Are you ready to learn Search Engine Optimization (SEO) Secrets the search engines don't want you to know about? Dr. Ty Belknap has been working with computers since 1982 as a network

Since then, he has successfully put over 3,000 keywords onto page one of the search engines for almost 200 different industries. SEO, or Search Engine Optimization, is the art of getting a web site to the top of the search engines. Many people write books about all the changes that have been happening with

SEO. They will talk about algorithm changes at Google and Bing, but the basic rules of SEO have not significantly changed in many years. Businesses need a strong presence on the Internet in order to go grow, but what does it really take? True, much of SEO requires an expert, but there are things people can do themselves to help strengthen that presence. Search engine optimization is not optional if you plan on attracting new customers. SEO, when done right, brings people to you that want and need your products and services. In Timeless SEO Secrets, you will learn how

to utilize the power of blogs, domain names, web sites, hosting, and much more to propel your web site to the top of the search engines, Without Knowing How to Code. Whether you run a small business, brick and mortar store, are a web designer, marketer, or entrepreneur, you will benefit from learning these Timeless SEO Secrets. Most businesses have nothing to do with marketing and SEO. Whether you do real estate, plumbing, or retail sales, you can still use these tips to guide your SEO professional, and to check to make sure they are doing their job. SEO is constantly evolving year after year as Google and other search engines have defined better ways to sort out sites. What seems to be happening is a gradual shift from the quantity to the quality of the content of a site but still staying grounded to the basics of SEO which are creating worthwhile content and the use of keywords. There are reports that say that the movement from quantity of texts to the quality of the content of a site has somehow "killed" SEO; what they don't realize is that by merely coming up with high quality content, sites are already using SEO techniques.
