contains additional worked examples and progressively challenging end-of-chapter exercises that provide practice for analysis, preliminary design, and systems integration

Inside the Classified World of Antigravity Technology

Simon and Schuster

"The U.S. Government has a new ground based "Star Wars" weapon which is being tested in the remote bush country of Alaska. This new system manipulates the environment which can: Disrupt human mental processes. Jam all global communications systems. Change weather patterns over large areas. Interfere with wildlife migration patterns. Negatively affect your health. Unnaturally impact the Earth's upper atmosphere. The U.S. military calls its zapper HAARP (High-frequency Active Auroral Research Project). But this skybuster is not about the Northern Lights. This device will turn on lights never intended to be artificially manipulated. Their first target is the electrojet - a river of electricity that flows thousands of miles through the sky and down into the polar icecap. The electrojet will become a vibrating artificial antenna for sending electromagnetic radiation raining down on the earth. The U.S. military can then "X-ray" the earth and talk to submarines. But there's much more they can do with HAARP. This book reveals surprises from secret meetings"--Back cover.

Secrets of Antigravity Propulsion Health Research Books
Discovered in 1918 by a professor, electrogravitics has been put to the test decade after decade by aviation industries and the military. It is an anomalous propulsion force from a high voltage capacitive charge, similar to an electrokinetic force. In the 1950s, T. Townsend Brown recommended a "flying wing" model to the Naval Research Lab for its implementation and years later, the B-2 bomber fulfilled this vision. Electrogravitics Systems includes historical documents, patents, and an exciting article by Dr. Paul LaViolette on how the B-2 uses such an energy-efficient, futuristic propulsion concept today.

Validating Reports on a New Propulsion Methodology Adventures Unlimited Press

In *Earth Under Fire*, Paul LaViolette investigates the connection between ancient world catastrophe myths and modern scientific evidence of a galactic destruction cycle, demonstrating how past civilizations accurately recorded the causes of these cataclysmic events, knowledge of which may be crucial for the human race to survive the next catastrophic superwave cycle.

Secrets of the Aether Inner Traditions / Bear & Co

The biggest mystery of our era finally gets the balanced and unbiased investigation it deserves. 'ANTIGRAVITY PROPULSION: Human or Alien Technologies?' is a far-reaching exploration into the UFO phenomenon that covers all possible scenarios and

discounts nothing. Written by novelists, filmmakers and independent researchers James Morcan & Lance Morcan, with a foreword by advanced interstellar propulsion systems expert Grant Hayman and an afterword by leading scientist and space industry veteran Dr. Takaaki Musha, one of the great enigmas of all time is examined with equal doses of open-mindedness and skepticism. This book includes never-before-mentioned accounts of popular UFO topics like Area 51, Roswell and alien abduction claims, as well as tackling less reported subjects such as Nazi and Japanese antigravity experiments and even rarer theories involving quantum physics and lost civilizations of the ancients. What do all the sightings of UFO's around the world reveal? Who is covering up the existence of these strange craft in our skies? And are the technologies manmade or extraterrestrial in origin? Forget what you think you already know and prepare to be surprised. For those searching for the truth about these exotic technologies and wanting to know why they are being concealed from the public, ANTIGRAVITY PROPULSION is a must read.

The ancient books of Genesis and Enoch tell us that spirit beings known as the Watchers descended to the Earth, had sex with women, and begat a hybrid race of offspring known as the Nephilim. Such tales are as old as humanity itself. These histories and accounts of visitations and subsequent mixed-blood, alien-human races comprise the bulk of the world's myths, legends, religions, and superstitions. The Rise and Fall of the Nephilim examines: Elohim and the Bene Ha Elohim—God and the Sons of God The Watchers: UFOs, extraterrestrials, angels, infiltrators, and impregnators Biblical and apocryphal sources from Enoch to Moses The role of the Fae, Elves, Elementals, and ancient gods What if the old spiritualities and religions weren't just legends? What if there was something living and breathing beneath the surface, a tangible interlinking of religious thought and spirituality, science and myth, inter-dimensionality and cold, hard fact? The Nephilim walked among us... and still do today.

Field Propulsion by control of gravity is a space drive mechanism of new kind. It is based on gravito-inertial effect predicted by BSM Supergravitation unified theory and called a Stimulated Anomalous Reaction to Gravity. It is activated by a Heterodyne Resonance Method invoking Quantum mechanical interactions between oscillating ion-electron pairs and the space-time continuum.

Die Glocke "The Bell" Broadway Books

In the last year of World War II, most of Germany realized defeat was imminent. Facing the overwhelming power and equipment of the Allies, Hitler authorized the construction of Wunderwaffe (wonder weapons). This story offers an explanation of the focus on the "Die Glocke" project. There were other Wunderwaffe projects but "The Bell" was the one most-cloaked in secrecy. If its powers could be harnessed by the Nazis, it could be the bargaining chip to bring the Allies to the negotiating table and improve the surrender terms of the Third Reich. Its powers were believed to be so staggering that at the end of World War II, all of the scientists and laborers working on "Die Glocke" were murdered. The bell, General Hans Kammler (SS general in charge of the Die Glocke project), two Nazi U-boats, and many Nazi war criminals ended up missing. This work of fiction attempts to explain this mystery.

MAN-MADE UFOs

Simon and Schuster

In a personal, no-nonsense style, Keyhoe provides the details of his investigation; he talks with witnesses, reviews the fascinating history of the phenomenon, and attempts to pry open "the lid of secrecy" the United States Air Force had clamped down on the subject of UFOs.
