ADRIENNE KEMP

Dialogue, Science and Academic Writing Cambridge University Press

A broad strand of applied linguistic research has focused on the language of science and scholarship, stressing its role in the construction and negotiation of knowledge claims. Central to the success of such texts is the use of evaluative expressions encoding what is considered to be desirable or undesirable in a given domain. While the speech acts relevant to evaluation have been extensively researched, little is known of the underlying values they encode. This volume seeks to fill the gap by exploring the main facets of academic value in a corpus of research articles from leading journals in anthropology, biology, computer science, economics, engineering, history, mathematics, medicine, physics and sociology. The collocations and qualified entities associated with such variables in the corpus provide insights into how scholars draw on a repertoire of conventional, largely unqualified, axiological meanings instrumental to the production of new knowledge in their field.

The Navy ChaplainResearch GenresExplorations and Applications

The Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language-technology interface has propelled dramatic changes in, and increased opportunities for, second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook consisting of four parts: language teaching and learning through technology; the technology-pedagogy interface; technology for L2 assessment; and research and development of technology for language learning. It considers how technology assists in all areas of language development, the emergence of pedagogy at the intersection of language and technology, technology in language assessment, and major research issues in research and development of technologies for language learning. It covers all aspects of language including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches, and new ways of conceiving and conducting research and development. The Handbook of Technology and Second Language Teaching and Learning demonstrates the extensive, multifaceted implications of technology for language teachers, learners, materials-developers, and researchers.

HANDBOOK OF COMMUNICATION IN THE PUBLIC SPHERE

Peter Lang

Writing matters, and so does research into real-life writing. The shift from an industrial to an information society has increased the importance of writing and text production in education, in everyday life and in more and more professions in the fields of economics and politics, science and technology, culture and media. Through writing, we build up organizations and social networks, develop projects, inform colleagues and customers, and generate the basis for decisions. The quality of writing is decisive for social resonance and professional success. This ubiquitous real-life writing is what the present handbook is about. The de Gruyter Handbook of Writing and Text Production brings together and systematizes state-of-the-art research. The volume contains five sections, focussing on (I) the theory and methodology of writing and text production research, as well as on problem-oriented and problem-solving approaches related to (II) authors, (III) modes and media, (IV) genres, and (V) domains of writing and text production. Throughout the 21 chapters, exemplary research projects illustrate the theoretical perspectives from globally relevant research spaces and traditions. Both established and future scholars can benefit from the handbook's fresh approach to writing in

the context of multimodal, multi-semiotic text production.

Genre Analysis John Benjamins Publishing Company

Persuasion, in its various linguistic forms, enters our lives daily. Politicians and the news media attempt to change or confirm our beliefs, while advertisers try to bend our tastes toward buying their products. Persuasion goes on in courtrooms, universities, and the business world. Persuasion pervades interpersonal relations in all social spheres, public and private. And persuasion reaches us via a large number of genres and their intricate interplay. This volume brings together nine chapters which investigate some of the typical genres of modern persuasion. Using both quantitative and qualitative methods, the authors explore the linguistic features of successful (and unsuccessful) persuasion and the reasons for the variation of persuasive choices as realized in various genres: business negotiations, judicial argumentation, political speech, advertising, newspaper editorials, and news writing. In the final chapter, the editors tie together the two themes □ persuasion and genres □ by proposing an Intergenre Model. This model assumes that a powerful force behind generic evolution is the perennial need for implicit persuasion.

MAIN CURRENTS IN THEORY AND ANALYSIS

Walter de Gruyter GmbH & Co KG

Routledge Translation Guides cover the key translation text types and genres and equip translators and students of translation with the skills needed to translate them. Concise, accessible and written by leading authorities, they include examples from existing translations, activities, further reading suggestions and a glossary of key terms. Scientific and Technical Translation focuses on texts that are typically translated in scientific and technical domains, such as technical instructions, data sheets and brochures, patents, scientific research articles and abstracts, popular science press releases and news reports. In seven chapters, this practical textbook: Introduces readers to the typical contexts in which scientific and technical translators work; Shows how corpus resources can be used for terminological and phraseological research; Considers how translation technologies are employed in technical and scientific translation; Explains a range of technical and scientific genres and their translation. Including a wide range of relevant tasks and activities, examples from the most commonly taught language pairs and a glossary of key terms, this is the essential textbook for modules on scientific and technical translation and specialised translation.

