'The Theory and Practice of Learning' explores the basic theories of learning, how they have developed, and how they can be put into practice.

*The Theory and Practice of Item Response Theory, Second Edition* Cambridge University Press

"Neither an academic tome nor a prescriptive 'how to' guide, *The Theory and Practice of Online Learning* is an illuminating collection of essays by practitioners and scholars active in the complex field of distance education. Distance education has evolved significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of "The Theory and Practice of Online Learning" features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations."--BOOK JACKET.

Many art historians regard poststructuralist theory with suspicion; some even see its focus on the political dimension of language as hostile to an authentic study of the past. Keith Moxey bridges the gap between historical and theoretical approaches with the provocative argument that we

cannot have one without the other. "If art history is to take part in the processes of cultural transformation that characterize our society," he writes, "then its historical narratives must come to terms with the most powerful and influential theories that currently determine the way in which we conceive of ourselves." After exploring how the insights offered by deconstruction and semiotics change our understanding of representation, ideology, and authorship, Moxey himself puts theory into practice. In a series of engaging essays accompanied by twenty-eight illustrations, he first examines the impact of cultural values on Erwin Panofsky's writings. Taking a fresh look at work by artists from Albrecht Dürer and Erhard Schön to Barbara Kruger and Julian Schnabel, he then examines the process by which he generic boundaries between "high" and "low" art have helped to sustain class and gender differences. Making particular reference to the literature on Martin Schongauer, Moxey also considers the value of art history when it is reduced to artist's biography. Moxey's interpretation of the work of Hieronymus Bosch not only reassesses its intelligence and imagination, but also brings to light its pragmatic conformity to elite definitions of artistic "genius." With his compelling analysis of the politics of interpretation, Moxey draws attention to a vital aspect of the cultural importance of history.

### THE REFUSAL OF WORK

SAGE

Open Access in Theory and Practice investigates the theory-practice relationship in the domain of open access publication and dissemination of research outputs. Drawing on detailed analysis of the literature and current practice in OA, as well as data collected in detailed interviews with practitioners, policymakers, and researchers, the book discusses what constitutes 'theory', and how the role of theory is perceived by both theorists and practitioners. Exploring the ways theory and practice have interacted in the development of OA, the authors discuss what this reveals about the nature of the OA phenomenon itself and the theory-practice relationship. Open Access in Theory and Practice contributes to a better understanding of OA and, as such, should be of great interest to academics, researchers, and students working in the fields of information science, publishing studies, science communication, higher education policy, business, and economics. The book also makes an important contribution to the debate of the relationship between theory and practice in information science, and more widely across different fields of the social sciences and humanities

Paid work is absolutely central to the culture and politics of capitalist societies, yet today's work-centred world is becoming increasingly hostile to the human need for autonomy, spontaneity and community. The grim reality of a society in which some are overworked, whilst others are condemned to intermittent work and unemployment, is progressively more difficult to tolerate. In this thought-provoking book, David Frayne questions the central place of work in mainstream political visions of the future, laying bare the ways in which economic demands colonise our lives and priorities. Drawing on his original research into the lives of people who are actively resisting nine-to-five employment, Frayne asks what motivates these people to disconnect from work, whether or not their resistance is futile, and whether they might have the capacity to inspire an alternative form of development, based on a reduction and social redistribution of work. A crucial dissection of the work-centred nature of modern society and emerging resistance to it, *The Refusal of Work* is a bold call for a more humane and sustainable vision of social progress.

#### **PRACTICE THEORY, WORK, AND ORGANIZATION**

Routledge

Practice Theory and Education challenges how we think about 'practice', examining what it means across different fields and sites. It is organised into four themes: discursive practices; practice, change and organisations; practising subjectivity; and professional practice, public policy and education. Contributors to the collection engage and extend practice theory by drawing on the legacies of diverse social and cultural theorists, including Bourdieu, de Certeau, Deleuze and Guattari, Dewey, Latour, Marx, and Vygotsky, and by building on the theoretical trajectories of contemporary authors such as Karen Barad, Yrjo Engestrom, Andreas Reckwitz, Theodore Schatzki, Dorothy Smith, and Charles Taylor. The proximity of ideas from different fields and theoretical traditions in the book highlight key matters of concern in contemporary practice thinking, including the historicity of practice; the nature of change in professional practices; the place of discursive material in practice; the efficacy of refiguring conventional

understandings of subjectivity and agency; and the capacity for theories of practice to disrupt conventional understandings of asymmetries of power and resources. Their juxtaposition also points to areas of contestation and raises important questions for future research. Practice Theory and Education will appeal to postgraduate students, academics and researchers in professional practice and education, and scholars working with social theory. It will be of particular interest to those who wish to move beyond the limiting configurations of practice found in contemporary neoliberal, new managerialist and narrow representationalist discourses.

Dirty theory follows the dirt of material and conceptual relations from the midst of complex milieus. It messes with mixed disciplines, showing up in ethnography, in geography, in philosophy, and discovering a suitable habitat in architecture, design and the creative arts. Dirty theory disrupts a comfortable status quo, including our everyday modes of inhabitation and our habits of thinking. This small book argues that we must work with the dirt to develop an ethics of care and maintenance for our precarious environment-worlds. Hélène Frichot (PhD) is Professor of Architecture, KTH Stockholm, and in 2020 joins the Faculty of Architecture, Building and Planning, University of Melbourne, Australia as Professor of Architecture and Philosophy. Her research traverses the dirty interdisciplinary domain between architecture and philosophy where she places an emphasis on feminist theories and practices and how to maintain a creative ecology of practices.

Now in paperback, nine lectures from Jacques Derrida that challenge the influential Marxist distinction between thinking and acting. Theory and Practice is a series of nine lectures that Jacques Derrida delivered at the École Normale Supérieure in 1976 and 1977. The topic of "theory and practice" was associated above all with Marxist discourse and particularly the influential interpretation of Marx by Louis Althusser. Derrida's many questions to Althusser and other thinkers aim at unsettling the distinction between thinking and acting. Derrida's investigations set out from Marx's "Theses on Feuerbach," in particular the eleventh thesis, which has often been taken as a mantra for the "end of philosophy," to be brought about by Marxist practice. Derrida argues, however, that Althusser has no such end in view and that his discourse remains resolutely philosophical, even as it promotes the theory/practice pair as primary values. This seminar also draws fascinating connections between Marxist thought and Heidegger and features Derrida's signature reconsideration of the dichotomy between doing and thinking. This text, available for the first time in English, shows that Derrida was doing important work on Marx long before Specters of Marx. As with the other volumes in this series, it gives readers an unparalleled glimpse into Derrida's thinking at its best—spontaneous, unpredictable, and groundbreaking.
