"A philosophical and spiritual defense of the premodern world, of the tragic view, of physical courage, and of masculinity and self-sacrifice in an age when those ancient virtues are too often caricatured and dismissed." —Victor Davis Hanson Award-winning author Michael Walsh celebrates the masculine attributes of heroism that forged American civilization and Western culture by exploring historical battles in which soldiers chose death over dishonor in *Last Stands: Why Men Fight When All Is*

Lost. In our contemporary era, men are increasingly denied their heritage as warriors. A survival instinct that's part of the human condition, the drive to wage war is natural. Without war, the United States would not exist. The technology that has eased manual labor, extended lifespans, and become an integral part of our lives and culture has often evolved from wartime scientific advancements. War is necessary to defend the social and political principles that define the virtues and freedoms of America and other Western nations. We should not be ashamed of the heroes who sacrificed their lives to build a better world. We should be honoring them. The son of a Korean War veteran of the Inchon landing and the battle of the Chosin Reservoir with the U.S. Marine Corps, Michael

Walsh knows all about heroism, valor, and the call of duty that requires men to fight for something greater than themselves to protect their families, fellow countrymen, and most of all their fellow soldiers. In *Last Stands*, Walsh reveals the causes and outcomes of more than a dozen battles in which a small fighting force refused to surrender to a far larger force, often dying to the last man. From the Spartans' defiance at Thermopylae and Roland's epic defense of Charlemagne's rear guard at Roncevaux Pass, through Santa Anna's siege of the Alamo defended by Davy Crockett and Jim Bowie to the skirmish at Little Big Horn between Crazy Horse's Sioux nation and George Armstrong Custer's Seventh Cavalry, to the Soviets' titanic struggle against the

German Wehrmacht at Stalingrad, and more, Walsh reminds us all of the debt we owe to heroes willing to risk their lives against overwhelming odds—and how these sacrifices and battles are not only a part of military history but our common civilizational heritage.

The Classical Greek Battle Experience Anchor

One of our most provocative military historians, Victor Davis Hanson has given us painstakingly researched and pathbreaking accounts of wars ranging from classical antiquity to the twenty-first century. Now he juxtaposes an ancient conflict with our most urgent modern concerns to create his most engrossing work to date, *A War Like No Other*. Over the course of a generation, the Hellenic city-states of Athens and Sparta fought a bloody conflict that resulted in the collapse of Athens and the end of its golden age. Thucydides wrote the standard history of the Peloponnesian War, which has given readers throughout the ages a vivid and authoritative narrative. But Hanson offers readers something new: a complete chronological account that

reflects the political background of the time, the strategic thinking of the combatants, the misery of battle in multifaceted theaters, and important insight into how these events echo in the present. Hanson compellingly portrays the ways Athens and Sparta fought on land and sea, in city and countryside, and details their employment of the full scope of conventional and nonconventional tactics, from sieges to targeted assassinations, torture, and terrorism. He also assesses the crucial roles played by warriors such as Pericles and Lysander, artists, among them Aristophanes, and thinkers including Sophocles and Plato. Hanson's perceptive analysis of events and personalities raises many thought-provoking questions: Were Athens and Sparta like America and Russia, two superpowers battling to the death? Is the Peloponnesian War echoed in the endless, frustrating conflicts of Vietnam, Northern Ireland, and the current Middle East? Or was it more like America's own Civil War, a brutal rift that rent the fabric of a glorious society, or even

this century's "red state—blue state" schism between liberals and conservatives, a cultural war that manifestly controls military policies? Hanson daringly brings the facts to life and unearths the often surprising ways in which the past informs the present. Brilliantly researched, dynamically written, *A War Like No Other* is like no other history of this important war.

Incorporating research found in ancient literary, iconographic, epigraphic, and archaeological sources, this book explores the experiences of the soldiers who conducted battle on the small plains of ancient Greece. The volume, which draws on the accumulated expertise of nine American and British scholars, emphasizes the actual techniques of fighting and practical concerns as the use of commands, music in warfare, the use of "dog-tags", and ritual on the battlefield.

Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

Matthew B. Ridgway was a significant figure in United States history. He commanded the 82nd Airborne Division in the invasion in Europe; he succeeded MacArthur in Korea; he was the U.S. delegate to the United Nations; he served as Supreme Commander of the Far East and Supreme Commander in Europe. He was counselor to four presidents, helped found a university research center on national security, and was a powerful influence in national affairs for 40 years. Using Ridgway's personal papers, George Mitchell offers a unique and compelling view of this authentic American hero.

How the Athenians and Spartans Fought the Peloponnesian War

Penguin

A definitive account of World War II by America's preeminent military historian. World War II was the most lethal conflict in human history. Never before had a war been fought on so many diverse landscapes and in so many different ways, from rocket attacks in London to jungle fighting in Burma to armor strikes in Libya. *The Second World Wars* examines how combat unfolded in the air, at sea, and on land to show how distinct conflicts among disparate combatants coalesced into one interconnected global war. Drawing on 3,000 years of military history, bestselling author Victor Davis Hanson argues that despite its novel industrial barbarity, neither the war's origins nor its geography were unusual. Nor was its ultimate outcome surprising. The Axis powers were well prepared to win limited border conflicts, but once they blundered into global war, they had no hope of victory. An authoritative new history of astonishing breadth, *The Second World Wars* offers a stunning reinterpretation of history's deadliest conflict.