A GENRE-BASED VIEW

Routledge

Public information messages are an important means of state-citizen communication in today's societies. Using this genre, citizens are directed to "never ever drink and drive", to "slow down" and to "learn to say no". Yet, this book presents the first in-depth analysis of public information messages from a linguistic perspective, and indeed also from a cross-cultural perspective. Specifically, the study, adopting genre analysis, contrasts a corpus of state-run national public information campaigns in Germany and Ireland. A taxonomy of moves is developed inductively and the interactional features of the genre are analysed and related to the context of use. The comprehensive discussion of theoretical and methodological issues, the in-depth analysis and the extensive bibliography make this book of interest to researchers and students in (contrastive) discourse analysis, (cross-cultural) pragmatics, contrastive rhetoric, advertising, social psychology, mass communication and media studies. Copy-writers will also profit from the insights gained, particularly within the context of an increase in Europe-wide public information campaigns.

Corpus-based Research on Variation in English Legal Discourse Routledge

This book provides a rich and accessible account of genre studies by a world-renowned applied linguist. The hardback edition discusses today's research world, its various configurations of genres, and the role of English within the genres. Theoretical and methodological issues are explored, with a special emphasis on various metaphors of genre. The book is full of carefully worded detail and each chapter ends with suggestions for pedagogical practice. The volume closes with evaluations of

contrastive rhetoric, applied corpus linguistics, and critical approaches to EAP. Research Genres provides a rich and scholarly account of this key area.

A contrastive genre analysis of state-citizen communication

Contrastive Linguistics is an expanding field, as witnessed by the publication in recent years of an increasing number of monographs, collected volumes and journal articles. The present volume, which comprises an introduction and ten chapters dealing with lexical contrasts between English and other languages, shows advances within the well-established lexical work in the field. Each of the chapters takes lexical items as its starting point and compares English with one or more languages. The languages represented are Spanish, Lithuanian, Swedish, German, Norwegian and Czech. Furthermore, they emphasise the link between lexis and grammar, not only within the same language, but also across languages. Finally, several studies represent one of the more recent developments of contrastive linguistics, namely a growing focus on genre and register comparisons. The book should appeal to both established scholars and advanced students with an interest in lexis, genre, corpus linguistics and/or contrastive linguistics.

Aspects of Article Introductions, Michigan Classics Ed. Routledge

As you are reading this, you are finding yourself in the ubiquitous public sphere that is the Web. Ubiquitous, and yet not universally accessible. This volume addresses this dilemma of the public sphere, which is by definition open to everyone but in practice often excludes particular groups of people in particular societies at particular points in time. The guiding questions for this collection of articles are therefore: Who has access to the public sphere? How is this access enabled or disabled? Under what conditions is it granted or withheld, and by whom? We regard the public sphere as the nodal point for the discourses of business, politics and media, and this basic assumption is also reflected in the structure of the volume. Each of these three macro-topics comprises chapters by international scholars from a variety of disciplines and research traditions who each combine up-to-date overviews of the relevant literature with their own cutting-edge research into aspects of different public spheres such as corporate promotional communication, political rhetoric or genre features of electronic mass media. The broad scope of the volume is perhaps best reflected in a comprehensive discussion of communication technologies ranging from conventional spoken and written formats such as company brochures, political speeches and TV shows to emerging ones like customer chat forums, political blogs and text messaging. Due to the books' wide scope, its interdisciplinary approach and its clear structure, we are sure that whether you work in communication and media studies, linguistics, political science, sociology or marketing, you will find this handbook an invaluable guide offering state-of-the-art literature reviews and exciting new research in your field and adjacent areas.

