When Ford teamed up with Cosworth Engineering to breathe life onto its humdrum Sierra, few knew it would be the birth of a motoring legend. Through circuit racing and supercar-humbling on-road ability, the 1985 Sierra RS Cosworth quickly became a household name. A practical four-seater boasting 204bhp from its two-liter turbocharged power plant, the RS Cosworth's massive performance was equaled only by an extroverted rear wing designed for high-speed stability . While motorsport machines scooped innumerable victories and increasingly powerful engines, in 1987 Ford homologated a yet-more-spectacular Sierra - the 224bhp RS500. It instantly became a desirable collector's piece. The restrained four-door Sierra Sapphire RS Cosworth of 1988 was Ford's vision of a 150mph executive express; two years later, its four-wheel-drive successor returned the firm to rallying. By 1992, Ford had squeezed the 4x4's running gear into a shorter Escort body, complete with 227bhp engine and ever-more-aggressive aerodynamic aids. The limited-edition Monte Carlo came in 1994, followed by the final RS Cosworth - a revised Escort with smaller turbocharger and user-friendly appeal. Production ceased in 1996. Today, each model has a loyal following among motorsport fans and fast Fords enthusiasts. And as the cars become increasingly sought-after, so too does the pursuit of perfection. This book examines RS Cosworth authenticity, outlining standard specifications alongside in-depth color photography of outstanding examples of the breed. From body panels and trim to turbochargers and tires; from interior fabrics and paint schemes to shock absorbers and stickers, Ford's factory-original fitments are covered in comprehensive detail.

Though American Motors never approached the size of Detroit's Big Three, it produced a long series of successful cars that were distinctive, often innovative and in many cases influential. This history examines AMC's cars from the company's formation in 1954 through its absorption by Chrysler in 1987. The Gremlin, Pacer and Eagle vehicles are examined in detail, as are the AMC custom cars of George Barris and Carl Green. The text details AMC's 1980s involvement with the French firm Renault and the design legacy of that joint venture, which includes the Hummer. The evolution of Jeep is covered from the 1960s through the 2000s. Features include some 225 photographs; a listing

of AMC / Rambler clubs, organizations and business entities, with contact details; tables of detailed specifications and performance data; data on technical devices, trim packages and all model variations; a comprehensive account of AMC / Rambler appearances in film, television and cartoons.

In 1965, Colin Chapman persuaded Ford to underwrite development of a V8 for the new 3000cc Grand Prix formula. Built by Cosworth, the new DFV engine won Lotus four World Championship Grands Prix in 1967. A year later, and now available to other constructors, the engine began its domination of Grand Prix racing.

Salute to the "bow tie" Louis Chevrolet was a well-known race car driver and builder/designer in the early 1900s, but it's doubtful ol' Louis himself could ever have imagined that his French surname would eventually be as purely American as "baseball, hot dogs, and apple pie." Just Chevys assembles a century of great Chevrolets and the stories that make these cars memorable. From the Model T fighters of the early 1900s, to the fabulous finned wonders of the 1950s, the high flying Corvettes and muscles cars of the 1960s and beyond, Just Chevys spotlights the cars, and the car lovers, who have made Chevrolet America's most beloved car.

No American city opened its arms and embraced the automobile like Los Angeles. But for L.A. the car was always more than basic transportation. From the days of Ford's Model T right through today, Los Angeles and Southern California have been all about speed, racing, and building performance in a thousand ways that no one else in the country ever imagined. When L.A.'s racers and car builders decided to storm Indianapolis and its seminal 500 in the frantic 1920s and 1930s, their super-advanced race cars and cocky drivers blew off everything in their path. The disgruntled competition cursed the whole L.A. race colony as "those damn cowboys out of California." Little did they know that still more speed-obsessed cowboys were queuing up hundreds deep in the City of Speed. Seemingly unfettered by conventional notions about what a car should be or do, L.A.'s speed freaks were busily introducing hot rodding, land speed racing, the performance industry, drag strips, and countless other gearhead enterprises. Throughout the twentieth century, Los Angeles would assert itself as America's absolute mecca of speed. Joe Scalzo's City of Speed" is the first book to explore

the huge influence of L.A.'s racing culture and its personalities on all of motorsports. Its fantastic tale is illustrated with historic photography, much of it previously unpublished. Los Angeles' racing history is America's racing history.
