In this book Ian Sinclair provides the practical knowhow required by technician engineers, systems designers and students. The focus is firmly on understanding the technologies and their different applications, not a mathematical approach. The result is a highly readable text which provides a unique introduction to the selection and application of sensors, transducers and switches, and a grounding in the practicalities of designing with these devices. The devices covered encompass heat, light and motion, environmental sensing, sensing in industrial control, and signal-carrying and non-signal switches. Get up to speed in this key topic through this leading practical guide Understand the range of technologies and applications before specifying Gain a working knowledge with a minimum of maths

Every company or business establishment aims at making more sales than the competitor. Different strategies of ensuring effective marketing are put in place often. However, over the past years, things seem to have changed a lot. Unlike in the past when marketing was done based on the old strategies, things have already taken a new path, and modernization is gradually dominating. This has seen businesses and other establishments adapt to the different strategies of marketing, with the hope of making landmark strides in development. Innovation is among the key moves that companies are taking today. The main intention of embracing innovation is to ensure that companies are able to maneuver through the market landscape and still emerge authoritative. Over the years, innovation has really grown and more companies are embracing the same just to make sure that

their progress is in the right direction. In most cases, innovation is motivated by the growing technology. Marketers develop and grow ideas based on the technological innovations that have been taking place globally. The value of innovation remains undisputed and that is not about to change. In as much as innovation remains as a key priority for businesses, there are marketers who do not have an idea of what the wave of innovation is all about. As unfortunate as that may sound, the same truth remains. There has been the need to inform the world of what innovation is all about and what can be done to facilitate goal achievement in any business. We must appreciate that innovation is here to stay. It is a force that cannot be denied at all. It is something that any business needs to make strides towards the right direction. It is a necessary force. Having noted that, business organizations are left with absolutely no choice than to consider innovation as part of their operations. Any other marketer out there is gradually adapting to innovate and this must reflect across the board. The focus of this book is to equip prospective, budding, and existing marketers with all the necessary knowledge on how they can marry innovation and marketing in order to improve results. We appreciate the fact that most marketers out there are in the hunt for information on innovation. It is for this reason that this book came to existence. All content found here is beneficial to marketers in the sense that it directs them towards the modern trends of innovation. The author of this book has a rich background in marketing. This means that all content in the book is justified from a professional point of view. The book is built around facts and justified information, hence offering an assurance to the readers that what they are about to read is indeed focused towards the right direction. Developing good marketing and subsequent good returns in businesses is a fundamental requirement of any business what wishes to progress well in the long run.

This exciting new textbook is built on the belief that strategic management principles are more straightforward than they seem. Unlike other textbooks, Essentials of Strategic Management does not overcomplicate the discussion with enigmatic layers of theory or irrelevant perspectives from other disciplines. Instead you will find focused, clearly articulated coverage of the key topics of

strategic management, encouraging critical reflection and deeper exploration on your own terms. Fully developed to cover the essentials of any strategic management course, authors Martyn R. Pitt and Dimitrios Koufopoulos not only create understanding of the principles of strategy, but shows you how to apply them constructively in the face of real-world practicalities.

Hydrogen Power: An Introduction to Hydrogen Energy and its Applications explains how hydrogen is produced, used, and handled and shows that the use of chemical hydrogen power has enormous advantages as an energy storage, transport, and use medium. Organized into seven chapters, this book first describes the chemical and physical properties of hydrogen. Subsequent chapters elucidate the current industrial uses of hydrogen, methods of producing hydrogen, and hydrogen transportation and storage. Hydrogen safety and environmental considerations are also addressed.

"In International Groundwater Law and the US-Mexico Border Region, María Milanés Murcia provides a study and analysis of the international groundwater law. The regulation and groundwater management along the US-Mexico border reflect the current international trends for management of transboundary groundwater. International Groundwater Law and the US-Mexico Border Region offers a new international legal and institutional framework to manage fossil aquifers and groundwater in conjunctive use with surface water, where specific guidelines and recommendations for water banking can improve water allocation and protect the environment. This framework can be adapted to any region of around the world. The US-Mexico border is the case study selected to apply and demonstrate the efficacy of this legal

and institutional framework"--

The French economy weathered global crisis better than most of its peers. The authorities have taken important policy actions to stabilize the financial system and have implemented suitable fiscal stimulus to cushion the downturn. Executive Directors welcomed the policy, which aims to strengthen the economy through fiscal consolidation, recovery of financial system, improving financial regulation, and also implementing structural reforms to raise potential growth, create jobs, and strengthen competitiveness. They stressed the importance of a multiyear budget framework to enhance the credibility of the consolidation effort.
