MCLEAN COHEN

USING HEBREW AS A MEANS OF INSTRUCTION AND ACQUISITION

Prentice Hall

Briefly traces the history of solar cooking, shows how to make a solar oven and a solar hot plate, and provides recipes for vegetables, casseroles, poultry, fish, meat, breads, and desserts

NUMBERED VOICES

Business Law Crow Dog's Case American Indian Sovereignty, Tribal Law, and United States Law in the Nineteenth Century

Pocketbook

Through Students' Eyes University of Virginia Press

In Dynamics of Teaching and Learning Modern Hebrew, Yona Gilead's original research into classroom interactions, offers a thick description of a successful beginner-level Modern Hebrew program at an Australian university, thus offering a model for renewed interest in Hebrew L2 research.

Environmental Movement of Chemicals in Air, Water, and Soil Routledge

The life and times of Sir Thomas More during the reign of King Henry the Eighth.

A Turning Point in Higher Education MIT Press

This book explores a range of biohealth and biosecurity threats, places them in context, and offers responses and solutions from global and local, networked and pyramidal, as well as specialized and interdisciplinary perspectives. Specifically covering bioterrorism, emerging infectious

diseases, pandemic disease preparedness and remediation, agroterrorism, food safety, and environmental issues, the contributors demonstrate that to counter terrorism of any kind, a global, networked, and multidisciplinary approach is essential. To be successful in biosecurity, this book argues it is necessary to extend partnerships, cooperation, and coordination between public health, clinical medicine, private business, law enforcement and other agencies locally, nationally and internationally.

Internationally, a clear understanding is needed of what has happened in past epidemics and what was accomplished in past bioprograms (in Britain, South Africa, Russia, for example). This book also assesses how, with the right technology and motivation, both a state and a non-state actor could initiate an extremely credible bioterror threat to security at both local and national levels. This book will be of much interest to students, researchers and practitioners of security studies, public health, public policy and IR in general. Peter Katona is Associate Professor of Clinical Medicine at the David Geffen School of Medicine at UCLA in Infectious Diseases. He is co-founder of Biological Threat Mitigation, a bioterror consulting firm. John P. Sullivan is a lieutenant with the Los Angeles Sheriff's Department. He is also a researcher focusing on terrorism, conflict disaster, intelligence studies, and urban operations. He is co-founder of the Los Angeles Terrorism Early Warning (TEW) Group. Michael D. Intriligator is Professor of Economics at the University of California, Los Angeles (UCLA). He is also Professor of Political Science, Professor of Public Policy in the School of Public Policy and Social Research, and Co-Director of the Jacob Marschak

Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences, all at UCLA.

The Brainwashing/deprogramming Controversy Oxford University Press, USA

"Engaging adolescent readers and ensuring they have the necessary literacy skills to succeed in all content areas can be a genuine challenge for middle school and secondary teachers. 50 Content Area Strategies for Adolescent Literacy, a text written by some of the best-known authors in the field, provides inservice and preservice teachers with a handbook of evidence-based strategies to use across content areas to ensure reading and writing success for all students. See how the features of this text can help you improve your ability to develop literacy skills and strategies with your students."--BOOK JACKET.

The Inaugural Address of Charles William Eliot Paulist Press

My Place begins with Sally Morgan tracing the experiences of her own life, growing up in suburban Perth in the fifties and sixties. Through the memories and images of her childhood and adolescence, vague hints and echoes begin to emerge, hidden knowledge is uncovered, and a fascinating story unfolds - a mystery of identity, complete with clues and suggested solutions. Sally Morgan's My Place is a deeply moving account of a search for truth, into which a whole family is gradually drawn; finally freeing the tongues of the author's mother and grandmother, allowing them to tell their own stories.

COMPETENCY-BASED EDUCATION

Routledge

This 1982 book draws on primary sources to illuminate the life and

achievements of engineer Charles Blacker Vignoles (1793-1875).

How a Radio Station Defined Politics, Counterculture, and Rock and Roll BRILL

Quantifying the American mood through opinion polls appears to be an unbiased means for finding out what people want. But in *Numbered Voices*, Susan Herbst demonstrates that the way public opinion is measured affects the use that voters, legislators, and journalists make of it. Exploring the history of public opinion in the United States from the mid-nineteenth century to the present day, Herbst shows how numbers served both instrumental and symbolic functions, not only conveying neutral information but creating a basis authority. Addressing how the quantification of public opinion has affected contemporary politics and the democratic process, Herbst asks difficult but fundamental questions about the workings of American politics. "An original and thought-provoking analysis of why we have polls, what they accomplish, and how they affect the current political scene. Herbst's scholarship is impeccable, her writing is clear and crisp, and her findings are original. . . . Every reader will benefit by carefully weighing the issues she raises and the conclusions she draws."—Doris A. Graber, *Political Science Quarterly* "An intelligent, theoretically rich, and historically broad account of public opinion over several millennia. . . . The historical accounts are interesting and her interpretations are thought-provoking."—Paul Brace, *Journal of American History*

