Divorce. Just the word "divorce" can cause your stomach to clench, sweat to drop from your brow, and an increased heart rate. Divorce takes everything that was good and lovely in marriage and utterly crushes it. This book has been written out of what my eyes have seen, my ears have heard, and six years of observation, and subsequently research, into the world of divorce, and what a woman that has been scorned will do, and the lengths she will go to hurt the man she once loved pay for hurting her. And how she will use the power of the law and the police to get what she wants. While the book touches on the ugliness of divorce between the woman and the man, it also

touches on custody and co-parenting from someone who has been there and experienced a divorce. It offers guidance, it offers a fresh perspective, and it offers hope. "Marriage is not 50-50; Divorce is 50-50. Marriage must be 100-100. It isn't dividing everything in half but giving everything, you've got." -D. Willis After all, you may be divorcing your spouse, but your children are not divorcing from their parents. Featuring excerpts of essays collected from over one thousand young adults while in the throes of divorce, this book paints a picture of the pain and the hope shown by the storytellers. By framing the narratives with an analysis of the most recent divorce literature, the authors provide readers with a greater and more vivid understanding of the effects of divorce. Challenging the contention that most children will be irretrievably hurt by their parents' divorce, some stories clearly demonstrate the strength and resilience many have learned in dealing with a divorce in the family. Emphasis is placed on how hope about the possibilities of having close relationships - as well as a willingness to create stronger families in their own lives - represent abiding motivations in this sample of young people. The authors hope that the use of the raw input of respondents will make the experiences more realistic and ultimately help people deal with major loss events in their lives. Highlights of the new edition include: A new chapter (7) that demonstrates the messiness of divorce (infidelity, dysfunctional interactions, multiple marriages/relationships, and the financial expense), the fading stigma of divorce, the latest divorce rates, the increased average age of first time marriages, and the recent hook-up phenomenon wherein young people are showing a reluctance to commitment. Updated throughout with the most current demographic data, new findings from the top researchers in the field, and the latest intervention programs. A review of the Divorce Variability and Fluidity Model (DVFM) that helps predict variability in adjusting to divorce. More suggestions to help children adapt to divorce, including material on parenting education classes and mediation as a method for easing the process. A list of readings and suggested websites for further review. More tables and graphs to summarize key concepts. An ideal supplement for courses on divorce, family studies, close relationships, and loss and trauma taught in human development and family studies, and clinical, counseling, and social psychology, as well as communication, social work, and sociology, these engaging stories also appeal to practitioners and those interested in the effects of divorce in general.

For The Children's Sake: Vintage

This completely updated second edition presents an integrated, multidisciplinary account of children's experiences of divorce from historical, cultural and demographic perspectives. The author highlights children's resilience, but is sensitive to children's pain throughout the divorce process and afterwards. In addition he reviews the psychological, social, economic and legal consequences of divorce, and examines how children's risk is predicted by parental conflict, relationships with both parents, financial strain, custody disputes, and other factors. The author uses his family systems model to integrate research findings into a theoretical whole and to evaluate psychological interventions with divorcing and divorced families.

PARENTING PLAN EVALUATIONS

Random House

An astonishing one quarter of adults between the ages of eighteen and thirty-five have grown up in divorced families. Now, as this generation comes of age, *Between Two Worlds* will speak to them like no other book. Marquardt's data is undeniably compelling, but at the heart of her book are stories—of reunions with one parent that were always partings from the other, of struggles to adapt to a parent's moods, of the burden of having to figure out the important questions in life alone. Authoritative, beautifully written, and filled with brave, sad, unflinchingly honest voices, *Between Two Worlds* is a book of transforming power for the adult children of divorce, whose real experiences have for too

long gone unrecognized. Based on a pioneering new study, *Between Two Worlds* is a book of transforming power for anyone who grew up with divorced parents.

Marriage, Divorce, and Children's Adjustment Jossey-Bass

Many books deal with divorce and its aftermath -- some deal with the impact of divorce on children and families, others with the legal or sociological aspects of divorce, and a few focus on divorced mothers and fathers. Most of these books are characterized by their practical orientation toward the issues and problems posed by divorce. None of these, however, have attempted to offer an integrated view of the massive amount of theoretical and research literature on divorced adults and their children. In addition, none present a comprehensive view of divorce as a psychological process within its larger social context. Filling that void, this book: * offers a comprehensive view of divorce as a social, interpersonal and psychological phenomenon, * reviews the theory and research on divorce focusing on the major protagonists of the divorce drama: the mother, the father and the children, and * introduces a social-psychological theory of divorce process.

Understanding the Divorce Cycle Cambridge University Press
Growing up in a divorced family leads to a variety of difficulties for adult offspring in their own partnerships. One of the best known and most powerful is the divorce cycle, the transmission of divorce from one generation to the next. This book examines how the divorce cycle has transformed family life in contemporary America by drawing on two national data sets. Compared to people from intact families, the children of divorce are more likely to marry as teenagers, but less likely to wed overall, more likely to marry people from divorced families, more likely to dissolve second and third marriages, and less likely to marry their live-in partners. Yet some of the adverse consequences of parental divorce have abated even as divorce itself proliferated and became more socially accepted. Taken together, these findings show how parental divorce is a strong force in people's lives and society as a whole.

Between Two Worlds Marriage, Divorce, and Children's Adjustment

With roller coaster changes in marriage and divorce rates apparently leveling off in the 1980s, Andrew Cherlin feels that the time is right for an overall assessment of marital trends. His graceful and informal book surveys and explains the latest research on marriage, divorce, and remarriage since World War II. Cherlin presents the facts about family change over the past thirty-five years and examines the reasons for the trends that emerge. He views the 1950s, when Americans were marrying and having children early and divorcing infrequently, as the aberration, and he discusses why this period was unusual. He also explores the causes and consequences of the dramatic changes since 1960--increases in divorce, remarriage, and cohabitation, decreases in fertility--that are altering the very definition of the family in our society. He concludes with a discussion of the increasing differences in the marital patterns of black and white families over the past few decades.