*The Second World Wars*

Random House

*Intellectuals and Race* is a radical book in the original sense of one that goes to the root of the problem. The role of intellectuals in racial strife is explored in an international context that puts the American experience in a wholly new light. The views of individual intellectuals have spanned the spectrum, but the views of intellectuals as a whole have tended to cluster. Indeed, these views have clustered at one end of the spectrum in the early twentieth century and then clustered at the opposite end of the spectrum in the late twentieth century. Moreover, these radically different views of race in these two eras were held by intellectuals whose views on other issues were very similar in both eras. *Intellectuals and Race* is not, however, a book about history, even though it has much historical evidence, as well as demographic, geographic, economic and statistical evidence-- all of it directed toward testing the underlying assumptions about race that have prevailed at times among intellectuals in general, and especially intellectuals at the

highest levels. Nor is this simply a theoretical exercise. The impact of intellectuals' ideas and crusades on the larger society, both past and present, is the ultimate concern. These ideas and crusades have ranged widely from racial theories of intelligence to eugenics to "social justice" and multiculturalism. In addition to in-depth examinations of these and other issues, *Intellectuals and Race* explores the incentives, the visions and the rationales that drive intellectuals at the highest levels to conclusions that have often turned out to be counterproductive and even disastrous, not only for particular racial or ethnic groups, but for societies as a whole.

## THE GENERALS

Canongate Books

This New York Times bestselling Trump biography from a major American intellectual explains how a renegade businessman became one of the most successful -- and necessary -- presidents of all time. In *The Case for Trump*, award-winning historian and political commentator Victor Davis Hanson explains how a celebrity businessman with no

political or military experience triumphed over sixteen well-qualified Republican rivals, a Democrat with a quarter-billion-dollar war chest, and a hostile media and Washington establishment to become president of the United States -- and an extremely successful president. Trump alone saw a political opportunity in defending the working people of America's interior whom the coastal elite of both parties had come to scorn, Hanson argues. And Trump alone had the instincts and energy to pursue this opening to victory, dismantle a corrupt old order, and bring long-overdue policy changes at home and abroad. We could not survive a series of presidencies as volatile as Trump's. But after decades of drift, America needs the outsider Trump to do what normal politicians would not and could not do.

The book consists primarily of interviews between Strobel (a former legal editor at the Chicago Tribune) and biblical scholars such as Bruce Metzger. Each interview is based on a simple

question, concerning historical evidence (for example, "Can the Biographies of Jesus Be Trusted?"), scientific evidence, ("Does Archaeology Confirm or Contradict Jesus' Biographies?"), and "psychiatric evidence" ("Was Jesus Crazy When He Claimed to Be the Son of God?"). Together, these interviews compose a case brief defending Jesus' divinity, and urging readers to reach a verdict of their own.

## MAKERS OF ANCIENT STRATEGY

Encounter Books  
Examining nine landmark battles from ancient to modern times--from Salamis, where outnumbered Greeks devastated the slave army of Xerxes, to Cortes's conquest of Mexico to the Tet offensive--Victor Davis Hanson explains why the armies of the West have been the most lethal and effective of any fighting forces in the world. Looking beyond popular explanations such as geography or superior technology, Hanson argues that it is in fact Western culture and values--the tradition of dissent, the value placed on inventiveness and adaptation, the concept of citizenship--which have consistently produced superior arms and soldiers. Offering riveting battle narratives and a balanced perspective that avoids simple triumphalism, *Carnage and Culture* demonstrates how armies cannot be separated from the cultures that produce them and explains why an army produced by a free culture will always have the advantage.

**I Alone Can Fix It** Basic

Books  
INSTANT NEW YORK TIMES BESTSELLER An urgent primer on race and racism, from the host of the viral hit video series "Uncomfortable Conversations with a Black Man" "You cannot fix a problem you do not know you have." So begins Emmanuel Acho in his essential guide to the truths Americans need to know to address the systemic racism that has recently electrified protests in all fifty states. "There is a fix," Acho says. "But in order to access it, we're going to have to have some uncomfortable conversations." In *Uncomfortable Conversations With a Black Man*, Acho takes on all the questions, large and small, insensitive and taboo, many white Americans are afraid to ask--yet which all Americans need the answers to, now more than ever. With the same open-hearted generosity that has made his video series a phenomenon, Acho explains the vital core of such fraught concepts as white privilege, cultural appropriation, and "reverse racism." In his own words, he provides a space of compassion and

understanding in a discussion that can lack both. He asks only for the reader's curiosity—but along the way, he will galvanize all of us to join the antiracist fight.

*The Rise and Fall of the Third Reich* Anchor

Victor Davis Hanson has long been acclaimed as one of our leading scholars of ancient history. In recent years he has also become a trenchant voice on current affairs, bringing a historian's deep knowledge of past conflicts to bear on the crises of the present, from 9/11 to Iran. "War," he writes, "is an entirely human enterprise." Ideologies change, technologies develop, new strategies are invented-but human

nature is constant across time and space. The dynamics of warfare in the present age still remain comprehensible to us through careful study of the past. Though many have called the War on Terror unprecedented, its contours would have been quite familiar to Themistocles of Athens or William Tecumseh Sherman. And as we face the menace of a bin Laden or a Kim Jong-Il, we can prepare ourselves with knowledge of how such challenges have been met before. *The Father of Us All* brings together much of Hanson's finest writing on war and society, both ancient and modern. The author has gathered a range of essays, and combined and revised

them into a richly textured new work that explores such topics as how technology shapes warfare, what constitutes the "American way of war," and why even those who abhor war need to study military history.

"War is the father and king of us all," Heraclitus wrote in ancient Greece. And as Victor Davis Hanson shows, it is no less so today.