The King's Good Servant IGI Global

The Bad Bug Book 2nd Edition, released in 2012, provides current information about the major known agents that cause foodborne illness. Each chapter in

this book is about a pathogen—a bacterium, virus, or parasite—or a natural toxin that can contaminate food and cause illness. The book contains scientific and technical information about the major pathogens that cause these kinds of illnesses. A separate “consumer box” in each chapter provides non-technical information, in everyday language. The boxes describe plainly what can make you sick and, more important, how to prevent it. The information provided in this handbook is abbreviated and general in nature, and is intended for practical use. It is not intended to be a comprehensive scientific or clinical reference. The Bad Bug Book is published by the Center for Food Safety and Applied Nutrition (CFSAN) of the Food and Drug Administration (FDA), U.S. Department of Health and Human Services.

Sociological, Psychological, Legal, and Historical Perspectives

Cambridge University Press

This is the first definitive and authoritative book available on ActionScript 3 animation techniques. ActionScript animation is a very popular discipline for Flash developers to learn. The essential skill set has been learned by many Flash developers through the first edition of this book. This has now been updated to ActionScript 3, Adobe's new and improved scripting language. All of the code has been updated, and some new techniques have been added to take advantage of ActionScript 3's new features, including the display list and new event architecture. The code can be used with the Flash 9 IDE, Flex Builder 2, or the free Flex 2 SDK.

Planning and Land Use in NSW

Fremantle Press

Reviews existing knowledge in the natural and engineering sciences to

determine the rates, lifetimes, routes, and reservoirs of chemicals moving through the environment and to estimate the level of exposure to susceptible living and nonliving targets. Uses simple models and ideas as guides in constructing integrated environmental and ecosystem models for simulating chemical movement and fate. Coverage includes phase equilibrium and transport processes; the interphase and intraphase transport process; movement of inorganic and organic chemicals across the air-water interface; desorption of chemicals from the mud-water interface; volatilization of pesticides from air-soil surfaces; and vertical distribution of dissolved, reactive chemicals in stratified waterbodies. Includes numerous problems from current literature and appendices with chemical, physical, transport, and environmental data.

Charles Blacker Vignoles: Romantic Engineer Palgrave Macmillan

"This book provides small businesses with a holistic approach to implementing their Web presence"--Provided by publisher.

Threats and Responses SUNY Press

Examines the relationship between the recent marketing aimed at the gay community and the movement that struggles to achieve equal rights for gay men and lesbians.

An Introduction to North American Archaeology SAGE

Contributors: Barry Boyer; Colin S. Diver; Daniel J. Gifford; Keith Hawkins; Peter K. Manning; Errol Meidinger; Robert L. Rabin; Paul Rock; and John M. Thomas. Few scholars have applied modern behavioral and organization theory to study U.S. regulatory agencies, and fewer still have integrated this approach with frameworks drawn from

administrative law and analysis. This multidisciplinary collection combines detailed case studies with theoretical discussions drawing upon legal concepts, organizational analysis, and behavioral theory.

Making Things Move! Cambridge University Press

*A full range of salad recipes provide for every taste and appetite. Chapters include classic salads, light salads, warm salads, grain & bean salads, pasta salads, slaws & shredded salads, main course salads, and fruit salads.

AUSTRALIAN INDUSTRIAL RELATIONS

Zondervan

A starting point for the study of the English Constitution and comparative constitutional law, *The Law of the Constitution* elucidates the guiding principles of the modern constitution of England: the legislative sovereignty of Parliament, the rule of law, and the binding force of unwritten conventions.

MEDIEVAL SHIPS AND WARFARE

Princeton University Press

Seeking Our Past: An Introduction to North American Archaeology offers an up-to-date and engaging introduction to North America's past that also illustrates contemporary archaeological practice. The authors include examples from both

North American prehistory and history--drawn from academic archaeology and Cultural Resource Management (CRM)--in order to provide a broad overview of how the continent was settled, what archaeologists have learned about life across the North American culture areas, and how current archaeologists research our past. Chapters are enhanced by case studies written especially for this book by the original researchers. Through these case studies readers gain familiarity with particular projects and insight into what archaeologists actually do. In addition, the authors cover such important ethical issues as respecting and working with descendant populations and the need for archaeological stewardship. They also provide valuable information about contemporary practice and careers in archaeology. New to this Edition * Expanded discussion of Paleoindian adaptations * A completely new chapter (13) that covers North American historical archaeology thematically * New and streamlined case studies * Revised and updated "Issues and Debates" and "Clues to the Past" feature boxes and "Faces in Archaeology" profiles * New feature boxes, "Anthropological Themes," which remind students of the broad anthropological research questions listed in Chapter 2 and show where to look for relevant discussions in each chapter

Foodborne Pathogenic Microorganisms and Natural Toxins Handbook Sellers Pub Incorporated

A look at racism in our schools as perceived by high-achieving students.