A Textography of A Small University Building University of Michigan Press/ELT

This volume showcases some of the latest research on academic writing by leading and up-and-coming corpus linguists. The studies included in the volume are based on a wide range of corpora spanning first and second language academic writing at different levels of writing expertise, containing texts from a variety of academic disciplines (and sub-disciplines) and of different academic registers. Particularly novel aspects of the collection are the inclusion of research that combines rhetorical moves with multi-dimensional analysis, studies that cover both fixed and variable phraseological items (lexical bundles, phrase-frames, constructions), and work that is based on corpora of English as an academic lingua franca. Going beyond merely summarizing their findings, the authors also discuss what their research means for academic writing practice and pedagogical settings. The volume will be of interest to researchers, students, and teachers who would like to expand their knowledge of how academic writing functions and what it looks like in a variety of contexts.

Genre in a Changing World Peter Lang

Doing Sociolinguistics: A practical guide to data collection and analysis provides an accessible introduction and guide to the methods of data collection and analysis in the field of sociolinguistics. It offers students the opportunity to engage directly with some of the foundational and more innovative work being done in the quantitative or variationist paradigm. Divided into sixteen short chapters, Doing Sociolinguistics: can be used as a core text in class or as an easy reference whilst undertaking research walks readers through the different phases of a sociolinguistic project, providing all the knowledge and skills students will need to conduct their own analyses of language features excerpts from key research articles; exercises with real data from the authors' own research; sample answers to the exercises; and further reading is supported by the Routledge Sociolinguistics Companion website (www.routledge.com/textbooks/meyerhoff) which features further online exercises with sound files. Designed to function as both a core text for methods classes in sociolinguistics and as a companion to the Routledge textbook Introducing Sociolinguistics, this book will be essential reading for all students studying and researching in this area.

Incidents in an Educational Life John Benjamins Publishing Company

Genre analysis has become a key approach within the field of English for Specific Purposes and helps students understand particular language use patterns in target contexts. Introducing Genre and English for Specific Purposes provides an overview of how genre has been conceptualized and applied in ESP, as well as the features that distinguish ESP genre research and teaching from those of other genre schools. The macro and micro aspects of ESP genre-based pedagogy are also analysed and include: different possibilities for planning and designing an ESP genre-based course; the concrete, micro aspects of materials creation; and how genres can be learned through play. Introducing Genre and English for Specific Purposes is essential reading for students and pre-service teachers who are studying Genre, English for Specific Purposes or language teaching methodologies. Research Genres Routledge

The goal of this volume is to examine academic discourse (AD) from cross-linguistic and cross-cultural perspectives. The adjective "Cross-cultural" in the volume title is not just limited to national contexts but also includes a cross-disciplinary perspective. Twelve scientific fields are under scrutiny in the articles. One of the unique aspects of the volume is the inclusion of a variety of foreign languages (English (as a lingua franca), Spanish, French, Swedish, Russian, German, Italian, and Norwegian). Besides, in several articles dealing with oral AD, comparisons and parallels are also established with written AD. The research methodologies used in the studies are varied and they offer an overview of the diversity and richness of approaches to AD. All in all, it is hoped that the volume appeals not only to young researchers but also to confirmed scholars interested in cross-

linguistic and cross-cultural aspects of AD. It will also be of interest to language teachers or teachers who are involved with e.g. international students and academic mobility.

Innovative Approaches in Teaching English Writing to Chinese Speakers John Benjamins Publishing

This book is a result of the 2013 CLAVIER Conference held in Modena in November 2013, and includes a selection of the papers presented on that occasion. As the title suggests, this volume encourages cross-generic and cross-disciplinary investigations, in order to advocate integrated approaches to the study of media discourse regarding both theoretical background and practical applications. Bringing together a wide range of case studies, the book fosters debate on a variety of aspects related to the representation of specialised discourse in and through the media, including, for example, voice and point of view, argumentative practices, knowledge construction, multimodality, the re-contextualization and re-conceptualization of knowledge, opinion formation and peer-to-peer communication, and popularization in and through traditional, digital and social media. Taken together, the contributions to this volume provide extensive exemplification of the type of research currently being conducted on these issues. The variety of the questions posed and the wide array of methods used here therefore represent a substantial contribution to sharpening existing knowledge and furthering the ongoing debate among scholars in the field.

