Deforestation: Quiz & Worksheet for Kids | Study.com Questions

And Answers On Deforestation Explanation: The air humans and

other animals consume is oxygen. Trees release oxygen when

they use energy from sunlight to make glucose from carbon

dioxide and water. But due to deforestation there is a lack of

trees which thereby reduced the air production and this also

cause increase in carbon dioxide level. 5. Deforestation -

Quiz What countries have the worst deforestation? Answer: The

United States has lost 90% of its indigenous forests since the

1600s. Other countries with significant deforestation are Brazil,

Indonesia, Thailand, the Democratic Republic of Congo, portions

of Eastern Europe. What effects does deforestation have on the

environmen? Deforestation What are some good questions about

deforestation? - Quora 1. Deforestation destroys habitats and

biomes. How does losing natural habitats effects the

predator/prey ratio? Answer: When you lose the predators

because their habitat is destroyed, the prey population increases.

At some point, this increased prey population exhausts the

supply of food, water and space in that habitat and they die. \_i