DOING SOCIOLOGICAL LINGUISTICS

John Benjamins Publishing Company

Discourse Studies is an interdisciplinary field studying the social production of meaning across the entire spectrum of the social sciences and humanities. The Discourse Studies Reader brings together 40 key readings from discourse researchers in Europe and North America, some of which are now translated into English for the first time. Divided into seven sections - 'Theoretical Inspirations: Structuralism versus Pragmatics', 'From Structuralism to Poststructuralism', 'Enunciative Pragmatics', 'Interactionism', 'Sociopragmatics', 'Historical Knowledge' and 'Critical Approaches' - The Discourse Studies Reader offers a comprehensive overview of the main currents in discourse studies, both discourse theory and discourse analysis. With short introductions elaborating the broader context, the sections present key selections from a variety of disciplinary backgrounds by placing them into their respective epistemological traditions. The Discourse Studies Reader is an indispensable textbook for students and scholars alike who are interested in discourse theoretical questions and working with discourse analytical methods.

Pragmatics of Discourse Parlor Press LLC

This book investigates the dialogic nature of research articles from the perspective of discourse analysis, based on theories of dialogicity. It proposes a theoretical and applied framework for the understanding and exploration of scientific dialogicity. Focusing on some dialogic components, among them citations, concession, inclusive we and interrogatives, a combined model of scientific dialogicity is proposed, that reflects the place and role of various linguistic structures against the background of various theoretical approaches to dialogicity. Taking this combined model as a basis, the analysis demonstrates how scientific dialogicity is realized in an actual scientific dispute and how a scientific project is constructed step by step by means of a dialogue with its readers and discourse community. A number of different patterns of scientific dialogicity are offered, characterized by the different levels of the polemic held with the research world and other specific researchers - from the "classic", moderate and polite dialogicity to a direct and personal confrontation between scientists.

A Memoir (of Sorts) John Benjamins Publishing

Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. GENRE IN A CHANGING WORLD provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

Introducing Genre and English for Specific Purposes Walter de Gruyter GmbH & Co KG

11
2011

A Linguistic Approach John Benjamins Publishing

This volume brings together a selection of contributions presented at the 15th European Symposium on Languages for Special Purposes, held at the University of Bergamo (Italy) from 29 August to 2 September 2005. The conference title, «New Trends in Specialized Discourse», reflects the emphasis given to recent orientations in research, coming from established as well as new authors in the field. As suggested by the title of this volume, the analysis of specialized discourse calls for a specialized discourse analysis. When applied linguists deal with vocational discourses, they are faced with a double challenge: on the one hand, an understanding of textualisations often alien to the general language; on the other hand, the use of analytical tools designed specifically for their investigation. The studies presented in this volume position themselves somewhere along this continuum, focusing alternatively on converging/diverging features of texts and discourses.

The Map and the Landscape University of Michigan Press

This volume provides a comprehensive overview of the research carried out over the past thirty years in the vast field of legal discourse. The focus is on how such research has been influenced and shaped by developments in corpus linguistics and register analysis, and by the emergence from the mid 1990s of historical pragmatics as a branch of pragmatics concerned with the scrutiny of historical texts in their context of writing. The five chapters in Part I (together with the introductory chapter) offer a wide spectrum of the latest approaches to the synchronic analysis of cross-genre and cross-linguistic variation in legal discourse. Part II addresses diachronic variation, illustrating how a diversity of methods, such as multi-dimensional analysis, move analysis, collocation analysis, and Darwinian models of language evolution can uncover new understandings of diachronic linguistic phenomena.
